A Design Guide for Improving Residential Security

CCTV for Security Professionals provides the information necessary to design the ideal CCTV system. The chapters are stand-alone sources of information on their subjects and are presented in logical sequence to guide the reader from basic principles to more complex for a complete system understanding. In his straight-forward and informative text, Alan Matchett approaches the camera systems from the user's point of view, providing the security manager with the knowledge to discuss the system, its desired features, and the areas of design concern within the context of an organization's business model. This can prove to be invaluable when evaluating an existing system, the use and components of a given system, or in evaluating a system design proposed by a vendor. Installers and service personnel will benefit from the functions and possibilities that are available with the various components and by gaining an understanding of their customers' needs. Newer technicians will learn how to set up the system properly, and can familiarize themselves with the technologies that go into a CCTV system. Security equipment sales personnel will also gain a better knowledge of the customer's needs as well as learn to determine exactly what questions they should be asking the customer and what the customer's responses mean. In this manner, the book will offer invaluable tips to ensure customers get exactly what they expect in a system. * Provides a detailed explanation of CCTV components and the technology behind analog and digital CCTV systems. * Establishes a "common language" for security professionals, CCTV system designers and sales personnel to use as a basis for system design. * Provides a clear explanation of the design process and design principles.

The Teacher's Guide To Spying

Society demands a world that is truly safe and secure for all children to be born and raised into! All pedophiles are lobotomized the first time they offend! All runaway parents are found through national registries and forced to support their abandoned children! All females are sterilized at the age of eight years old! The Catholic Church endorses the national policy of sterilization! All females are tagged on their skin with their medical records as proof of sterilization. Any female adult found in noncompliance is hunted down and physically forced to comply! Any and all supporters of non- compliance are harshly dealt with. Reversal of sterilization is only possible after a lengthy peer review to determine applicants worth eligibility to physically have, care and provide for a child. Constant monitoring is part of their acceptance for the procedure. Every new request for pregnancy requires a new review for eligibility, having passed once does not automatically ensure future allowed pregnancies. All this and more ensures a better society where the needs and rights of a child are placed before those of any adult.
