The Basics of American Government is a collaborative effort among eight current and one former faculty members in the Departments of Political Science and Criminal Justice at University of North Georgia. The purpose of this book is to offer a no-frills, low-cost, yet comprehensive overview of the American political system for students taking introductory courses in

American national government. Furthermore, the work combines the best aspects of both a traditional textbook and a reader in that most chapters offer a piece of original scholarship as a case study to bolster or reinforce the material presented in the chapter. In addition, many chapters present a civic engagement-type exercise and discussion questions intended to challenge, engage, and foster student participation in the political system. The authors undertook this project for several reasons, most notably the high costs of textbooks for students and the lack of college-level scholarship found in most American Government texts. This 375-page, peer-reviewed, edited book that combines traditional material with original scholarship will cost students \$27.99, well below market standards. All of the authors are experienced classroom instructors, subject matter experts, and published researchers in the field of American politics.

Can social studies classrooms be effective "makers" of citizens if much of what occurs in these classrooms does little to prepare young people to participate in the civic and political life of our democracy? *Making Citizens* illustrates how social studies can recapture its civic purpose through an approach that incorporates meaningful civic learning into middle and high school classrooms. The book explains why social studies teachers, particularly those working in diverse and urban areas, should infuse civic education into their teaching, and outlines how this can be done effectively. Directed at both pre-service and in-service social studies teachers and designed for easy integration into social studies methods courses, this book follows students and teachers in social studies classrooms as they experience a new approach to the traditional, history-oriented social studies curriculum, using themes, essential questions, discussion, writing, current events and action research to explore enduring civic questions. Following the experiences of three teachers working at three diverse high schools, Beth C. Rubin considers how social studies classrooms might become places where young people study, ponder, discuss and write about relevant civic questions while they learn history. She draws upon the latest sociocultural theories on youth civic identity development to describe a field-tested approach to civic education that takes into consideration the classroom and curricular constraints faced by new teachers.

Eclipses have long been seen as important celestial phenomena, whether as omens affecting the future of kingdoms, or as useful astronomical events to help in deriving essential parameters for theories of the motion of the moon and sun. This is the first book to collect together all presently known records of timed eclipse observations and predictions from antiquity to the time of the invention of the telescope. In addition to cataloguing and assessing the accuracy of the various records, which come from regions as diverse as Ancient Mesopotamia, China, and Europe, the sources in which they are found are described in detail. Related questions such as what type of clocks were used to time the observations, how the eclipse predictions were made, and how these prediction schemes were derived from the available observations are also considered. The results of this investigation have important consequences for how we understand the relationship between observation and theory in early science and the role of astronomy in early cultures, and will be of interest to historians of science, astronomers, and ancient and medieval historians.

Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€"which includes all

primary caregivers are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Civic Unrest discusses the different reasons for and methods of revolution, while offering young readers the opportunity to learn about the structure of the U.S. government and how the elements within the U.S. Constitution were decided upon by the Founding Fathers. Activities use elements of history, civics, and mathematics to interpret data, create maps, and debate issues. These enrich learning and encourage students to ask questions, make inferences, and draw conclusions while allowing for a hands-on immersion in the complex elements of civic unrest and democracies. Civic Unrest: Investigate the Struggle for Social Change meets Common Core State Standards for literacy in history and social studies; Guided Reading Levels and Lexile measurements indicate grade level and text complexity.

Our American Government textbook adheres to the scope and sequence of introductory American government courses nationwide. We have endeavored to make the workings of American Government interesting and accessible to students while maintaining the conceptual coverage and rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project.

This brief edition of a groundbreaking textbook addresses the need for college students to develop critical reading, writing, and thinking skills for self-defense in the contentious arena of American civic rhetoric. Designed for first-year or more advanced composition and critical thinking courses, it is one-third shorter than the original edition, more affordable for students, and easier for teachers to cover in a semester or quarter. It incorporates up-to-date new readings and analysis of controversies like the growing inequality of wealth in America and the debates in the 2008 presidential campaign, expressed in opposing viewpoints from the political left and right. Exercises help students understand the ideological positions and rhetorical patterns that underlie such opposing views. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.
