The Practice of Contemplative Photography

Drawing from his extensive business management experience, Pradip Chand turns traditional wisdom on its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what can companies do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in today's high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.

Histories of the Borneo Environment

Looks at what life was like for those who were not on an expedition, including Viking houses and farms, the roles of men and women, slavery, and what Viking feasts were like.

Full-Filled

The Chinese are inordinately proud of having invented, among a whole host of other things, the compass (without which the world would have got lost), paper (without which books would not exist), the printing press (ditto), porcelain (no

pretty matching chinaware), silk (no decadence), pasta (what would the Italians eat?), the wheelbarrow (how would civilisation have fared without it?) and the bristle toothbrush. A guide to understanding the Chinese which dispels or confirms preconceived prejudices with humor and insight.

Our Working-girls and how to Help Them

Just a Spoon Full of Laughter is a great read for anyone that's been to a doctor's office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. "The funniest book I ever read." Says Dr. Zhivago "Yes! Yes! Yes!" Says Dr. No

Makers of American Machinist's Tools

In light of the tremendous changes that have come to the island of Borneo in recent decades, this volume takes a detailed historical look at the Borneo environment from native, colonial and national perspectives. It examines change and continuity in the economic, political and social dimensions of human-environment interactions. Reflecting the increasingly multidisciplinary nature of environmental history, the book brings together an international group of historians, anthropologists, geographers and social foresters, all looking through a historical lens at the environment in the Malaysian states of Sabah and Sarawak, and the Indonesian province of Kalimantan and Brunei. Drawing on extensive archival research and fieldwork, these ten original contributions encompass eleven centuries of history on Borneo, examining interrelated topics that include long-distance trade, conservation, land tenure, resource access, property rights, perceptions of the environment, migration, and development policy and practice. The chapters in this volume are extensively revised versions of selected papers presented at an international seminar on "Environmental change in native and colonial histories of Borneo: Lessons from the past, prospects for the future" held in Leiden under the auspices of the International Institute for Asian Studies.

Minecraft Annual 2014

Looking and Seeing is an introduction to Nalanda Miksang. A combination of a philosophical treatise and a playful photography manual, this first volume of three

starts the journey. Through studying looking and seeing, flash of perception, and synchronization, we explore structured assignments to free the eyes and mind through contemplative photography.

This book is for those who want to get their laser printer up and running fast while

saving money. The author covers all of today's laser and LED printers, giving readers the practical information and guidance they need to perform their own repairs. Step-by-step troubleshooting flowcharts make it easy to identify the cause of particular problems and perform necessary repairs.

USS Relentless

This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored . The first part starts from the “old” growth theory and bridges to the “new” growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

This isn't about what foods you should and shouldn't eat (although Renée does share some of her favorite recipes to make weight loss happen faster and easier). *Full-Filled* is filled with personal success stories and a whole bag of transformative tips

and tricks, Full- Filled will set you up for significant weight loss and provide the no-fail techniques for keeping the pounds off permanently.

The Black Bible of Science (Compilation)

This remarkable book provides a portrait of the lesser-known peoples of Sarawak, New Zealand: the Land Dayaks. Written by an anthropologist who came to know these people during a two-year stay in their remote village, the study--introduced by a folktale imparted to the author by the leading spirit-medium in the village--is a masterly analysis based on sound anthropological techniques and informed with understanding, affections, and humor. Geddes describes the life of the Land Dayaks--their traditions, beliefs, and their attitudes toward things around them--and reveals not only their differences from, but also their similarities to the greater world of humanity outside their community. Originally published in 1957, this study has lost none of its freshness or fascination.

This book teaches photographers how to connect fully with the visual richness present in their ordinary, daily experiences. According To The authors, photography is not purely a mechanical process. You need to know how to look, As

well as where to point the camera, and when to press the button. Then as you develop your ability to see, your appreciation and inspiration from the world around you become enhanced. Filled with practical exercises and techniques inspired by mindfulness meditation, this book teaches photographers how to "see what's in front of them". It offers a system of training and exercises that draw upon Buddhist concepts, As well as on insights of great photographic masters such as Alfred Stieglitz, Edward Weston, and Henri Cartier-Bresson. There is a series of visual exercises and assignments for working with texture, light, and colour, As well as for developing mindfulness, As a way of bringing the principles of contemplative photography into ordinary experience.

Digital Label and Package Printing: Terminology, Technology, Materials, Management and Performance

In the twenty-fourth chapter of Genesis a beautiful young woman offers assistance to a weary traveler and his camels, and out of that simple action, a marriage results—a marriage that offers profound lessons to couples today. Bible scholar and renowned speaker Ravi Zacharias draws five points critical to the long-lasting success of every marriage from the biblical story of the marriage of Isaac and Rebekah. "Real love folds together both the emotions and the will," writes Zacharias. "Without the emotions, marriage is a drudgery; without the will, it is a

mockery." Building upon that foundational truth, Zacharias goes on to explain the principles of seeking the counsel of others when finding a mate, cherishing your partner, remaining pure, becoming a man or woman of prayer, and, finally, risking everything in a relationship in order to experience God's ideal for love. Couples everywhere, from those about to be married, to those who have been married for decades, will draw strength and wisdom for the journey of marriage as they learn from Ravi what it means to move from romance to lasting love.

The Xenophobe's Guide to the Chinese

Perhaps the most far reaching of the many changes wrought on the military by the First World War was the mechanization of the armed services. After many

centuries of use by the Army for patrols and communications, the trusty horse was finally supplanted by the new-fangled motorcycle. This mechanization process gathered pace during the interwar years and in particular for the military motorcycle between 1925 and 1939. By the outbreak of the Second World War the motorcycle had become an important part of the military inventory and deemed 'suitable for WD (War Department) requirements'. When it was first published in 1995, this fully illustrated book was unique in looking at all military motorcycles of British origin known to have been tested mainly by the Mechanical Warfare Experimental Establishment (later called the Mechanisation Experimental Establishment). Ten years on, the authors are producing a fully revised and updated new edition of their book that will include three new chapters covering standard parts, bike markings and paint schemes. There will also be a picture spread that illustrates despatch rider's clothing. New to this edition will be a 16pp colour section that will illustrate restored WD bikes, including detail shots of engines and components.

“Lorraine Heath’s books are always magic.” —Cathy Maxwell With Passions of a Wicked Earl, USA Today and New York Times bestseller Lorraine Heath kicks off a new series of delightfully sinful historical romance novels featuring “London’s Greatest Lovers.” The first romantic adventure involving the titled and rakish sons

of a scandalous Dowager Duchess and their tales of passion, pleasure, and love, Passions of a Wicked Earl concerns the innocent and unfairly disgraced young wife of the first brother and her brazen attempts to win back the dashing rogue's heart...by any means necessary!

The Insolent Chariots

This reimagining of the Robin Hood legend tells the story of the young boy behind the bandit hero's rise to fame. Will Shackley is the son of a lord, and though just thirteen, he's led a charmed, protected life and is the heir to Shackley House, while his father is away on the Third Crusade with King Richard the Lionheart. But with King Richard's absence, the winds of treason are blowing across England, and soon Shackley House becomes caught up in a dangerous power struggle that drives Will out of the only home he's ever known. Alone, he flees into the dangerous Sherwood Forest, where he joins an elusive gang of bandits readers will immediately recognize. How Will helps a drunkard named Rob become one of the most feared and revered criminals in history is a swashbuckling ride perfect for anyone who loves heroes, villains, and adventure.

Cindy Bentley: Spirit of a Champion celebrates the life of one of Wisconsin's most inspirational leaders and activists. Born with an intellectual disability as the result of fetal alcohol syndrome, Cindy Bentley spent much of her childhood at the Southern Wisconsin Center for the Developmentally Disabled. No one expected her to learn the skills necessary to live on her own. To everyone's surprise, including her own, she did that and much more. With the encouragement of a teacher at Southern Center, Cindy realized she had a deep passion for sports, and the discipline to train and compete. She began participating in Special Olympics, and gained confidence as she worked with teammates to earn medals in tennis, track and field, and even snowshoeing. Chosen as a Global Messenger for the Special Olympics International in 2000, Cindy has had dinner at the White House with two different American presidents, traveled around the world, and given speeches in front of thousands of people. In these pages, young readers will learn what gives Cindy her champion spirit, and why she gave away some of her gold medals. Today, Cindy is still competing in Special Olympics. She also continues to advocate for people with disabilities, and helped to start People First, a statewide organization that encourages those with disabilities to speak up for their rights.

A trace element (TE) is a chemical element presented below ~ 0.1 wt. % and required in minute quantities to maintain proper physical functioning. TE analysis

in clinical samples (plasma, urine, cerebro-spinal fluid, full-term placenta, hair, nails, buccal mucosa, semen, biopsy specimens) has received increasing attention. Based on 62 sources, current effort presents comparative knowledge about the attempts to accurately trace TE in clinical samples through Vis/NIR, PIXE, TXRF, GFAAS, ICP-MS. It informs the need for further research adjustments to reveal the reciprocal states of certain TE (Cu/Zn, Ca/Mg, Fe/ Pb) in correlation with their real-time counts in both maternal and neonatal umbilical cord plasma, and in relation to augmented oxidative stress. This would help to achieve consistency in interpreting obstetrical complications (preeclampsia, prematurity, or gestational diabetes). Generated hypotheses should target plausible mechanisms behind TE alterations and their stage-sensitive measures in gynecological cancer. New prospects are discussed in management and prognosis of endometriosis and premature ovarian failure (POF).

Building Bamboo Fences

Rantoul and the former Chanute Air Force Base are inseparably intertwined as primary players in a single historical narrative. Rantoul was first founded as an agriculturally based community in 1848 near an area known as Mink Grove. The settlement boomed with the coming of the Illinois Central Railroad in 1854; a railroad championed by the town's namesake, Robert Rantoul Jr. Disaster followed in 1899 and again in 1901 with devastating fires. Then, in 1917, a U.S. Army flying field was built on the outskirts of Rantoul. Named after the aviation pioneer Octave Chanute, Chanute Field, later Chanute Air Force Base, became a premier technical training facility. A mutually beneficial relationship quickly developed between these civilian and military establishments that would last for over 75 years. Chanute Air Force Base closed in 1993, ushering in yet another new era for the village of Rantoul.

A saga of the US Navy from the Barbary War of 1803 through the War of 1812. In 1803, a young man joins the crew of what will become the most famous frigate of the early US Navy - USS Constitution. From the sands of North Africa during the first Barbary War, across the aquamarine waters of the Caribbean, we follow the exploits of a young American seaman, Alain de Noux. At the outbreak of the War of 1812, Captain de Noux takes the ship he personally designed to sea to fight the mightiest navy in the world - Britain's Royal Navy. USS Relentless is the newest, largest, fastest frigate in the world, her hull coated in resin that allows her to fly across the waves, her radically-designed sails and special chute-sail that acts as a spinnaker pulls the big frigate along at nearly eighteen knots. Armed with weapons far in advance of its time - steel cannons with rifled barrels that propel shells farther than any cannon on any ship, along with special binoculars that aid lookouts to see at night, USS Relentless is a most lethal ship. The ship also carries high caliber shells that explode on contact and special carcass rounds filled with white phosphorous, consuming any ship it strikes in flames. USS Relentless challenges all ships, including the huge British ships-of-the-line, contemporary battleships. Terrorizing the Atlantic for months, Relentless is sent on a more important mission, a mission with no return ticket. She will fly the American flag into combat for the first time across the Indian Ocean, attacking the fat merchant ships of Britain's lucrative East India Company. America does not have the means to invade Britain, but USS Relentless can disrupt her most profitable trade routes. Alain finds success in war and finally meets the woman that will change his world,

if only for a short time. In his heart, he knows he will die a young man. It is a race. How many ships can the great raider destroy or capture before the Royal Navy's fleet can destroy her? Along the shoals of the Laccadive Islands, In what the world will call The Battle of the Arabian Sea, USS Relentless must fight an entire fleet in order for Alain to get back to the love of his life.

A simplified approach to applying the Finite Element Method to geotechnical

problems Predicting soil behavior by constitutive equations that are based on experimental findings and embodied in numerical methods, such as the finite element method, is a significant aspect of soil mechanics. Engineers are able to solve a wide range of geotechnical engineering problems, especially inherently complex ones that resist traditional analysis. Applied Soil Mechanics with ABAQUS® Applications provides civil engineering students and practitioners with a simple, basic introduction to applying the finite element method to soil mechanics problems. Accessible to someone with little background in soil mechanics and finite element analysis, Applied Soil Mechanics with ABAQUS® Applications explains the basic concepts of soil mechanics and then prepares the reader for solving geotechnical engineering problems using both traditional engineering solutions and the more versatile, finite element solutions. Topics covered include: Properties of Soil Elasticity and Plasticity Stresses in Soil Consolidation Shear Strength of Soil Shallow Foundations Lateral Earth Pressure and Retaining Walls Piles and Pile Groups Seepage Taking a unique approach, the author describes the general soil mechanics for each topic, shows traditional applications of these principles with longhand solutions, and then presents finite element solutions for the same applications, comparing both. The book is prepared with ABAQUS® software applications to enable a range of readers to experiment firsthand with the principles described in the book (the software application files are available under "student resources" at www.wiley.com/college/helwany). By presenting both the traditional solutions alongside the FEM solutions, Applied Soil Mechanics with

ABAQUS® Applications is an ideal introduction to traditional soil mechanics and a guide to alternative solutions and emergent methods. Dr. Helwany also has an online course based on the book available at www.geomilwaukee.com.
