### **Compliance for Medical Practices**

The only trauma management book written by emergency physicians for emergency physicians. Using illustrations, algorithms, and radiographs, this text highlights the most salient features and treatments of the various injury conditions. The goal of this text is to help readers answer the important question, What should I do and when? Pre-hospital care, resuscitation, emergency department management, and disposition of the trauma patient are thoroughly covered. Authored by emergency physicians, rather than surgeons, this book provides excellent information on the acute management and diagnostic strategies of trauma patients. Tables and boxed text emphasize important information in each chapter. Comprehensive information in each chapter ensures that readers will not have to search for additional literature. Pitfalls and pearls emphasize each chapters most important features. Helpful algorithms provide readers with real-time care of the patient. Concerns central to emergency practice, whether it be in a level I trauma center or community hospital setting, are emphasized. Challenging case scenarios set the stage for each chapter.

This practical resource provides the scientific basis and the "how-to" techniques to help the mother establish a milk supply and to confirm that the newborn is breastfeeding successfully before discharge. Promoting breastfeeding at the personal, interpersonal, and system levels, this second edition delivers evidence-based care across the health-illness continuum. Brief overviews of pathophysiology are included to enable readers to quickly develop physical assessment skills, make practical recommendations to the mother, and verify that the recommendations achieved the desired results. Clinical case scenarios help the reader think through realistic situations to generate possible management strategies. Easy-to-read content supports breastfeeding promotion during pregnancy and offers practical tips for breastfeeding management during the first

month of life. Actual clinical scenarios are included to stimulate critical thinking and breastfeeding management strategies. Interviewing techniques and physical assessment guidelines are provided to enhance breastfeeding initiation and continuation. Strategies to support breastfeeding for multiple or preterm births are offered. Research Highlights discuss key studies related to the clinical area. A new chapter on Strategies for Breastfeeding the Preterm Newborn presents important issues and concerns related to this critical time in the newborn's life. Expanded information on Disease Implications and Risks-Benefits of Pharmacologic and Herbal Therapies stresses the importance of understanding therapeutic care alternatives and their implications for successful breastfeeding.

### **The Osteopathic Physician**

Written by a practicing emergency physician, *The White Coat Investor* is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highly-educated and extensively trained at making difficult diagnoses and performing life saving procedures. However, they receive little to no training in business, personal finance, investing, insurance, taxes, estate planning, and asset protection. This book fills in the gaps and will teach you to use your high income to escape from your student loans, provide for your family, build wealth, and stop getting ripped off by unscrupulous financial professionals. Straight talk and clear explanations allow the book to be easily digested by a novice to the subject matter yet the book also contains advanced concepts specific to physicians you won't find in other financial books. This book will teach you how to: Graduate from medical school with as little debt as possible Escape from student loans within two to five years of residency graduation Purchase the right types and amounts of insurance Decide when to buy a house and how much to spend on it Learn to invest in a sensible, low-cost and effective manner with or without the assistance of an advisor Avoid investments which are designed to be sold, not bought Select advisors who give great service and advice at a fair price Become a millionaire within five to ten years of residency graduation Use a "Backdoor Roth IRA" and "Stealth IRA" to boost your retirement funds and decrease your taxes Protect your hard-won assets from professional and personal lawsuits Avoid estate taxes, avoid probate, and ensure your children and your money go where you want when you die Minimize your tax burden, keeping more of your hard-earned money Decide between an employee job and an independent contractor job Choose between sole proprietorship, Limited Liability Company, S Corporation, and C Corporation Take a look at the first pages of the book by clicking on the Look Inside feature Praise For *The White Coat Investor* "Much of my financial planning practice is helping doctors to correct mistakes that reading this book would have avoided in the first place." - Allan S. Roth, MBA, CPA, CFP(R), Author of *How a Second Grader Beats Wall Street* "Jim Dahle has done a lot of thinking about the peculiar financial problems facing physicians, and you, lucky reader, are about to reap the bounty of both his experience and his research." - William J. ### **The Ultimate Guide to Getting Into Physician Assistant School, Fourth Edition**

This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.
