Author Terry Martin's thirty years of teaching anatomy and physiology courses, authorship of three laboratory manuals, and active involvement in the Human Anatomy and Physiology Society (HAPS) drove his determination to create a lab manual with an innovative approach that would benefit students. Laboratory Manual for Human Anatomy and Physiology 2/e includes a cat version, fetal pig version and a rat version. Each of these versions includes sixty-one laboratory exercises, supplemental labs found online, and six cat, fetal pig, or rat dissection labs. The Main Version contains no dissection exercises. All four versions are written to work well with any anatomy and physiology text.

Fundamentals of Anatomy and Physiology

This extensively updated manual is designed for an elementary course in vertebrate biology, and will also complement a variety of courses in general biology, zoology, or basic anatomy.

Human Anatomy and Physiology Laboratory Manual, Fetal Pig Version

The study of human anatomy and physiology really comes to life in the anatomy and physiology laboratory, where students get hands-on experience with human cadavers and bones, classroom models, preserved and fresh animal organs, histology slides of human tissues, and learn the process of scientific discovery through physiology experimentation. This lab manual is intended to provide students with tools to make the subject matter more relevant to their own bodies and to the world around them. It is an interactive workbook for students: a 'how-to' guide to learning human anatomy and physiology through touch, dissection, observation, experimentation, and critical thinking exercises. Chapter 28 is unique to this Fetal Pig Version of the Lab Manual and contains 16 exercises designed to walk students through dissection and identification of all systems and structures of the fetal pig, beginning with the skeletal system and progressing through all systems.
