Abby Steele hadn't seen the inside of her own apartment in over three years. Life on the road kept her busy and building the business took all of her focus. Steel Journeys was a company she had founded all on her own. She wanted other women to experience what she had seen, felt, heard, smelled, and tasted. That was the dream-to form a women's motorcycle touring company, and to take it global. Three years was a long time to be away, but home was just a concept. It couldn't be defined by the four walls of any structure. Home was her saddle. Home was the wind in her face and the vibration under her seat. Home might be a Harley, a BMW, a Triumph, a Honda. Home was whatever bike fit the terrain. Home was the road. Abby was part riding instructor, part tour

guide and part life coach. She cared about the women on her tours, and they respected her for it. It took a lot of miles to work through the hurts of her past, but finally she had built a life she could be proud of - until an unexpected visitor threatens to bring all the blocks tumbling down. Join Abby on the road to Patagonia, and reconnect with your own inner adventurer!

### **Modern Motorcycle Technology**

'A highly readable and spiritually uplifting book about a dream come true' Wanderlust 'Touching and memorable one for armchair travellers and bike freaks' Daily Mail From London to New York, Ewan and Charley chased their shadows through Europe, the Ukraine, Kazakhstan, Mongolia and Russia, across the Pacific to Alaska, then down through Canada and America. But as the miles slipped beneath the tyres of their big BMWs, their troubles started. Exhaustion, injury and accidents tested their strength.

Treacherous roads, unpredictable weather and turbulent politics challenged their stamina. They were chased by paparazzi in Kazakhstan, courted by men with very large guns in the Ukraine, hassled by the police, and given bulls' testicles for supper by Mongolian nomads. And yet despite all these obstacles they managed to ride more than twenty thousand miles in four months, changing their lives forever in the process. As they travelled they documented their trip, taking photographs, and writing diaries by the campfire. Long Way Round is the result of their adventures - a fascinating, frank and highly entertaining travel book about two friends riding round the world together and, against all the odds, realising their dream.

Autonomous vehicles (AVs) have been used in military operations for more than 60 years, with torpedoes, cruise missiles, satellites, and target drones being early examples.<sup>1</sup> They have also been widely used in the civilian sector--for example, in the disposal of explosives, for work and measurement in radioactive environments, by various offshore industries for both creating and maintaining undersea facilities, for atmospheric and undersea research, and by industry in automated and robotic manufacturing. Recent military experiences with AVs have consistently demonstrated their value in a wide range of missions, and anticipated developments of AVs hold promise for increasingly significant roles in future naval operations. Advances in AV capabilities are enabled (and limited) by progress in the technologies of computing and robotics, navigation, communications and networking, power sources and propulsion, and materials. *Autonomous Vehicles in Support of Naval Operations* is a forward-looking discussion of the naval operational environment and vision for the Navy and Marine Corps and of naval mission needs and potential applications and limitations of AVs. This report considers the potential of AVs for naval operations, operational needs and technology issues, and opportunities for improved operations.

aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Experience one of the first novels from New York Times bestselling author Ted Dekker. “[Heaven’s Wager is] genuinely exciting . . . fast paced . . . spine-tingling . . .” —Publishers Weekly A thriller unlike any you have ever read. A love strong enough to bring a tremor to your bones. A sacrifice powerful enough to make heaven weep. At the close of World War II, a shell-shocked soldier, Jan Jovic, was forced to inflict a game of life and death on a peaceful Bosnian

community. In a few short hours, this young man was confronted by more love—and hate—than most experience in a lifetime. Years later, Jan has become a world-renown writer with widespread influence in the United States, his past buried deep in his memory. Until the most inopportune time, the game Jan witnessed comes back to haunt him . . . and unwittingly leads him to a beautiful but broken woman caught in an underworld of crime. He must now defeat an evil rarely seen. But there is a price. One that even this war-scarred soldier can't imagine. “Well, well, guess what I’ve found. A fiction writer with a rare knack for a compelling story, an expansive reservoir of clever ideas, and a unique dry wit that makes me laugh.” —Frank Peretti, New York Times bestselling author “Rarely does a novel grip a reader’s heart and soul the way *Heaven’s Wager* does. Dekker is among a very small number of writers who have mastered the challenge of blending sound theology with knock-your-socks-off storytelling.” —Robert Liparulo, novelist and contributing editor of *New Man* magazine

This book is an anthology of motorcycle stories. These 50 stories were submitted to me over a 13-year period by a wide range of motorcyclists from all walks of life. These authors tell their own personal stories of what happened to them as they rode their motorcycles. Among these writers are a few professionals who made some of their works available to me early in their careers. They now have books of

their own. Some tales are very short, and some are very long. I've tried to mix them up. You may find the stories of some authors grouped together. Each tale was intensively edited to provide a good reader experience. You'll find humor, risk-taking, adventures, poetry, rhyming verse, 2-up excursions, world travelers, stupid tricks on bikes, lessons learned, winter riding perils, hazards while riding, and stories told by returning riders. I wrote five of these stories. Two of my stories relate my experiences on my motorcycle trips. Two stories are fictional children's stories that involve fantasy and motorcycles. The last story is a short fictional tale that describes an alternate world of motorcycles. Got a better original tale? Send it to me for consideration in a possible sequel.
