The Orchadian

This book will appeal to an international audience as well as be irresistible to local readers. Anyone working or with an interest in Australia's arid zone should need ready access to this book. There is no equivalent publication out there at the moment, and this book has many authoritative chapters, richly illustrated with colourful material. The challenge of this book was to assemble current knowledge on particular topics and concepts, and principles relating to them. It is also forward-looking by identifying where there are gaps or inadequacies in knowledge, and where future research needs to be directed. Lead authors were encouraged to take such an approach; they had the opportunity to involve any author they considered appropriate. The final product should be a fabulous resource, also for university courses, especially at MSc level.

Australian Journal of Botany

Discusses how plant-derived smoke functions as a tool for promoting seed germination and growth, with 1355 species accounts.

Breeding of Neglected and Under-Utilized Crops, Spices, and

Herbs

Proceedings of the Eleventh World Orchid Conference, March 1984, Miami, Florida, U.S.A.

A very comprehensive bibliographical reference to international, national, and local literature on plant conservation - with over 10,000 references, arranged by country. A standard reference tool for anyone dealing with any aspect of plant conservation.

Orchid Conservation

A Guide to the Zygotic Embryo Culture of Coconut Palms (Cocos Nucifera L.)

Plant Protection Quarterly

Bibliography of Agriculture with Subject Index

Search

Australian Government Publications

Tasmanian Year Book

Australian Journal of Agricultural Research

Australian Journal of Soil Research

Discusses the various options for conserving plants at the level of the gene, species and community.

Index of Conference Proceedings Received

Each entry details the target weed, control agent, year of first release, country of origin of agent, status and degree of control, research organisation involved, and key references. The catalogue format has been modified slightly from earlier editions to improve ease of use. The book provides an invaluable means of keeping track of the world situation, and is a handy reference for professionals, research workers and students interested in the biological control of weeds.

Bibliography of Agriculture

Union List of Conference Proceedings in New Zealand Libraries

Proceedings - Vertebrate Pest Conference

Arising from a conference held at the University of Sydney in 1993, this collection of 35 papers addresses topics such as habitat loss, degradation and pollution of water resources, weeds and feral animals, and commercial use of native biota. Also discusses the role of government and non-government agencies in conservation. Includes 25 colour plates, references and an index. The editors work in the Environmental Survey and Research Division of the NSW National Parks and

Wildlife Service.

Australian Plants

ACIAR Technical Reports

Principles of Field Crop Production

Annual Report of the Operations of the Woods and Forests Department

The Conservation of Plant Biodiversity

Commercial crop production in the 21st century is a highly technical pursuit. There is an economic imperative for farmers to make a reasonable living through increased productivity, cost containment and market satisfaction. Contending with the variability of the Australian climate remains a major challenge. Of increasing

importance is the environmental imperative - the need to manage soil structure decline, erosion, acidity and salinity. Involved also are biodiversity preservation and the water reform agenda. The fourth edition of Principles of Field Crop Production addresses these issues and provides a contemporary understanding involved in the production of crops in Australia. The book provides background on the evolution of farming systems. A new chapter on climate variability and its predictability is included as are new treatments of rotations, weeds, pests and diseases. An introduction to supply chain management provides the reader with an understanding of market forces. All chapters have been updated and the principles clearly defined.

Biennial Report

The Rangeland Journal

This book discusses the biological control of weeds using arthropods, providing ecological management models for use across the tropical world.

Index of Conference Proceedings

Biological Control of Weeds

Australian Journal of Experimental Agriculture

This book includes 20 different chapters, where the authors have addressed various aspects of the cultivation, taxonomy, socio-economic importance and breeding and development as applied to neglected and underutilized crops. The first chapter deals with the more general aspects of the cultivation and propagation of these crops, thirteen chapters co
