Doing Anthropology in Consumer Research is the essential guide to the theory and practice of conducting ethnographic research in consumer environments. Patricia Sunderland and Rita Denny argue that, while the recent explosion in the use of “ethnography” in the corporate world has provided unprecedented opportunities for anthropologists and other qualitative researchers, this popularization too often results in shallow understandings of culture, divorcing ethnography it from its foundations. In response, they reframe the field by re-attaching ethnography to

theoretically robust and methodologically rigorous cultural analysis. The engrossing text draws on decades of the authors' own eclectic research—from coffee in Bangkok and boredom in New Zealand to computing in the United States—using methodologies from focus groups and rapid appraisal to semiotics and visual ethnography. Five provocative forewords by leaders in consumer research further push the boundaries of the field and challenge the boundaries of academic and applied work. In addition to reorienting the field for academics and practitioners, this book is an ideal text for students, who are increasingly likely to both study and work in corporate environments.

competitors, Losing the Signal unveils the remarkable rise of a company that started above a bagel store in Ontario. At the heart of the story is an unlikely partnership between a visionary engineer, Mike Lazaridis, and an abrasive Harvard Business school grad, Jim Balsillie. Together, they engineered a pioneering pocket email device that became the tool of choice for presidents and CEOs. The partnership enjoyed only a brief moment on top of the world, however. At the very moment BlackBerry was ranked the world's fastest growing company internal feuds and chaotic growth crippled the company as it faced its gravest test: Apple and Google's entry in to mobile phones. Expertly told by acclaimed journalists, Jacquie McNish and Sean Silcoff, this is an entertaining, whirlwind narrative that goes behind the scenes to reveal one of the most compelling business stories of the new century.

A page-turning narrative about Marissa Mayer's efforts to remake Yahoo as well as her own rise from Stanford University undergrad to CEO of a \$30 billion corporation by the age of 38. When Yahoo hired star Google executive Mayer to be its CEO in 2012 employees rejoiced. They put posters on the walls throughout Yahoo's California headquarters. On them there was Mayer's face and one word: HOPE. But one year later, Mayer sat in front of those same employees in a huge cafeteria on Yahoo's campus and took the beating of her life. Her hair wet and her tone defensive, Mayer read and answered a series of employee-posed questions challenging the basic elements of her plan. There was anger in the room and, behind it, a question: Was Mayer actually going to be able to do this thing?

MARISSA MAYER AND THE FIGHT TO SAVE YAHOO! is the inside story of how Yahoo got into such awful shape in the first place, Marissa Mayer's controversial rise at Google, and her desperate fight to save an Internet icon. In August 2011 hedge fund billionaire Daniel Loeb took a long look at Yahoo and decided to go to war with its management and board of directors. Loeb then bought a 5% stake and began a shareholder activist campaign that would cost the jobs of three CEOs before he finally settled on Google's golden girl Mayer to unlock the value lurking in the company. As Mayer began to remake Yahoo from a content company to a tech company, an internal civil war erupted. In author Nicholas Carlson's capable

hands, this riveting book captures Mayer's rise and Yahoo's missteps as a dramatic illustration of what it takes to grab the brass ring in Silicon Valley. And it reveals whether it is possible for a big lumbering tech company to stay relevant in today's rapidly changing business landscape.
