The black box is orange—and there are actually two of them. They house the cockpit voice recorder and the flight data recorder, instruments vital to airplane crash analyses. But accident investigators cannot rely on the black boxes alone. Beginning with the 1931 Fokker F-10A crash that killed legendary football coach Knute Rockne, this fascinating book provides a behind-the-scenes look at plane wreck investigations. Professor George Bibel shows how forensic experts, scientists, and engineers analyze factors like impact, debris, loading, fire patterns, metallurgy, fracture, crash testing, and human tolerances to determine why planes fall from the sky—and how the information gleaned from accident reconstruction is incorporated into aircraft design and operation to keep commercial aviation as safe as possible.

Beyond the Black Box

“Featuring short, edgy fiction on the Emerald City’s seamy underbelly . . . seedy characters, private detectives and the like from all over urban Seattle.” —Kitsap Daily News Early Seattle was a hardscrabble seaport filled with merchant sailors, longshoremen, lumberjacks, rowdy saloons, and a rough-and-tumble police force not immune to corruption and graft. Now it’s home to big businesses and a flourishing art, theatre, and club scene. Seattle’s evolution to high-finance and high-tech has simply provided even greater opportunity and reward to those who might be ethically, morally, or economically challenged (crooks, in other words). Seattle Noir features stories by G.M. Ford, Skye Moody, R. Barri Flowers, Thomas P. Hopp, Patricia Harrington, Bharti Kirchner, Kathleen Alcalá, Simon Wood, Brian Thornton, Lou Kemp, Curt Colbert, Robert Lopresti, Paul S. Piper, and Stephan Magcosta. You’ll find tales of a wealthy couple whose marriage is filled with not-so-quiet desperation; a credit card scam that goes over-limit; femmes fatales and hommes fatales; a group of mystery writers whose fiction causes friction; a Native American shaman caught in a web of secrets and tribal allegiances; sex, lies, and slippery slopes . . . “Stories that reflect Seattle’s ethnic diversity as well as tales from its rough past to its glory days of Boeing, Starbucks and Microsoft.” —Publishers Weekly “A new collection of stories all set in Seattle, with characters that break the mold. In many of the Seattle Noir stories, it’s the heroes, not the subsidiary characters, that are African-American, Native-American, Hispanic-American.” —The Seattle Times

Did you know that 'flavour of the month' originated in a marketing campaign in American ice-cream parlours in the 1940s, when a particular flavour would be specially promoted for a month at a time? And did you know that 'off the cuff' refers to the rather messy practice of writing impromptu notes on one's shirt cuff before speaking in public? These and many more idioms are explained and put into context in this second edition of the Oxford Dictionary of Idioms. This vastly entertaining dictionary takes a fresh look at the idiomatic phrases and sayings that make English such a rich and intriguing language. A major new edition, it contains entries for over 5000 idioms, including 350 new entries and over 500 new quotations. The text has been updated to include many new idioms using the findings of the Oxford English Reading Programme, the biggest language research programme in the world. The entries are supported by a wealth of illustrative quotations from a wide range of sources and periods. For example: 'Rowling has not been asleep at the wheel in the three years since the last Potter novel, and I am pleased to report that she has not confused sheer length with inspiration.' - Guardian, 2003. 'I made the speech of a lifetime. I had them tearing up the seats and rolling in the aisles.' - P.G. Woodhouse, 1940. Many entries include boxed features which give more detailed background on the idiom in question. For example, did you know that 'taken aback' was adopted from nautical terminology, and described a ship unable to move forward because of a strong headwind pressing its sails back against the mast? The text has been entirely redesigned so that it is both elegant and easy to use. Anyone interested in the quirky side of the English language will have hours of fun browsing through this fascinating and informative volume.

Ophelia Castellan will never be just another girl at Elsinore Academy. Seeing ghosts is not a skill prized in future society wives. Even when she takes her pills, the bean sidhe beckon, reminding her of a promise to her dead mother. Now, in the wake of the Headmaster's sudden death, the whole academy is in turmoil, and Ophelia can no longer ignore the fae. Especially once she starts seeing the Headmaster's ghosts—two of them—on the school grounds. Her only confidante is Dane, the Headmaster's grieving son. Yet even as she gives more of herself to him, Dane spirals toward a tragic fate—dragging Ophelia, and the rest of Elsinore, with him. You know how this story ends. Yet even in the face of certain death, Ophelia has a choice to make—and a promise to keep.

Theology was once 'queen of the sciences', the integrating centre of Christendom's conceptual universe. In our own time the very idea of systematic theology is frequently called into question, derided as an arcane and superstitious pseudo-discipline. Even within the church, it is commonly disregarded in favour of unreflective piety and pragmatism. At the same time, the southward shift in world Christianity's centre of gravity prompts crucial questions about the future form and content of theology. Within this context, *Theology and the Future* offers a case for the continuing viability of theology, exploring how it might adapt to changing circumstances, and discussing its implications for how we are to imagine and help shape our shared human future. Beginning with the question of God, this book explores what might be meant by 'the future of God', and what its implications are for Christian theology. Chapters follow on the location of theology (in global Christianity, the church and the academy) and on its sources and method. The second half of the book explores a wide variety of dimensions of the human future that theology might address and illuminate. The essays bring together a mix of specialist theologians and interdisciplinary thinkers to support the assertion that there can be no more critical endeavor to the future than understanding God and all things in relationship to him.

Historians' task has always been to make sense of the world. In an age of globalisation this task has become even more formidable. In this book some of the world's most prominent historians take stock of the new situation, reflect on its implications and offer brilliant insights into the fascinations of the new field. Two thousand historians met in Oslo, Norway in the year 2000. High on their agenda was the state of global history. Making Sense of Global History presents selected papers dealing with the status and future of global history, cultural contacts between the continents over the centuries, the manifold construction and division of time, and with the use and misuse of history worldwide. This Commemorative Volume from the 19th International Congress of the Historical Sciences contains 24 papers -- all chosen for their excellence and general appeal.
