An Outline of the History of Economic Thought

A Brief Outline of the History of Libraries

This book provides a comprehensive and analytical overview of the development of economic theory from its beginnings, at the end of the Middle Ages, up to contemporary contributions. Traditional theories are presented as living matter, and modern theories are presented as part of a historical process and not as established truths. In this way, the book avoids the dangerous dichotomy between pure historians of thought who dedicate themselves exclusively to studying facts, and pure theorists who are interested in the evolution of the logical structure of theories. The second edition contains several changes and additions. The authors give due consideration to the "civil economy" perspective developed during Humanism and the Renaissance. The section on Adam Smith has been considerably extended and improved. The treatment of the post-keynesian approach has been separated from "new keynesian macroeconomics". Finally, a new chapter has been added to review the most recent developments in the economic discourse in the light of globalization and the new technological trajectory.

Syria (which in its historical wider sense includes modern Syria, Lebanon, Israel/Palestine and Jordan) has always been at the centre of events of world importance. It was in this region that pastoral-stock rearing, settled agriculture and alphabetic writing were invented (and the dog domesticated). From Syria, Phoenician explorers set out to explore the whole Mediterranean region and sailed round Africa 2,000 years before Vasco de Gama. These are achievements enough but the succeeding centuries offer a rich tapestry of turbulent change, a cycle of repeated conquest, unification, rebellion and division. John D Grainger gives a sweeping overview (though replete with telling details) of the making of this historical region. From the end of the ice age through the procession of Assyrian, Phoenician, Persian, Greek, Roman, Arab, Turkish, French and British attempts to dominate this area, the key events and

influences are clearly explained and analysed. The events playing out on our TV screens over recent years are put in the context of 12,000 years of history.

An Outline of the History of the Literature of the Old Testament

The book has a wide coverage and studies all the famous writers of English literature in the field of poetry, fiction, essay etc. The writers covered, among others, include Geoffrey Chaucer, William Shakespeare, Samuel John Milton, John Dryden, Alexander Pope, Samuel Johnson, William Wordsworth and Alfred Tennyson. A special feature of the book is that studies writers and their contributions not in isolation but in the context of surroundings and various elements of civilisation of the age of the writer. Thus it suggests a vital relationship between English literature and English life. The book is written in a simple and lucid style. It will be found of great interest by the students of English Literature, researchers and the general readers.

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written - and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout

stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing

The Outline of History

No book is provoking a more animated discussion among students of the social sciences at the present time than H. G. Wells' Outline of History. The author's task, as he himself sets it, is to tell, "truly and clearly, in one continuous narrative, the whole story of life and mankind so far as it is known today." But while these two volumes are plainly for the general reader rather than for the special student of history, it does not follow that they contain nothing beyond an endless parade of names and dates. Their chief value, indeed, is in the author's interpretation of what he writes about. Events are appraised and men are weighed in the balance as he goes along. Historians in general will not agree with some of these appraisals, nor will they credit Mr. Wells with an approach to infallibility in his judgment of the men who flit across his pages; but his estimates of the relative value of facts and forces can scarcely be brushed aside because they do not command general indorsement. On some matters, unhappily, Mr. Wells has allowed his iconoclastic proclivities to run away with him. Napoleon I, for example, cannot be disposed of as a second-grade "pestilence" because "he killed fewer people than the influenza epidemic of 1918" (II, p. 384); nor will the world believe, so long as it retains its senses, that Napoleon III was " a much more intelligent man" than his uncle (II, p. 438). Even the pinchbeck himself would have rebuked this insinuation. But when all is said, these two stout volumes embody a remarkable achievement. They contain astonishingly few historical inaccuracies of

the customary type. The author's advisers, and a competent galaxy of scholars they are, have kept him clear of the pitfalls. The style is terse and forceful. Mr. Wells certainly has the gift of cogent exposition.

An Outline of American History

'Outline of U.S. History' is a publication of the U.S. Department of State. The first edition (1949-50) was produced under the editorship of Francis Whitney, first of the State Department Office of International Information and later of the U.S. Information Agency. Richard Hofstadter, professor of history at Columbia University, and Wood Gray, professor of American history at The George Washington University, served as academic consultants. D. Steven Endsley of Berkeley, California, prepared additional material. It has been updated and revised extensively over the years by, among others, Keith W. Olsen, professor of American history at the University of Maryland, and Nathan Glick, writer and former editor of the USIA journal, Dialogue. Alan Winkler, professor of history at Miami University (Ohio), wrote the post-World War II chapters for previous editions. This new edition has been completely revised and updated by Alonzo L. Hamby, Distinguished Professor of History at Ohio University. Professor Hamby has written extensively

Coming right after the carnage of World War I, this title was neither unduly pessimistic and cynical about the human condition nor Pollyannaish about humanity's future. Instead, it offered an account of the development of the world's civilizations up to the present, showing that an enlightened future depended on an unprejudiced view of the past.

This book presents the syllabus of Hu Shih's course on the History of Chinese Thought, which he taught at Harvard University from 1944 to 1945, and has been transcribed from his (more than 1500) hand-written notes. This book focuses on Hu Shih's in-depth study and interpretation of Chinese intellectual history and philosophy, etc. It also distills the development of China's long and complex intellectual history over the past 3,000 years into a clear and succinct outline. Transcribing, collating and publishing this valuable hand-written manuscript for the first time, the book represents a truly unique historical document.

Metaphysics

Metaphysics, in its classical version, deals with the basic understanding of reality i.e. things as concretely existing; it tries to give the answers to the following questions: What is being? Which are the transcendental proprieties of being and how to understand them? What is the structure of being, founding the problem of the causes and casuality as such? How to understand the analogy of being and connected with it the analogy of knowledge, in the ultimate perspective of the existence of God? The

solutions of these problems go through the understanding of the interpretations of being given by Aristotle, St. Thomas Aquinas and modern thinkers.
