The Blue Book of Occupational Education

Learn the procedures and skills you need to succeed as a medical assistant! Clinical Procedures for Medical Assistants, 9th

Edition provides clear, step-by-step instructions for common office procedures such as taking vital signs, collecting and processing lab specimens, preparing patients for examinations, and assisting with office surgeries. Written by expert educator Kathy Bonewit-West, this full-color edition covers the latest competencies and topics in today's medical assisting practice including emergency preparedness and the updated fecal occult blood testing procedure. The Evolve companion website includes videos of 84 procedures described in the book, preparing you to become a competent clinical medical assistant. Over 120 procedures are presented in a clear, illustrated, step-by-step format, with online videos showing 84 of the procedures in action. Chapter outlines and learning objectives prepare you for the skills and concepts you will be learning. What Would You Do? What Would You Not Do? case studies challenge you to apply your knowledge to realistic medical office situations — with a practitioner's response at the end of chapters. Putting It All Into Practice and Memories from Practicum boxes feature real medical assistants sharing personal, on-the-job experiences. Key Terms and Terminology Review help you master medical assisting terminology. Charting examples help you understand the process for charting your own procedures. Patient Teaching boxes prepare you for effective communication, with detailed instructions on how to answer questions and how to explain medical concepts and procedures. Student resources on the Evolve companion website offer a fun way to practice your medical assisting knowledge with animations, games such as Quiz Show and Road to Recovery, drag-and-drop exercises, Apply Your Knowledge exercises, matching exercises, and other interactive activities (blood pressure readings, determining height and weight, drawing up medication), as well as all video procedures and practicum activities. UPDATED fecal occult blood testing procedure includes new video demonstrating this procedure. UPDATED examples of medical assistants using an EHR are demonstrated in the video procedures, showing the use of electronic charting. Updated venipuncture photos show how to perform venipuncture. UPDATED content also includes topics such as the medical record, including HIPAA, electronic medical records, and advanced directives; emergency preparedness; the use of computer technology; medical asepsis; AIDS & hepatitis; latex glove allergies & non-latex gloves; vital signs including temporal artery thermometer, pulse oximetry, and the significance of pulse pressure; pediatrics including immunization information and IM injection theory; the colonoscopy; IV therapy; and the latest CLIA waived tests. All 84 procedure videos are now available on the Evolve companion website for convenient viewing

Clinical Procedures for Medical Assistants - E-Book

Pathophysiology for Medical and Allied Students

The book is written system wise. The theme includes the way alterations are produced in normal physiology by disease, leading to the generation of symptoms and signs. This approach is expected to help the student appreciate the role of basic sciences in understanding the pathophysiology of disease. Simple flow charts and diagrams are used to explain the text. For each chapter there is a Short Questions-Answers module which offers explanation to the questions raised in the text. The book has been treated keeping in view the environmental and socio economic factors that control lives in India. There has been no attempt to deal with every mundane subject in the field of physiology. In each chapter only certain aspects of the subject have been dealt with. The areas chosen are generally found interesting by most students. Two chapters namely Circadian Rhythms and Pathophysiology of Stress, and Pathophysiology of Thermoregulatory Disorders are new innovations.

The aim of the book is to enthuse the student into thinking in “Clinical terms” using basic sciences as back drop and to conceptualize and derive conclusions rather than memorize facts.

2005 Higher Education Directory

Praise for the previous edition: "This comprehensive multi-authored text contains over 450 pages of highly specific and well-documented information that will be interest to physicians in private practice, academics, and in medical management. . . [Chapters are] readable, concise yet complete, and well developed. I could have used a book like this in the past, I will certainly refer to it frequently now." 4 stars Carol EH Scott-Conner, MD, PhD, MBA American College of Physician Executives

Does Health 2.0 enhance or detract from traditional medical care delivery, and can private practice business models survive? How does transparent business information and reimbursement data impact the modern competitive healthcare scene? How are medical practices, clinics, and physicians evolving as a result of rapid health- and non-health-related technology change? Does transparent quality information affect the private practice ecosystem? Answering these questions and more, this newly updated and revised edition is an essential tool for doctors, nurses, and healthcare administrators; management and business consultants; accountants; and medical, dental, business, and healthcare administration graduate and doctoral students. Written in plain language using nontechnical jargon, the text presents a progressive discussion of management and operation strategies. It incorporates prose, news reports, and regulatory and academic perspectives with Health 2.0 examples, and blog and internet links, as well as charts, tables, diagrams, and Web site references, resulting in an all-encompassing resource. It integrates various medical practice business disciplines-from finance and economics to marketing to the strategic management sciences-to improve patient outcomes and achieve best practices in the healthcare administration field. With contributions by a world-class team of expert authors, the third edition covers brand-new information, including: The impact of Web 2.0 technologies on the healthcare industry Internal office controls for preventing fraud and abuse Physician compensation with pay-for-performance trend analysis Healthcare marketing, advertising, CRM, and public relations eMRs, mobile IT systems, medical devices, and cloud computing and much more!
