struggles of taking up space in a fat-phobic world. Bringing together experiences of personal and national trauma, Blevins adeptly weaves the tale of her father's prolonged personal health crisis and gastric bypass surgery with the environmental catastrophe of the Deepwater Horizon oil spill. Blevins looks to each of these events as a "leak" of American society's pitfalls and shortcomings. These intertwined narratives, both disasters that could have been avoided, reveal points of failure in our systems of healthcare and environmental conservation. Incorporating pieces from her life, such as medical transcripts and quotes from news programs, Blevins composes a mosaic of our modern anxieties. Even through despair, she finds hope in mending broken relationships and shows us how we can flourish as individuals and as a nation despite our struggles. Fierce and haunting, this memoir creates a space of narrative through body, selfhood, family, and country.

### **Pell's Forms of Pleading and Practice for North Carolina**

"Stephen Shoemaker and writer Janet Chiswell Pittard have teamed up to present a selection of Shoemaker's paintings and drawings and the stories behind them. The 32 stories are an eclectic blend of humor, adventure, and tragedy. The narrative is peppered with short poems by Pittard, which help give the text an element of the unexpected"--Provided by publisher.

Hunting season has finally arrived and Battle Cry, a Plott Hound, is on his first hunt of the year. Every ounce of him from his nose to his tail quivers with excitement. He eagerly anticipates romping through the woods with his Plott companions to see who can be the first to strike, tree, or bay. Little did he know that around the bend an event loomed that would change his life. Learn about the breed that North Carolina has recognized as its state dog by following this touching tale of Battle Cry's journey as he adjusts from hunting in the woods to celebrating his new life as Lucky.

## **Ford Foundation Annual Report**

From its headwaters in western North Carolina near the Tennessee line, the New River runs north 337 miles, cutting through the Blue Ridge Mountains of Virginia and West Virginia on its way to the Ohio. No big cities inhabit its banks--just a few small towns along the way--and it carries no significant commercial traffic. The age of the New is debated, but it is certainly one of the world's oldest rivers, predating the Atlantic Ocean. This anthology assembles history, poetry, essays and stories by writers who have been inspired by the ancient and secluded stream, and from those whose lives are connected to its flow. Contributors hail from Ashe, Alleghany, Watauga and Wilkes counties in North Carolina, as well as Virginia and West Virginia.

## **Polk's Medical Register and Directory of North America**

Acclaimed as "the finest state roster ever published" and a "magnificent achievement," North Carolina Troops is an invaluable resource for scholars, local historians, genealogists, and Civil War enthusiasts. Each indexed volume contains unit histories and the names and service records of approximately 7,000 North Carolinians who served in the Civil War.

## **Bottled**

The mountains of North Carolina are serene and the people who live here enjoy the comfort and beauty of the rural areas and the bustling aspects of the larger cities. From the Pisgah Forest to cultural attractions in Tryon to mountain crafts in Asheville, there are myriad things to do and see in this region.

## **Hospitals**

The mountain region of North Carolina possesses an uncommon grace and beauty, a landscape full of breathtaking peaks, lush forests, and winding rivers and creeks. Within this picturesque scenery, pioneering spirits settled in Ashe County and established communities in an environment both enchanting and perilous. Officially

formed in 1799, Ashe County stands as one of the High Country's oldest and most intriguing areas. In this volume, containing over 200 black-and-white images, readers will journey into the Ashe County of yesteryear, a time dominated by horse and buggies, dirt roads, and early farms. Starting in the 1870s and stretching into the twentieth century, this stunning visual history allows today's reader to meet the resilient and rugged families that carved towns and communities into this mountainscape, to ride the Virginia Creeper railroad as it carries lumber and other goods to waiting markets, and to stroll along the banks of the historic New River, now recognized as a national Heritage River.

### **Reflections on the New River**

When Ashe County Memorial Hospital opened in November 1941, it was the realization of a dream for the poor, sparsely populated county in the mountains of northwestern North Carolina. Building a hospital is a major undertaking for any community at any time. Accomplishing this in the waning days of the Great Depression and on the brink of World War II, while scant local resources were taxed by catastrophic floods and severe snows, was a remarkable feat of community organization. This is the story of the generations of supporters, doctors, nurses, emergency personnel and others whose lives are interwoven with regional health care and the planning, building and operation of (the "new") Ashe Memorial Hospital. This legacy, brought to life through 114 photographs and

## Get Free A Hospital For Ashe County Four Generations Of Appalachian Community Health Care Contributions To Southern Appalachian

personal interviews with 97 individuals, traces the development of health care in a remote Appalachian community, from the days of folk remedies and midwives, to horseback doctors and early infirmaries, to the technological advances and outreach efforts of today's Ashe Memorial Hospital.

## **Southern Provisions**

From grits to deep-fried okra, from barbecue to corn bread, Southern food stirs greater loyalty and passion than any American cuisine. Yet as the crops that once defined it have disappeared, much of the flavor has leached out of Southern cookery until today. Thanks to a community of devoted chefs and farmers, and one indefatigable historian, Southern heirloom greens and grains and with them America's greatest cuisine--are being revived. Searching the archives for evidence of how nineteenth-century farmers bred their enormous variety of vegetables and

grains, and of their contemporaries tastes and cooking practices, David S. Shields has become a key figure in the effort to reboot Southern cuisine. "Southern Provisions" draws on ten years of research and activism to tell the story of a quintessentially American cuisine that was all but forgotten, and the lessons that its restoration holds for the revival of regional cuisines across the country. Shields vividly evokes the connections between plants, plantations, growers, seed brokers, markets, vendors, cooks, and consumers. He shows how the distinctiveness of local ingredients arose from historical circumstances and a confluence of English, French Huguenot, West African, and Native American foodways. Shields emphasizes the Southern Lowcountry, from the peanut patches of Wilmington, North Carolina; to the Truck Farms of the Charleston Neck, South Carolina; to the sugar cane fields of the Georgia Sea Islands; to the citrus groves of Amelia Island, Florida. But the book also takes up the cuisine of New Orleans and other areas of the South and the nation, and even the West Indies. Offering a fascinating panorama of America's culinary past, "Southern Provisions" also shows how the renovation of traditional southern ingredients will enable cooks to take regional cuisine into the future."
