Being a Woman Surgeon

Annual Reports of the Secretary of War

This volume does not claim to be a tactical, or strategic history of the campaigns of which it treats; it aims rather to be a narrative of the every-day life and experience of the private soldier in camp and field—how he lived, how he marched, how he fought and how he suffered. No sooner had some of the volunteers reached the front, and been subjected to the hardships and exposures of army life, than they fell sick, were sent to the hospital and were discharged without passing through any serious campaigns. Others were wounded early, were disabled and were never able to return to their regiments. The more fortunate passed sound and unscathed through battle after battle and campaign after campaign

through the whole war. Three years of active campaigning and a year in the hospital was the allotment of the writer, who thus was in the service from the beginning to the end of the war. Contents: Preface Chapter I Learning To Be A Soldier Chapter II The North Carolina Campaign Chapter III In Virginia Under General Pope Chapter IV With McClellan In Maryland Chapter V The Fredericksburg Campaign Chapter VI Playing Soldier In Kentucky Chapter VII The Campaign In Tennessee Chapter VIII Home On A Re-Enlistment Furlough Chapter IX With Grant In Virginia Chapter X Life In The Hospital

My Year of the Great War

Annual Report of the Secretary of War

It's 1965. A young surgeon is drafted into the U.S. Navy and sent to Vietnam, where he finds himself closer than he ever imagined to the carnage of war. He performs operations while under fire and sees wounds that can barely be contemplated. Marines are dying on the operating table in front of him. The small-town moral certainties he grew up believing in may themselves succumb to the ravages he is witnessing. More than anything, he wants to make it home to marry the woman he loves.

The Military Surgeon

The #1 internationally bestselling, gripping true story of a frontline trauma surgeon operating in the world's most dangerous war zones For more than 25 years, surgeon David Nott has volunteered in some of the world's most dangerous conflict zones. From Sarajevo under siege in 1993 to clandestine hospitals in rebel-held eastern Aleppo, he has carried out lifesaving operations in the most challenging conditions, and with none of the resources of a major metropolitan hospital. He is now widely acknowledged as the most experienced trauma surgeon in the world. War Doctor is his extraordinary story, encompassing his surgeries in nearly every major conflict zone since the end of the Cold War, as well as his struggles to return to a "normal" life and routine after each trip. Culminating in his recent trips to war-torn Syria—and the untold story of his efforts to help secure a humanitarian corridor out of besieged Aleppo to evacuate some 50,000 people—War Doctor is a heart-stopping and moving blend of medical memoir, personal journey, and nonfiction thriller that provides unforgettable, at times raw, insight into the human toll of war.

A Year on The Sauce

Personal Recollections of the Civil War

The Spur

Marrow of Tragedy

The Civil War was the greatest health disaster the United States has ever experienced, killing more than a million Americans and leaving many others invalided or grieving. Poorly prepared to care for wounded and sick soldiers as the war began, Union and Confederate governments scrambled to provide doctoring and nursing, supplies, and shelter for those felled by warfare or disease. During the war soldiers suffered from measles, dysentery, and pneumonia and needed both preventive and curative food and medicine. Family members—especially women—and governments mounted organized support efforts, while army doctors learned to standardize medical thought and practice. Resources in the north helped return soldiers to battle, while Confederate soldiers suffered hunger and other privations and healed more slowly, when they healed at all. In telling the stories of soldiers, families, physicians, nurses, and administrators, historian Margaret Humphreys concludes that medical science was not as limited at the beginning of the war as has been portrayed. Medicine and public health clearly advanced during the war—and continued to do so after military hostilities ceased.

Before the movie, this is the novel that gave life to Hawkeye Pierce, Trapper John, Hot Lips Houlihan, Frank Burns, Radar O'Reilly, and the rest of the gang that made the 4077th MASH like no other place in Korea or on earth. The doctors who worked in the Mobile Army Surgical Hospitals (MASH) during the Korean War were well trained but, like most soldiers sent to fight a war, too young for the job. In the words of the author, "a few flipped their lids, but most of them just raised hell, in a variety of ways and degrees." For fans of the movie and the series alike, here is the original version of that perfectly corrupt football game, those martini-laced mornings and sexual escapades, and that unforgettable foray into assisted if incompleting suicide--all as funny and poignant now as they were before they became a part of America's culture and heart.

My Diary in India, in the Year 1858-9

This is a handbook for surgeons and other medical staff who find themselves having to meet the needs of injured people in situations of war. The book covers assessment and procedures for surgical intervention in a wide variety of circumstances, and also includes a wealth of information on the organization of war medical services and on approaches to setting up forward clinics.

Few American military figures are more revered than General John J. "Black Jack" Pershing (1860--1948), who is most famous for leading the American Expeditionary Forces in World War I. The only soldier besides George Washington to be promoted to the highest rank in the U.S. Army (General of the Armies), Pershing was a mentor to the generation of generals who led America's forces during the Second World War. Though Pershing published a two-volume memoir, *My Experiences in the World War*, and has been the subject of numerous biographies, few know that he spent many years drafting a memoir

of his experiences prior to the First World War. In *My Life Before the World War, 1860--1917*, John T. Greenwood rescues this vital resource from obscurity, making Pershing's valuable insights into key events in history widely available for the first time. Pershing performed frontier duty against the Apaches and Sioux from 1886--1891, fought in Cuba in 1898, served three tours of duty in the Philippines, and was an observer with the Japanese Army in 1905 during the Russo-Japanese War. He also commanded the Mexican Punitive Expedition to capture Pancho Villa in 1916--1917. *My Life Before the World War* provides a rich personal account of events, people, and places as told by an observer at the center of the action. Carefully edited and annotated, this memoir is a significant contribution to our understanding of a legendary American soldier and the historic events in which he participated.

History of the New Hampshire Surgeons in the War of Rebellion

Surgery, Gynecology & Obstetrics

Doctors at War is a candid account of a trauma surgical team based, for a tour of duty, at a field hospital in Helmand, Afghanistan. Mark de Rond tells of the highs and lows of surgical life in hard-hitting detail, bringing to life a morally ambiguous world in which good people face impossible choices and in which routines designed to normalize experience have the unintended effect of highlighting war's absurdity. With stories that are at once comical and tragic, de Rond captures the surreal experience of being a doctor at war. He lifts the cover on a world rarely ever seen, let alone written about, and provides a poignant counterpoint to the archetypical, adrenaline-packed, macho tale of what it is like to go to war. Here the crude and visceral coexist with the tender and affectionate. The author tells of well-meaning soldiers at hospital reception, there to deliver a pair of legs in the belief that these can be reattached to their comrade, now in mid-surgery; of midsummer Christmas parties and pancake breakfasts and late-night sauna sessions; of interpersonal rivalries and banter; of caring too little or too much; of tenderness and compassion fatigue; of hell and redemption; of heroism and of playing God. While many good firsthand accounts of war by frontline soldiers exist, this is one of the first books ever to bring to life the experience of the surgical teams tasked with mending what war destroys.

My Year of the War

The 2017 National Book Critics Circle (NBCC) Finalist, International Bestseller, and a Kirkus Best Nonfiction Book of 2017! "Marsh has retired, which means he's taking a thorough inventory of his life. His reflections and recollections make Admissions an even more introspective memoir than his first, if such a thing is possible." —The New York Times "Consistently entertaining Honesty is abundantly apparent here--a quality as rare and commendable in elite surgeons as one

suspects it is in memoirists." —The Guardian "Disarmingly frank storytellinghis reflections on death and dying equal those in Atul Gawande's excellent Being Mortal." —The Economist Henry Marsh has spent a lifetime operating on the surgical frontline. There have been exhilarating highs and devastating lows, but his love for the practice of neurosurgery has never wavered. Following the publication of his celebrated New York Times bestseller Do No Harm, Marsh retired from his full-time job in England to work pro bono in Ukraine and Nepal. In Admissions he describes the difficulties of working in these troubled, impoverished countries and the further insights it has given him into the practice of medicine. Marsh also faces up to the burden of responsibility that can come with trying to reduce human suffering. Unearthing memories of his early days as a medical student, and the experiences that shaped him as a young surgeon, he explores the difficulties of a profession that deals in probabilities rather than certainties, and where the overwhelming urge to prolong life can come at a tragic cost for patients and those who love them. Reflecting on what forty years of handling the human brain has taught him, Marsh finds a different purpose in life as he approaches the end of his professional career and a fresh understanding of what matters to us all in the end.

"This is a poignant and moving narrative collection from women who each in their own way were pioneers in their field of surgery. The story of the courage, physical strength, stamina and, most of all, the mental fortitude required to complete surgical training is beautifully conveyed here. This collection will hopefully both inspire and make the path easier for the next generation of surgeons, both women and men." - Abraham Verghese, MD; best-selling author of Cutting for Stone, The Tennis Partner, and My Own Country "This book is an enthralling read. It is all too rare to hear the stories of surgeons, and

even rarer to hear those of women surgeons. Yet here they are, told straight out, fearlessly, by residents and retirees alike. The stories are by turns funny, heartbreaking, flabbergasting, infuriating, inspiring-and at times all of these at once. Each voice here is singular and fascinating. But the collective effect is overwhelmingly moving. You want to hear more." - Atul Gawande, MD; staff writer for The New Yorker; surgeon; researcher; best-selling author of Complications, The Checklist Manifesto, and Better "An inspiring compendium of stories that challenged a generation and defined an era. Being a Woman Surgeon will be the archival account of the women who dared to radically advance the world's greatest profession." - Marty Makary, MD, MPH; Johns Hopkins surgeon; New York Times best-selling author of Unaccountable "An extraordinary collection of essays written by an even more extraordinary group of women, this book offers an unparalleled view of what it is like to be a woman surgeon. It is the book that I wish I had as a medical student and that even now I find inspiring." - Pauline Chen, New York Times columnist; surgeon; author of Final Exam-A Surgeon's Reflections on Mortality "Dr. John has carefully collected an illuminating anthology of experiential writings from women surgeons. Her contributors vary in surgical specialty, years of experience, and personal situation. This rich and literate collection will prove fascinating reading for anyone interested in the world of medicine." - Carol Scott-Conner, MD, FACS; surgeon; author of A Few Small Moments Dr. Preeti R. John is a critical care surgeon who works in Baltimore, Maryland. She is triple board certified in General Surgery, Surgical Critical Care and Hospice and Palliative Medicine.

"Our Women in the War."

The Lancet

Discover the true story of two pioneering suffragette doctors who transformed modern medicine, raised standards for patient care, and shattered social expectations for women in WWI-era London. A month after war broke out in 1914, doctors Flora Murray and Louisa Garrett Anderson set out for Paris, where they opened a hospital in a luxury hotel and treated hundreds of casualties plucked from France's battlefields. Although, prior to the war, female doctors were restricted to treating women and children, Flora and Louisa's work was so successful that the British Army asked them to set up a hospital in the heart of London. Nicknamed the Suffragettes' Hospital, Endell Street soon became known for its lifesaving treatments and lively atmosphere. In No Man's Land, Wendy Moore illuminates this turbulent moment when women were, for the first time, allowed to operate on men. Their fortitude and brilliance serve as powerful reminders of what women can achieve against all odds.
