The Putnam Competition has since 1928 been providing a challenge to gifted college mathematics students. This book, the second of the Putnam Competition volumes, contains problems with their solutions for the years 1965-1984. Additional solutions are presented for many of the problems. Included is an essay on recollections of the first Putnam Exam by Herbert Robbins, as well as appendices listing the winning teams and students from 1965 through 1984. This volume offers the problem solver an enticing sample of challenging problems and their solutions. In 1980, the MAA published the first William Lowell Putnam Mathematical Competition book, covering the contest from 1938 to 1964. In 2002 the third of the Putnam problem books appeared, covering the years 1985 through 2000. All three of these books belong on the bookshelf of students, teachers, and all interested in problem solving.

The title expresses the book's intention: not to go on distinguishing between God and the world, so as then to surrender the world, as godless, to its scientific 'disenchantment' and its technical exploitation by human beings, but instead to discover God in all the beings he has created and to find his life-giving Spirit in the community of creation that they share. This view—which has also been called panentheistic (in contrast to pantheistic)—requires us to bring reverence for the life of every living thing into the adoration of God. And this means expanding the worship and service of God to include service for God's creation.
