This book portrays a modern epic - of an army that sailed across the world to fight a war. Its struggle with the Kaiserreich (German empire) became the most formidable campaign Australian troops have ever fought. By the time Monash's soldiers broke through the Hindenburg Line, their achievement and its cost were staggering. This epic was created by normal Australians, and is understandable to normal Australians. Here, you won't need expertise in military terminology. But to appreciate the titanic conflict the Diggers had entered, you'll find a clear picture of the Great War - its key issues and extraordinary events. Before this book was written Australians could not get, in one concise volume, the two interwoven sagas - of Australia's epic and the Great War itself. That's what this lively and vigorous book offers. It draws on the sources of thirteen countries to present as many good unknowns (women, men and fascinating situations) as it does big leaders, events, generals and battles. In debate it's not shackled to old predictables, and while mindful of general readers, it relies throughout on sound scholarship. For good measure, it bombards a few fallacies and their well-overdue authors.

Fighting the Kaiserreich

CMH 60-14. Army Lineage Series. Traces the evolution of divisions and brigades in the United States Army. Gives a systematic account of the way these two organizations evolved, highlighting the rationales behind that evolution and the many factors that played a part in bringing those changes into reality. L.C. card 94-21031.

The First Team

In this, his last work which was completed shortly before he died, Trevor Pidgeon reconstructs the tank actions that took place between late September and November on the Somme. His account gives insight into the experiences of the tank crews, as they maneuvered their crude, vulnerable and unreliable machines towards the enemy.

This book presents five sieges--Jerusalem, Malta, Sebastopol, Kut-al-Amara, and Singapore--for detailed analysis. The author utilizes the methodology developed by John Keegan to define sieges as a form of battle and to explore the "categories of combat"--those relationships of men versus weapons and the commitment to battle on the part of the contestants--which determine the outcome of battles and wars. Watson's unique study is a contribution to the study of siege warfare and

provides a background for understanding Dien Bien Phu and the Gulf War, as well as contemporary global conflict.

SCRAMBLE! In a couple of minutes my wingman and I would be airborne on another adventure. Sometimes we intercepted an airliner, sometimes a misplaced B-52 bomber, and sometimes Russian bombers probing our defenses; Russian warships; MIG fighters; or troops in contact in Vietnam, calling for napalm only yards from their positions. Twice it was UFOs - Unidentified Flying Objects! This book is a series of short stories, supported by more than 90 photographs. The first part has my own stories; later stories were contributed by my fellow pilots. The last story is from WW II of our P-38 fighters attacking the Romanian oil fields and getting badly mauled by defending Romanian fighters - and a Romanian pilot's view of the battle! Only the spirit of attack borne in a brave heart will bring success to any fighter aircraft, to matter how highly developed the aircraft may be. That quote from Adolf Galland, an Ace of the German Luftwaffe in WW II, was the motto of our 317th Fighter Interceptor Squadron in Alaska. The fighter pilot is a hunter, and his quarry is the most dangerous in the world - men who want to kill him! The best defense is a good offense - ATTACK! The US Air Force had a program called Every Man a Tiger. A tiger does not kill impulsively or in anger, but plans his attack carefully and strikes with cool ferocity. We were tigers! Fighter pilots tell stories around the bar, but they seldom write them down. These stories were written by the fighter pilots themselves! Come with me and hear of the beauty of flight, the mortal danger of electrical power failure at night in a snowstorm, and the thrill of attack with 20mm cannons firing right under your feet!

Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called the "first team" - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in paperback for the first time to reach an even larger audience.

Whitaker's Books in Print

Originally published in 1970 and out of print for nearly thirty years, this book has already earned its place as a classic of submarine history by an author with an international reputation for being second-to-none in evoking the claustrophobic horror of war beneath the waves. Accurate in detail, yet written with humanity and humour, it tells the story of Britain's pioneer submarines during the 1914-1918 War during which their crews battled courageously in atrocious conditions against a skilled and ruthless enemy and an equally unforgiving sea. 2001 marks the centenary of Britain's Submarine Service introduced into the Royal Navy in the face of opposition from virtually every flag officer in the fleet. The dedicated enthusiasts who made up their crews were derided as members of The Trade but they fought the Edwardian Naval Establishment as fiercely as they were later to fight the enemy; And Victory was their reward on both occasions. Freshly illustrated, this
