The publication of the IT Infrastructure Library® (ITIL®), published in July, 2011, introduces several new processes and concepts that are paramount to the success of IT Service Management within an organization. As IT evolves from a technology provider to a service provider to a true partner of the business, the concepts of Service Management become ever more important to allow the business to excel in a competitive environment. This book, "Foundations of IT Service Management with ITIL® 2011", provides the reader with foundations-level knowledge of the concepts of the IT Infrastructure Library® for both ITIL® v3 and ITIL® 2011 preparing the reader to achieve success on the ITIL® Foundations certification exam as well as gain new insight on how IT can truly meet the needs of the business. These concepts help IT align to the needs of the business. The IT Infrastructure Library®, by

focusing on the principle of providing services, empowers IT and the business with the tools they require to enable this alignment. Having become the de-facto standard in IT Service Management, ITIL® has rapidly gained popularity across the globe. Written by an ITIL® Expert trainer who has taught thousands of students and hundreds of organizations, "Foundations of IT Service Management with ITIL® 2011" provides a reader with the introduction to this approach to IT services without the expense of a formal classroom course. While the focus is primarily on providing information required to pass the ITIL® Foundations exam, this book goes beyond those basics to also provide a real understanding of ITIL® to further your knowledge and abilities as a valuable part of IT/business alignment. Using a case-study approach, real issues are discussed that represents challenges experienced by almost every IT organization. This book is supported with access to online sample exams that are constantly updated as new material is available. Based on reader input and the latest ITIL® Foundations syllabus, this book has been updated to provide readers with the most up-to-date exam preparation material possible.

Volvo revolutionised heavy truck design in 1964 with the introduction of the L4951 Titan TIPTOP. The new model brought the principle of the tilting cab to Europe and provided the foundations for the F88 of the following year. Safe, comfortable, powerful and reliable: the F88 was everything that the competition was not. 'Driver appeal' as a concept was born. Furthermore, it arrived exactly when the rapidly expanding international haulage scene needed it most. The result: Volvo could not fail to make an impact. The F89, with more power, followed in 1970 and the UK only F88 290 was introduced in 1975. Over a twelve-year production life, Volvo built over 60,000 examples of the F88 and F89. This second edition of Patrick Dyer's book includes virtually all the photographs that were in the original publication and also contains 50 additional shots, many from the Volvo company archive. This has enabled Patrick to give greater coverage to the G88 and G89 models which were infrequent visitors to the UK. Patrick has

also heavily revised and developed his text. The format of the book is larger than before, in keeping with his books on Scania, DAF and the Ford Transcontinental.

### **John Haynes**

J. D. Bernal's monumental work, Science in History, was the first full attempt to analyse the reciprocal relations of science and society throughout history, from the perfection of the flint hand-axe to the hydrogen bomb. In this remarkable study he

illustrates the impetus given to (and the limitations placed upon) discovery and invention by pastoral, agricultural, feudal, capitalist, and socialist systems, and conversely the ways in which science has altered economic, social, and political beliefs and practices. In this first volume Bernal discusses the nature and method of science before describing its emergence in the Stone Age, its full formation by the Greeks and its continuing growth (probably influenced from China) under Christendom and Islam in the Middle Ages. Andrew Brown, Bernal's biographer, with a nice sense of paradox, has said of him, he 'was steeped in history, in part because he was always thinking about the future.' He goes on to say, 'Science in History is an encyclopaedic, yet individual and colourful account of the emergence of science from pre-historic times. There is detailed coverage of the scientific revolution of the Enlightenment, the Industrial Age and the first two-thirds of the twentieth century. . . The writing flows and is devoid of the tortured idioms that mar so many academic histories of science. After reading it, it is easy to agree with C. P. Snow's orotund observation that Bernal was the last man to know science. Faber Finds are reissuing the illustrated four volume edition first published by Penguin in 1969. The four volumes are: Volume 1: The Emergence of Science, Volume 2: The Scientific and Industrial Revolutions, Volume 3: The Natural Sciences in Our Time, Volume 4: The Social Sciences: Conclusion. 'This stupendous work . . . is a magnificent synoptic view of the rise of science and its impact on society which leaves the reader awe-struck by Professor Bernal's encyclopaedic knowledge and historical sweep.' Times Literary Supplement

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.
