## **Communing with the Ancestors**

Drawing on recent scholarship and delving systematically into Iamblichean texts, these ten papers establish Iamblichus as the great innovator of Neoplatonic philosophy who broadened its appeal for future generations of philosophers.

This book demonstrates how to communicate and make contact with ancestral spirits, including practical methods for seeking their guidance. Raven Grimassi explores the realm of the ancestors and the role of reincarnation in the soul's relationship to ancestral lineage. He explains the interactions between ancestors, the living, and the dead and examines how communication with the ancestors is strengthened through various techniques and ritual

practices. True to Raven's style, the book includes folklore, legend, and superstition surrounding the topic. Shrines, altars, and offerings are discussed in detail. Ancient practices related to communing with the ancestors are revived, and new rituals are provided, including an exercise to lead readers into the "cavern of the ancestors" through guided imagery. Sacred sites, power places, special portals to the ancients, reincarnation, and the "restless dead who are still bound to the earth realm"--he covers it all.

first independent publication, To the Fellows of the Theosophical Society, his introduction to *City Without Walls*, and many other spiritual books, reviews and his hitherto unpublished story 'The Return'. Although Russell, known as A.E., was a poet, painter, newspaper editor, and a political writer, working for three decades in the Irish cooperative movement, it is probably as a mystic that he attracts contemporary attention. His writings on mystical and mythological topics, reflecting his study of Hindu and Theosophical teachings as well as his own visionary experience, offer a unique and inspiring exploration of unseen worlds. Interpretation of the context and significance of A.E.'s thinking is facilitated for the reader of this collection by the extensive introduction and copious notes offered by Professors Raghavan Iyer and Nandini Iyer.

### **Vazhipaduvom**

For early civilizations, consciousness and the sense of self were experienced as located in the center of the body, most often near to or within the physical heart. Enlightenment was understood as the illumination of a transformed "spiritual heart." Thus the mind of the body as a whole was represented by the heart-soul. In contrast, modern culture places consciousness within the brain, resulting in a mind/body dualism. This separation of mind and body has recently been emphasized as characteristic of the psychopathologies of the modern self. This volume explores the understanding and experience of consciousness in the earliest civilizations before about

500 BCE. Beginning with a description of ancient Western and Eastern heart-consciousness, the psychological and spiritual manifestations of the ancient mature heart-soul are summarized. Ancestor worship, lineage identity, primitive consciousness and the ways in which the external world was mirrored by the inner world provide additional clues about the experience of heart-consciousness. Finally, the work addresses the fundamental changes in the experience of consciousness that led to the mind/body dualism of today.

### **Communion with the Triune God (Foreword by Kevin J. Vanhoozer)**

This anthology is aimed at all those who are interested in the connection between consciousness, psychedelics, and the development of humankind. Bestselling author Graham Hancock has been writing and speaking about this to audience's worldwide, including a controversial TEDx talk on ayahuasca and DMT, which some call the god molecule. Graham Hancock leads the charge in this collection of the latest thinking on consciousness with a particular focus on the use of psychedelics to open up the realm of the supernatural. Leading minds and radical thinkers including Dennis McKenna, Rick Doblin, Alex Grey, Russell Brand, and Rick Strassman illuminate the topic like never before.

## **Communing with the Gods**

### **The Wiley-Blackwell Handbook of Transpersonal Psychology**

The purpose of this book is to make you aware of many different philosophical and religious approaches to the divine consciousness. The truth lies beyond all these aspects of understanding. There is a process that a person can embark on that will reveal the real and disperse the illusion. The race of mankind is on the path to understand himself, but is distracted continually until one begins to strive with diligence to return to your Godself.

"This volume in Springer's well-conceived Comparative Treatments [for] Psychological Disorders Series was designed to examine psychotherapy approaches to chemical dependence treatmentÖ[it] provides important theoretical and clinical information that will be of great use to psychotherapy students, particularly those at the graduate level. It will make an excellent companion resource to many specific chemical dependence treatment texts because it provides a variety of theories that are clearly linked to practical intervention strategies." --International Association for Cognitive Psychotherapy, August 2000. This volume addresses a clinical problem seen

by most mental health professionals--the abuse of drugs and alcohol. Drs. Dowd and Rugle have assembled top professionals in the field to address the same case to illuminate the strengths and weaknesses of different therapeutic approaches to substance abuse. Treatment modalities include psychodynamic, behavioral, cognitive, REBT, family therapy, and more. The volume also presents current outcome research for evidence-based interventions.

### **Yearbook**

Presents the most comprehensive account of culture and dreaming available in the anthropology of dreaming, and is written by an anthropologist who is also trained in neuroscience, and who is himself a lucid dreamer and Tibetan Tantric dream yoga practitioner. The book examines the place of dreaming in the experience of peoples from diverse cultures and historical backgrounds. The perspective is that of neuroanthropology - the merger of neuroscience with ethnographic research on dreaming.

### **A Psychological Study of Religion**

Contains proceedings of annual conventions.

### **System of Christian Ethics**

### **The Seat of Consciousness in Ancient Literature**

## **The Descent of the Gods**

"Ecology, Cosmos, and Consciousness is a pioneering work that attempts to shift current paradigms. Its editor and lead author, Mark A. Schroll, incisively identifies the problems humanity faces as a result of philosophies, sciences, and religious movements that ignore the importance of an earth-based focus of humanistic and transpersonal inquiry. The result is a transpersonal, post-modern, systems-oriented approach to cultural theory that is both provocative and well-argued, both visionary and practical, both scholarly and whimsical."

## **Biogenetic Structuralism**

This biography of Lawrence is unlike any other in its focus on the essential character of the artist and in its synthesis of the facts of his life and thought. It is written not for specialists, but for general readers who wish to deepen their understanding of the development of Lawrence's thought and feeling over the course of his lifetime. The author blends intellectual biography and psychology to focus on Lawrence's religious nature as a shaping force in his life.

### **On the Trail of the Women Warriors**

A Communion of Subjects is the first comparative and interdisciplinary study of the conceptualization of animals in world religions. Scholars from a wide range of disciplines, including Thomas Berry (cultural history), Wendy Doniger (study of myth), Elizabeth Lawrence (veterinary medicine, ritual studies), Marc Bekoff (cognitive ethology), Marc Hauser (behavioral science), Steven Wise (animals and law), Peter Singer (animals and ethics), and Jane Goodall (primatology) consider how major religious traditions have incorporated animals into their belief systems, myths, rituals, and art. Their findings offer profound insights into humans' relationships with animals and a deeper understanding of the social and ecological web in which we all live. Contributors examine Judaism, Christianity, Islam, Hinduism, Buddhism, Jainism, Daoism, Confucianism, African religions, traditions from ancient Egypt and early China, and Native American, indigenous Tibetan, and Australian Aboriginal traditions, among others. They explore issues such as animal consciousness, suffering, sacrifice, and stewardship in innovative methodological ways. They also address contemporary challenges relating to law, biotechnology, social justice, and the environment. By grappling with the nature and ideological features of various religious views, the contributors cast religious teachings and practices in a new light. They reveal

how we either intentionally or inadvertently marginalize "others," whether they are human or otherwise, reflecting on the ways in which we assign value to living beings. Though it is an ancient concern, the topic of "Religion and Animals" has yet to be systematically studied by modern scholars. This groundbreaking collection takes the first steps toward a meaningful analysis.

## **Comparative Treatments of Substance Abuse**

Does it make a difference that the God Christians claim to worship has revealed himself as triune-the Father, Son, and Holy Spirit? Does this fundamental truth of biblical authority have an effect on a believer's personal fellowship with God? Puritan theologian John Owen recognized the great need for every believer to understand the triune God. Communion with the Triune God revisits the truth presented by John Owen and challenges all believers to truly recognize and appreciate the ministry that God the Father, God the Son, and God the Holy Spirit have in their lives. This work of John Owen encourages Christians to enjoy true communion with each person of the triune God.
