The Stability and Shelf-Life of Food

Demonstrating the latest research and analysis in the area of through-life engineering services (TES), this book utilizes case studies and expert analysis from an international array of practitioners and researchers – who together represent multiple manufacturing sectors: aerospace, railway and automotive – to maximize reader insights into the field of through-life engineering services. As part of the EPSRC Centre in Through-life Engineering Services program to support the academic and industrial community, this book presents an overview of non-destructive testing techniques and applications and provides the reader with the information needed to assess degradation and possible automation of through-life

engineering service activities . The latest developments in maintenance-repair-overhaul (MRO) are presented with emphasis on cleaning technologies, repair and overhaul approaches and planning and digital assistance. The impact of these technologies on sustainable enterprises is also analyzed. This book will help to support the existing TES community and will provide future studies with a strong base from which to analyze and apply technological trends to real world examples.

Hazardous Material (HAZMAT) Life Cycle Management

Running a business can be incredibly stressful. In fact, many people regard stress as one of the biggest problems facing business owners. Stress-proof your business and your life has been designed specifically to help entrepreneurs, business owners and managers stress-proof their personal, financial and business concerns. It is intensely practical and down to earth, exactly the sort of advice that a really good professional would give to clients and friends.

New Materials for Next-Generation Commercial Transports

Study the social issues faced by Native Americans within the context of the genesis of the problems and what efforts have been made to address them. Some of the subjects covered include health, HIV/AIDS, and violence against women.

Pitman's Journal of Commercial Education

Issues in Life Sciences: Muscle, Membrane, and General Microbiology: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Life Sciences—Muscle, Membrane, and General Microbiology. The editors have built Issues in Life Sciences: Muscle, Membrane, and General Microbiology: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Life Sciences—Muscle, Membrane, and General Microbiology in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Life Sciences: Muscle, Membrane, and General Microbiology: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Thinking about becoming a commercial real estate investor? Commercial Real Estate Investing For Dummies covers the entire process, offering practical advice on negotiation and closing win-win deals and maximizing profit. From office buildings to shopping centers to apartment buildings, it helps you pick the right properties at the right time for the right price. Yes, there is a fun and easy way to break into commercial real estate, and this is it. This comprehensive handbook has it all. You'll learn how to find great properties, size up sellers, finance your investments, protect your assets, and increase your property's value. You'll discover the upsides and downsides of the various types of investments, learn the five biggest myths of commercial real estate investment, find out how to recession-proof your investment portfolio, and more. Discover how to: Get leads on commercial property investments Determine what a property is worth Find the right financing for you Handle inspections and fix problems Make big money in land development Manage your properties or hire a pro Exploit the tax advantages of commercial real estate Find out what offer a seller really-really wants Perform due diligence before you make a deal Raise capital by forming partnerships Investing in commercial property can make you rich in any economy. Get Commercial Real Estate For Dummies, and find out how.

Issues in Life Sciences—Invertebrate Research: 2013 Edition

The major objective of this book was to identify issues related to the introduction of new materials and the effects that advanced materials will have on the durability and technical risk of future civil aircraft throughout their service life. The committee investigated the new materials and structural concepts that are likely to be incorporated into next generation commercial aircraft and the factors influencing application decisions. Based on these predictions, the committee attempted to identify the design, characterization, monitoring, and maintenance issues that are critical for the introduction of advanced materials and structural concepts into future aircraft.

Issues in Life Sciences—Botany and Plant Biology Research: 2012 Edition

Along with Mikhail Gorbachev, Helmut Kohl, and Francois Mitterand, Jacques Chirac is one of the most iconic statesmen of the twentieth century. Two-time president of France, mayor of Paris, and international politician, a recent poll voted him the most admired political figure in France, with current president Nicolas Sarkozy ranking in 32nd place. This memoir covers the full scope of Chirac's political career of more than 50 years and includes the last century's most significant events. A protégé of General de Gaulle, Chirac started political life after France's defeat in Algeria in the early 1960s. He then became Prime Minister George de Pompidou's

"bulldozer" and a personal negotiator with Saddam Hussein for France's oil interests in the Persian Gulf. He sold Iraq its first nuclear reactor and incurred the wrath of the United States and Israel, which he discusses in striking detail. As mayor of Paris, Chirac was famed for his success in beautifying the City of Lights and keeping it whole during the heady days of the 1968 riots. As president in the 1990s and early 2000s, Chirac took controversial steps to privatize the economy and plan the European Union. Chirac seldom pulls punches and in several dramatic chapters describes his opposition to the US invasion of Iraq in 2002 and his personal meetings with George W. Bush. These landmark events are brought into sharp focus in this memoir that the popular French magazine Paris Match said "steals the show" even after its author decamped the presidential palace.

Fire Protection for Commercial Facilities

The stability and shelf-life of a food product are critical to its success in the market place, yet companies experience considerable difficulties in defining and understanding the factors that influence stability over a desired storage period. This book is the most comprehensive guide to understanding and controlling the factors that determine the shelf-life of food products.

Issues in Life Sciences—Zoology: 2013 Edition

Stress Proof Your Business and Your Life

The Times Law Reports and Commercial Cases

Is commercialization the mainspring of modernity? Do modern commercial forms represent an end state of social development--the "end of history"? Reflections on Commercial Life, an anthology of writings from the ancient Greeks to contemporary thinkers, poses these and other similar questions. It provides students, scholars, and general readers an opportunity to develop a more self-conscious and critical relationship to commercial life, as it challenges the inattention of mainstream economics to the social forms that make up commercial life, such as money, the commodity, wage-labor, and capital.

The Neuropsychology of Everyday Life: Issues in Development and Rehabilitation

Commercial West

Business ethics as a discipline leans on cases but flourishes by thorough analysis and reflection. The present volume offers both. After three introductory chapters into business ethics eight recent European cases, mainly stemming from The Netherlands and Belgium and all of them with a clear moral impact, are extensively described and analysed. Among them are the Lernout and Hauspie speech technology disaster, Heineken's struggle with the promotion girls selling

beer in Cambodia, cartels in the Dutch construction industry, the pharmaceutical industry and the Aids crisis, and Unilever allegedly making use of child labour in the cotton industry in India. Each case is followed by two expert comments, from the fields of general ethics, but also of law, economics, management and organisation theory, sociology and social psychology. Cases and comments together offer an unique entrance in varieties of moral reasoning and in the personal and institutional dimensions to be taken into account when facing a corporate case saturated with moral ambiguities. This book will be of interest to researchers as well as teachers of undergraduate and graduate courses in Business Ethics, Business in Society, Management and Organisation Theory and Strategic Management. It will also be useful for business practitioners eager to find moral guidance in their specific field.

Managing Work-life Balance

Commercial and Public Sector Issues in Bankruptcy

Commercial Real Estate Investing For Dummies

Commercial and Financial Chronicle

Problems of Boy Life

Through a systematic study of historical data, this book argues that a small group of New York banks, by means of term loans and working in close collaboration with their affiliated life insurance companies, exerted a strong influence over the supply of money and credit, and thus over the entire economy throughout the years of the depression. The book analyzes the growth of term loans under the depression, the concentration of the loans in a handful of powerful New York banks, the interplay between these banks and large life insurance companies in the capital market, and the resulting economic consequences. It also details the changes that took place in

the leadership within the financial hierarchy during the depression: the J. D. Rockefeller interests replaced the Morgan-First National interests as the country's dominant financial power - a change that has escaped previous scholarly notice."

Through-life Engineering Services

For a period of some fifteen years following completion of my internship training in clinical psychology (1950-1951) at the Washington University School of Medicine and my concurrent successful navigation through that school's neuroanatomy course, clinical work in neuropsychology for me and the psychologists of my generation consisted almost exclusively of our trying to help our physician colleagues differentiate patients with neurologic disorders from those with psychiatric disorders. In time, experience led all of us from the several disciplines involved in this enterprise to the conclusion that the crude diagnostic techniques available to us circa 1945-1965 had garnered little valid information on which to base such complex, differential diagnostic decisions. It now is gratifying to look back and review the remarkable progress that has occurred in the field of clinical neuropsychology in the four decades since I was a graduate student. In the late 1940s such pioneers as Ward Halstead, Alexander Luria, George Yacorzynski, Hans-Lukas Teuber, and Arthur Benton already were involved in clinical studies that, by the late 1960s, would markedly have improved the quality of clinical practice. However, the only psychological tests that the clinical psychologist of my immediate post Second World War generation had as aids for the diagnosis of neurologically based conditions involving cognitive deficit were such old standbys as the Wechsler-Bellevue, Rorschach, Draw A Person, Bender Gestalt, and Graham Kendall Memory for Designs Test.

Intellectual property navigating through commercial waters : issues and solutions when negotiating intellectual property with commercial companies.

Issues in Biological and Life Sciences Research: 2011 Edition

It is well known that fluorescent light bulbs and consumer appliances such as televisions, computers, and monitors contain mercury, dangerous chemicals, and other harmful components. The existing literature on hazardous materials addresses the risks attached to specific materials and emphasizes compliance and personal protective equipment (PPE)—but not the life cycle management of the materials that represent the hazards. A logistics treatment of the subject is needed to understand the underlying supply chain management principles and apply solutions to reduce overall use of hazardous materials. Hazardous Material (HAZMAT) Life Cycle Management: Corporate, Community and Organizational Planning and Preparedness is organized into two thematic sections. Section I defines and classifies hazardous materials and covers the U.S. regulatory framework and standards governing the transport and use of such materials. Section II examines institutional and organizational program elements and provides guidelines for developing these programs to reduce liability and risk while lowering point-source pollution and total hazardous waste production. The logistics

approach to hazardous materials yields exponential benefits in costs and the reduction or elimination of such materials. It limits organizational liability and, at the same time, reduces the costs associated with hazardous waste management and disposal. This book serves as an integrative reference offering a better understanding of hazardous materials use, life cycle management, consumption, and waste reduction at a holistic, strategic level.

Issues in Life Sciences: Muscle, Membrane, and General Microbiology: 2011 Edition

Business cases are at the heart of business ethics as a discipline. Analysis and reflection on the morality of business often is triggered by concrete cases. After four introductory chapters into recent developments within business ethics and the value of case analysis, the present volume offers extensive description of eight recent European cases, mainly stemming from The Netherlands and Belgium and all of them with a clear moral impact. Among them are the Lernout and Hauspie speech technology disaster, Heineken struggle with the promotion girls selling beer in Cambodia, cartels in the Dutch construction industry, the pharmaceutical industry and the Aids crisis, and Unilever allegedly making use of child labour in the cotton industry in India. The book will be of interest to researchers as well as teachers of undergraduate and graduate courses in Business Ethics, Business in Society, Management and Organisation Theory and Strategic Management. It will also be useful for business practitioners eager to learn about business ethics by means of cases.

The Commercial & Financial Chronicle

European Business Ethics Cases in Context

Work-life balance is one of the most important issues facing employers and managers today. Employees at all levels are no longer willing to trade their quality of life in order to get a decent standard of living. Managers can no longer afford to ignore the costs that the long-hours culture imposes on their organisation. Overwork causes stress-related absenteeism, poor retention levels, low creativity, appalling customer service and unethical employee behaviour. Combine that with the risks of being sued by a stressed employee or a parent who wanted to work flexibly, and the business case for paying real attention to work-life issues has never been stronger. This text sets out the roadmap for moving your organisation towards a positive work-life culture. With clear and practical advice for HR and line managers alike, *Managing Work-Life Balance* shows you how to engage employers, managers and employees in the process of controlling the inherent conflicts between the worlds of work and home.

Social Life and Issues

When confronted with a fire protection problem, building management is often desperately short on information and know-how in this critical component of protection for their own facility. It is not that the material is hard to grasp, but that there is so much of it that makes the task seem so daunting. Touching on the many subfields of fire protection engineering, *Fire Protection for Commercial Facilities* deconstructs the issues of fire prevention and life safety into easily digested information. Written in a conversational tone that makes the concepts easy to understand, this book presents systems and practices that can increase a facility's ability to avoid fires, limit the development and spread of fires, and effectively control fires. It provides guidance for decision making regarding what can be effectively controlled in-house, and what should be contracted out to relieve the workload burden of the in-house staff. The information offered augments a broad range of expertise common to building or plant engineers, keeping them abreast of the divergent subfields of fire prevention. Every facility manager dreams of the day when absolutely nothing goes wrong, the week where no new unforeseen problems occur. A fire protection problem is just one of the many emergencies that might spoil this dream. Delineating current and time-tested fire protection practices, this book explores the wide array of fire protection engineering applications encountered during typical facility operations so that facilities managers can be well-versed, informed, and better able to handle fire-related incidents.
