## **Nursing the Feline Patient**

The U.S. veterinary medical profession contributes to society in diverse ways, from developing drugs and protecting the food supply to treating companion animals and investigating animal diseases in the wild. In a study of the issues related to the veterinary medical workforce, including demographics, workforce supply, trends affecting job availability, and capacity of the educational system to fill future demands, a National Research Council committee found that the profession faces important challenges in maintaining the economic sustainability of veterinary practice and education, building its scholarly foundations, and evolving veterinary service to meet changing societal needs. Many concerns about the profession came into focus following the outbreak of West Nile fever in 1999, and the subsequent outbreaks of SARS, monkeypox, bovine

spongiform encephalopathy, highly pathogenic avian influenza, H1N1 influenza, and a variety of food safety and environmental issues heightened public concerns. They also raised further questions about the directions of veterinary medicine and the capacity of public health service the profession provides both in the United States and abroad. To address some of the problems facing the veterinary profession, greater public and private support for education and research in veterinary medicine is needed. The public, policymakers, and even medical professionals are frequently unaware of how veterinary medicine fundamentally supports both animal and human health and well-being. This report seeks to broaden the public's understanding and attempts to anticipate some of the needs and measures that are essential for the profession to fulfill given its changing roles in the 21st century.

THE MASSIVE NO.1 SUNDAY TIMES BESTSELLER. A powerful, heart-warming and inspiring memoir from the UK's most famous and beloved vet, Professor Noel Fitzpatrick - star of the Channel 4 series The Supervet. Growing up on the family farm in Ballyfin, Ireland, Noel's childhood was spent tending to the cattle and sheep, the hay and silage, the tractors and land, his beloved sheepdog Pirate providing solace from the bullies that plagued him at school. It was this bond with Pirate, and a fateful night spent desperately trying to save a newborn lamb, that inspired Noel to enter the world of veterinary science - and set him on the path to becoming The Supervet. Now, in this long-awaited memoir, Noel recounts this often-surprising journey that sees him leaving behind a farm animal practice in rural Ireland to set up Fitzpatrick Referrals in Surrey, one of the most advanced small animal specialist centres in the world. We meet the animals that paved the way, from calving cows and corralling bullocks to talkative parrots and bionic cats and dogs. Noel has listened to the many lessons that the animals in his care have taught him, and especially the times he has shared with his beloved Keira, the scruffy Border Terrier who has been by Noel's side as he's dealt with the unbelievable highs and crushing lows of his extraordinary career. As heart-warming and life-affirming as the TV show with which he made his name, Listening to the Animals is a story of love, hope and compassion, and about rejoicing in the bond between humans and animals that makes us the very best we can be.
