The American Exporter

Governance by regulation – rules propounded and enforced by bureaucracies – is taking a growing share of the sum total of governance. Once thought to be an American phenomenon, it is now a central form of state action in every part of the world, including Europe, Latin America, and Asia, and it is at the core of much international lawmaking. In *Comparative Law and Regulation*, original contributions by leading scholars in the field focus both on the legal dimension of regulation and on how this dimension operates in those places that have turned to regulation to meet their obligations.

Theory and Method in Socio-Legal Research

Britain Through American Eyes

This volume in the Osgoode Society's distinguished series on the history of Canadian law is a collection of the principal essays of Professor Emeritus R.C.B. Risk, one of the pioneers of Canadian legal history and for many years regarded as its foremost authority on the history of Canadian legal thought. Frank Scott, Bora Laskin, W.P.M. Kennedy, John Willis and Edward Blake are among the better known figures whose thinking and writing about law are featured in this collection. But this compilation of the most important essays by a pioneer in Canadian legal history brings to light many other lesser known figures as well, whose writings covered a wide range of topics, from estoppel to the British North America Act to the purpose of legal education. Written over more than two decades, and covering the immediate post-Confederation period to the 1960s, these essays reveal a distinctive Canadian tradition of thinking about the nature and functions of law,

one which Risk clearly takes pride in and urges us to celebrate.

Socio-legal researchers increasingly recognise the need to employ a wide variety of methods in studying law and legal phenomena, and the need to be informed by an understanding of debates about theory and method in mainstream social science. The papers in this volume illustrate how a range of topics, including EU law, ombudsmen, judges, lawyers, Shariah Councils and the quality assurance industry can be researched from a socio-legal perspective. The objective of the collection is to show how different methods can be used in researching law and legal phenomena, how methodological issues and debates in sociology are relevant to the study of law, and the importance of the debate between "structural" and "action" traditions in researching law. It also approaches the methodological problem of how sociology of law can address the content of legal practice from a variety of perspectives and discusses the relationship between pure and applied research. The editors provide a critical introduction to each of the six sections, and a general introduction on law, sociology and method. The collection will provide an invaluable resource for socio-legal researchers, law school researchers and postgraduates.

Comparative Law and Regulation

This edited collection examines the labour laws of seven industrializing East Asian societies - China, Indonesia, Malaysia, South Korea, Taiwan, the Philippines and Vietnam - and discusses the variation in their impact across the whole region. Leading scholars from each country consider both laws pertaining to working conditions and industrial relations, and those that regulate the labour market as a whole. Legislation concerning migrant labour, gender equality, employment creation and skills formation is also examined. Adopting their own distinct theoretical perspectives, the authors trace the historical development of labour regulation and reveal that most countries in the region now have quite extensive frameworks. This book will be particularly useful to people interested in the place of labour law, and law in general, in contemporary East Asian societies.

Drafting Legislation

Britain and the United States share a common language, a liberal and cultural heritage, and a democratic political system. They also have pronounced differences, for their economic, political, and social structures have developed in distinctive ways. This book compares and contrasts the historical course of the two

countries and explores the significance of their similarities and differences over a period of two centuries. The book offers wide ranging and up-to-date analyses of such issues as industrialization and urbanization, democracy and politics, class and gender, and citizenship and welfare. With contributions from leading scholars in both countries, it will be an invaluable resource for classrooms and seminar study, appealing to students of both history and social science. Some of the essays are classic expositions of debates that resonate on both sides of the Atlantic. Others are exemplary pieces that signal new agendas for research. Contributors: Anthony Badger, Mark Clapson, J.C.D. Clark, Clive Emsley, Mary K. Geiter, H.J. Habakkuk, Jeffrey Haydu, Ira Katznelson, Leon S. Marshall, David Morgan, Ann Shola Orloff, Gretchen Ritter, S.B. Saul, Theda Skocpol, W.A. Speck, and David Ward.

Routledge Handbook of Constitutional Law

This book constitutes the first thorough academic analysis of legislative drafting. By placing the study of legislation and its principles within the paradigm of Flyvberg's phronetic social sciences, it offers a novel approach which breaks the tradition of unimaginative past descriptive reiterations of drafting conventions. Instead of prescribing rules for legislation, it sets out to identify efficacy as the main aim of the actors in the policy, legislative and drafting processes, and effectiveness as the main goal in the drafting of legislation. Through the prism of effectiveness as synonymous with legislative quality, the book explores the stages of the drafting process; guides the reader through structure and sections in their logical sequence, and introduces rules for drafting preliminary, substantive and final provisions. Special provisions, comparative legislative drafting and training for drafters complete this thorough analysis of the drafting of legislation as a tool for regulation. Instead of teaching the reader which drafting rules prevail, the book explores the reasons why drafting rules have come about, thus encouraging readers to understand what goal is served by each rule and how each rule applies. The book is aimed at academics and practitioners who draft or use statutory law in the common or civil law traditions.

Comparative studies in continental and Anglo-American legal history

This study examines the influence of American law and theories of judicial review on the development, practice and theorization of judicial review in Norway, Denmark, and Iceland from the 19th century to the present. The study describes how Nordic scholars in the late 19th century rationalized judicial review based on

Women and Power in American History provides a coherent group of readings related to the unifying theme of power in women's lives over time. A greater understanding of how power inequalities are organized along gender lines can help us work toward a more egalitarian and just society. Because the work of the women's movement is far from complete, the need for a fuller historical understanding of how women's lives have changed over time remains great. This anthology brings together carefully selected, cutting-edge readings in U.S. Women's History--organized around issues related to gender and power in American society. The twenty-seven individual essays provide students with unifying themes that promote their understanding of women's history and changing gender relations. Both co-authors are highly visible in the field of women's history.

commissioned papers by a range of leading scholars from around the world, it offers a comprehensive overview of the field as well as identifying promising avenues for future research. The book presents the key issues in constitutional law thematically allowing for a truly comparative approach to the subject. It also pays particular attention to constitutional design, identifying and evaluating various solutions to the challenges involved in constitutional architecture. The book is split into four parts for ease of reference: Part One: General issues "sets issues of constitutional law firmly in context including topics such as the making of constitutions, the impact of religion and culture on constitutions, and the relationship between international law and domestic constitutions. Part Two: Structures presents different approaches in regard to institutions or state organization and structural concepts such as emergency powers and electoral systems Part Three: Rights covers the key rights often enshrined in constitutions Part Four: New Challenges - explores issues of importance such as migration and refugees, sovereignty under pressure from globalization, Supranational Organizations and their role in creating post-conflict constitutions, and new technological challenges. Providing up-to-date and authoritative articles covering all the key aspects of constitutional law, this reference work is essential reading for advanced students, scholars and practitioners in the field.

The Korean-American Community

This work examines the experiences of African Americans under the law and how African American culture has fostered a rich tradition of legal criticism. Moving between novels, music, and visual culture, the essays present race as a significant factor within legal discourse. Essays examine rights and sovereignty, violence and the law, and cultural ownership through the lens of African American culture. The volume argues that law must understand the effects of particular decisions and doctrines on African American life and culture and explores the ways in which African American cultural production has been largely centered on a critique of law.
