### **CEH V9**

CEH can be said as a certified ethical hacker. This certification is a professional certificate and it is awarded by the EC council (international council of E-commerce consultant). An ethical hacker is a name that is given to penetration testing/ tester. An ethical hacker is employed by the organization with full trust with the employer (ethical hacker) for attempting the penetrating the computer system in order to find and fix all the computer security vulnerabilities. Computer security vulnerabilities also include illegal hacking (gaining authorization to some other computer systems). These activities are criminal activities in almost all countries. Doing a penetrating test in a particular system with the permission of the owner is done and also possible except in Germany. This certification validates the knowledge and skills that are required on how to look for the vulnerabilities as well as weaknesses in a particular computer.

### **CompTIA Security+ Certification Study Guide, Third Edition (Exam SY0-501)**

The CEH is one of the premium certifications for those looking to get into penetration testing as well as those in the security and IT fields looking to improve their skills. With the CEHv10 EC Council has raised the bar and added new material and objectives that reflect the changing nature of the security industry. In this book there are 19 chapters covering penetration testing from the ground up. Included is a lot of hands on examples that you can practice with both Kali Linux and with the Microsoft Windows platform. In addition to the book the author will be making a free question bank available online that will be updated with the latest

questions and information to reflect the inevitable adjustments that will appear as the exam evolves through its lifecycle. Get your journey started today!!!
