Contemporary and Emerging Issues on the Law of Damages and Valuation in International Investment Arbitration

The book examines diplomatic immunity and provides a historical analysis of the granting of diplomatic immunity to non-diplomats, based on the perspectives of several states. Featuring contributions in which experts from four continents and from academia and practice present their views and perspectives; it is an insightful resource for diplomats, academics and legal professionals, while at the same time it is useful and understandable for students, junior staff and anyone just starting their venture into the diplomatic immunity issues and general international law.

Situation, Documents, and Commentary on Recent Developments in the International Law of the Sea

This book is concerned with the development of the trust idea in common law jurisdictions, whether mainland or offshore, and in civil law jurisdictions. While trusts are important for preserving family wealth and influence, over ninety per cent of the value of trust funds is found in commercial or financial trusts, about which little has been written. It is interest in the latter type of trust that is likely to lead to the development of the trust idea in European mainland jurisdictions, especially as the economic destinies of European jurisdictions become increasingly intertwined and as the Hague Convention on the Recognition of Trusts comes to be implemented. In this volume the work of leading trust scholars in Canada, England, the USA, Germany and Japan is brought together to explore key issues in trust law, until now not covered in any single resource: the full elasticity of the trust concept; the variety and significance of commercial or financial trusts; the scope for reforming trust law in various jurisdictions to make it more economically efficient in assisting in the preservation and generation of wealth; the potential for the development of a core trust concept in civil law jurisdictions as a special part of the law of obligations, without any need to create equitable proprietary interests in favour of beneficiaries. Modern International Developments in Trust Law will be of interest not only to academic trust lawyers and comparative lawyers, but to

common law and civil law practitioners, whether interested in taking advantage of foreign trust laws, or in developing in their local jurisdictions new ideas obtained from foreign jurisdictions.

Contemporary International Law Issues

Contemporary and Emerging Issues on the Law of Damages and Valuation in International Investment Arbitration, edited by Christina L. Beharry, examines a broad range of damages topics, building on basic principles and surveying current developments to identify trends in the jurisprudence.

Contemporary Issues in International Environmental Law

Although most international lawyers assumed that the distribution of the land surface of the earth between States was more or less final after the end of decolonization, recent practice has disproved this assumption. Eritrea separated from Ethiopia and new States were created out of the former Soviet Union, the former Yugoslavia and the former Czechoslovakia. There is no reason to believe that these events form the end of the creation of new States. Numerous communities within existing States claim a right to full separate statehood on the basis of their entitlement to an alleged right to self-determination. However, in

most cases, the international community rejected such claims to statehood, even if the territorial entity satisfied the traditional criteria for statehood. On the other hand, in other cases, including some of those mentioned above, the international community acknowledged the statehood of entities which clearly failed to meet these criteria. In the light of the above-mentioned developments, this book examines the modern law of statehood, and in particular the role of the law of self-determination in the process of the formation of States in international law. The study shows that the law of statehood has changed considerably since the establishment of the United Nations. It is argued that the law of self-determination is particularly relevant for explaining the international community's position regarding the general recognition, or the general denial, of statehood of different territorial entities under contemporary international law.

Refugee law is going through momentous times, as dictatorships tumble, revolutions simmer and the 'Arab Awakening' gives way to the spread of terror from Syria to the Sahel in Africa. This compilation of topical chapters, by some of the leading scholars in the field, covers major themes of rights, security, the UNHCR, international humanitarianism and state interests and sets out to map new contours. The concerns over our security are replacing humanitarian concerns over the plight of others. Securitization, exclusion and the internal relocation of genuine

refugees are now the favoured polices. Yet, while central idioms of protection, persecution and non-refoulement have changed, there are also new demands on refugee law. The contributors to this book ask whether there are new spheres of protection emerging, for which refugee law must find a clear space, such as the protection of child refugees, trafficked persons, gender-related asylum and conscientious objectors to military service. This timely and valuable book shows that in these uncertain times, refugee law still has an exciting and challenging future ahead. Contemporary Issues in Refugee Law will appeal to academics, researchers, students and practitioners.

Yearbook of International Law This book presents an interesting, scholarly read. . . an invaluable reference asset, to law students, researchers, policy makers and non-state actors with interest in environmental regulation and governance. Priscilla Schwartz, Journal of Environmental Law This is a thoughtful and well-researched study of current issues in international environmental law. Malgosia Fitzmaurice's collection of essays is a welcome addition to the literature in this rapidly developing area of the law: it provides perspective on the environmental law issues discussed, but always against the background of the broader concepts and principles of general international law. James Crawford, University of Cambridge, UK The central aim of this insightful book is to illuminate how many concepts in international environmental law such as the precautionary principle and sustainable development are taken for granted. These problematic issues are very much still evolving and subject to heated debate between scholars as well as between states. The author explores these controversies viewing them as a positive development within a field that is in a constant state of flux. Areas discussed include the convergence of human rights with environmental issues and the quest for the human right to a clean environment. The book also clearly demonstrates that international environmental law cannot be analysed in isolation since it greatly influences the development of general international law. Taking full account of the most recent decisions of international courts and tribunals as well as the most up-to-date scholarly analysis, Contemporary Issues in International Environmental Law is a timely and important resource for legal scholars, under-

Developments of International Law in Treaty Making

This festschrift in honor of the work and legacy of Dr. Marc Groenhuijsen provides an international and holistic overview of recent developments in victimology, taking a global scope but grounded in everyday experiences of victims. Its multidisciplinary perspective reflects a range of approaches and practices in victimology, including contributions from the fields of social work, criminology, sociology, psychology, and law. Firstly, the volume introduces new perspectives in victimology, and then analyzes different forms of victimization in countries worldwide. It gives special attention to victims' rights and participation in the criminal justice system, detailing victim-centered approaches to justice through practices such as restorative justice and restitution. Highlighting the growth and development of victimology from a specialization in criminology to an academic discipline in its own right, this book reflects the range of approaches and depth of

This volume scrutinises the main challenges faced by States in their current international economic relations from an interdisciplinary perspective. It combines legal research with political and economic analysis and favours dialogue among scientific disciplines. Readers are offered a series of in-depth studies on a rich variety of topics: how to reconcile States' interest to benefit from economic liberalization with their need to pursue social goals (such as the protection of human rights or of the environment); recent developments under WTO law and regional integration processes; international cooperation in the energy sector; national regulatory developments in the banking sector, sovereign wealth funds and investor-State arbitration.

A consensus has emerged that corporations have societal and environmental responsibilities when operating transnationally. However, how exactly corporations can be held legally accountable for their transgressions, if at all, is less clear. This volume inquires how regulatory tools stemming from international law, public law, and private law may or may not be used for transnational corporate accountability purposes. Attention is devoted to applicable standards of liability, institutional and jurisdictional issues, and practical challenges, with a focus on ways to improve the existing legal status quo. In addition, there is consideration of the extent to which non-legal regulatory instruments may complement or provide more viable

alternatives to these legal mechanisms. The book combines legal doctrinal approaches with comparative, interdisciplinary, and policy insights with the dual aim of furthering the legal scholarly debate on these issues and enabling higher quality decision-making by policymakers seeking to implement regulatory measures that enhance corporate accountability in this context. Through its study of contemporary developments in legislation and case law, it provides a timely and important contribution to the scholarly and sociopolitical debate in the fast-evolving field of international corporate social responsibility and accountability.

universal abidance with Space Law without demur; reflects upon the challenges for the global space community involved in implementing a more effective approach to international space governance; and considers the use of domestic laws, and the consequent need for legal reform, to encourage broader engagement with commercial space innovation. Further, the book delves into the adequacy of existing international liability regime to protect space tourists in the event of a space vehicle accidents; examines the increasing use of space for military activities and canvasses how International Law may apply to condition behaviour; highlights the challenges of scavenging space debris; calls for protections of space assets; touches upon the legal regime pertaining to ASAT and discusses other ways of creating normative instruments, which also come from other areas and use other methods. Given its comprehensive coverage of opportunities in space and the inevitable legal challenges that they pose, the book offers a valuable resource for students, researchers, academics and professionals including government officials, industry executives, specialists, and lawyers, helping them understand essential contemporary issues and developments in Space Law.

was held in The Hague, on July 22--24, 1993. At this event international scholars, practitioners and experts gathered to discuss the latest developments in such areas as trade and investment, the environment, human rights, law of the sea, settlement of disputes, international criminal law, NAFTA, the European Community, and commercial arbitration with particular reference to Central and Eastern Europe. The content of these Proceedings bears evidence of the wide range of dialogue that occurred during the Joint Conference and directs the reader to issues which might form suitable subjects for further research and elaboration in other scholarly work. The book will be of interest to academics and diplomats, as well as legal practitioners.

Akehurst's Modern Introduction to International Law

The book explores the various means of making non-conventional/non-treaty law and the cross-cutting issues that they raise. Law-making by technical/informal expert bodies, Conferences of Parties, international organizations, the UN Security Council, regional organizations and arrangements and non-state actors is examined in turn. This forms the basis for the analysis of the complementarity of international treaty law, customary international law and non-traditional law-making, potential subject matters of non-treaty law-making, domestic consequences of non-treaty law-making, proliferation of actors, commissions and treaty bodies of the UN system, and International courts and tribunals.

Defenses in Contemporary International Criminal Law

Featuring original contributions from well-established scholars and emerging stars in law and politics, this cutting-edge reader provides students with a succinct overview of the key issues facing international law today. The authors range from political science and law school instructors to professional researchers and lawyers in private practice, and they offer diverse, multinational perspectives on traditional and emergent issues in the practice and study of international law. Topics include R2P (Responsibility to Protect) and universal jurisdiction, nonterritorial subjects of international law, international political economics (IPE), the International Court of Justice (ICJ), international humanitarian law (IHL), the environment, political violence and terrorism, and post-colonialism. A concluding section on international political interaction covers a wide range of issues that link international politics to international law. Offering the most inclusive and contemporary body of material available, *International Law: Contemporary Issues and Future Developments* is an essential resource for courses on politics and international law.

Rebellion and Violence in Islamic Law

This book presents a review of historical and emerging legal issues that concern the interpretation of the international crime of genocide. The Polish legal expert Raphael Lemkin formulated the concept of genocide during the Nazi occupation of Europe, and it was then incorporated into the 1948 Convention on the Prevention and Punishment of the Crime of Genocide. This volume looks at the issues that are raised both by the existing international law definition of genocide and by the possible developments that continue to emerge under international criminal law. The authors consider how the concept of genocide might be used in different contexts, and see whether the definition in the 1948 convention may need some revision, also in the light of the original ideas that were expressed by Lemkin. The book focuses on specific themes that allow the reader to understand some of the problems related to the legal definition of genocide, in the context of historical and recent developments. As a valuable contribution to the debate on the significance,

meaning and application of the crime of genocide the book will be essential reading for students and academics working in the areas of Legal History, International Criminal Law, Human Rights, and Genocide Studies.

Contemporary Issues in International Arbitration and Mediation: The Fordham Papers (2013)

In the wake of the adoption by the International Law Commission of a complete set of articles on state responsibility in international law in 2001, this collection assembles a number of essays tracing key debates which have marked the evolution of this field over the last fifty years. These include explorations of the general theory of state responsibility (link between 'primary' and 'secondary' rules, the place of due diligence, the link between liability and wrongfulness), the consequences of an internationally wrongful act (nature of remedies, suitability of countermeasures, third states and the shift from bilateralism to community interests in the law of state responsibility), the debate over criminalizing state responsibility, and the continuing relevance of the law of injuries to aliens. The collection also contains a series of essays offering critical perspectives on state responsibility, including feminist and developing world perspectives. It is completed by an extensive and up-to-date bibliography.

State Responsibility in International Law

Recent years have seen a remarkable expansion in the scale and importance of economic, social, and cultural rights (ESC rights), culminating in the adoption of the Optional Protocol to the International Covenant on Economic, Social and Cultural Rights in December 2008. The Protocol gives individuals and groups the ability to bring complaints about rights violations before the UN Committee on Economic, Social, and Cultural Rights. Against this background, this book focuses on the question of how fundamental socio-economic human rights enshrined in international law are defined, interpreted, understood, and implemented. It assesses how effective efforts to realize ESC rights have been and investigates the contemporary challenges obstructing their protection. It sets out the impact of the global financial crisis and austerity measures, the human rights responsibilities of corporations, and trends in the justiciability of those rights at the national and international level. The interrelationship between ESC rights and other legal regimes such as trade and investment law, environmental law, international criminal law, and international humanitarian law is also thoroughly examined. After an introduction by the editors the book contains seventeen chapters looking at the main questions which shape the progressive realization of ESC rights and their monitoring mechanisms. The authors of the chapters, both scholars and practitioners, adopt interdisciplinary approaches that move beyond traditional analyses of ESC rights. In doing so, they clarify and illuminate multiple aspects of

the law by bringing together the different aspects of ESC rights, restating the challenges they face, and assessing the progress that has been made in expanding their adoption.

A Theory of Universal Democracy

"Once celebrated in the Western media as a shining example of a 'liberal' and 'tolerant' Islam, Indonesia since the end of the Soeharto regime (May 1998) has witnessed a variety of developments that bespeak a conservative turn in the country's Muslim politics. In this timely collection of original essays, Martin van Bruinessen, our most distinguished senior Western scholar of Indonesian Islam, and four leading Indonesian Muslim scholars explore and explain these developments. Each chapter examines recent trends from a strategic institutional perch: the Council of Indonesian Muslim scholars, the reformist Muhammadiyah, South Sulawesi's Committee for the Implementation of Islamic Shari'a, and radical Islamism in Solo. With van Bruinessen's brilliantly synthetic introduction and conclusion, these essays shed a bright light on what Indonesian Muslim politics was and where it seems to be going. The analysis is complex and by no means uniformly dire. For readers interested in Indonesian Muslim politics, and for analysts interested in the dialectical interplay of progressive and conservative Islam, this book is fascinating and essential reading." -Robert Hefner, Director Institute on Culture, Religion, and World Affairs, Boston University

Statehood and the Law of Self-Determination

International Investment Treaties and Arbitration Across Asia examines whether and how the Asian region has or may become a significant 'rule maker' in contemporary international investment law and dispute resolution, focusing on the 'ASEAN+6' economies.

Construction Law, Costs and Contemporary Developments: Drawing the Threads Together

Recent regional and global crises have changed the structure of international relations and cause countries to be inconsistent in their policies. Examples of these include the protest demonstrations and political crises which started in the Middle East and African countries in 2010 known as the 'Arab Spring', which had a major effect on Syria, and the movement towards Brexit. These emerging regional and global crises have highlighted the shortcomings of the discipline of international relations and the need for a new, detailed study to be conducted. The topics in this book have been carefully selected in order to provide a more objective assessment of the recent and ongoing problems of the international community. This volume will be a valuable resource for graduate, undergraduate and post-graduate students, academics and researchers in the areas of cyber security, international

Lord Justice Jackson's retirement in March 2018 concluded a career of almost 20 years on the bench. His judicial career has seen a remarkable transformation of construction law, construction law litigation and the litigation landscape more generally. Drawing the Threads Together is a Festschrift which considers many of the important developments in these areas during the Jackson era. The Festschrift discusses most of the leading construction cases decided by Lord Justice Jackson, with subject matter including statutory adjudication, fitness for purpose obligations, consideration, delays and extensions of time, liquidated damages, time bar provisions, the prevention principle, neighbour rights, limitation clauses, negligence, good faith, bonds and guarantees and concurrent duties of care. It also includes a discussion of the background to the Jackson Review of Civil Litigation Costs (2009–2010) and its impact on litigation, as well as considering the development of the Technology and Construction Court during and subsequent to Mr Justice Jackson's tenure as judge in charge of that court.

This book explores the impacts of global economic, political and cultural shifts on various international legal frameworks and legal norms. The economic growth of states throughout Asia, South and Central America and Africa is having a profound effect on the dynamics of international relations, with a resulting impact on the operation and development of international law. This book examines the influence of emerging economies on international legal rules, institutions and processes. It describes recent and predicted changes in economic, political and cultural powers, flowing from the growth of emerging economies such as China, India, Brazil, South Africa and Russia, and analyses the influence of these changes on various legal frameworks and norms. Expert contributors drawn from a variety of fields, including international law, politics, environmental law, human rights, economics and finance, provide a broad analysis of the nature of the shifting global dynamic in its historical and contemporary contexts, and a range of perspectives on the impact of these changes as they relate to specific regimes and issues, including climate change regulation, collective security, indigenous rights, the rights of women and girls, environmental protection and foreign aid and development. The book provides a fresh and comprehensive analysis of an issue with extensive implications for international law and politics. *Shifting Global Powers and International Law* will be of interest to students and scholars of international relations; international law; international political economy, human rights; and development.

The Law of Nations

A Theory of Universal Democracy empowers cultures and communities across the world to custom design democracy in consonance with their traditional values. For example, the book makes concrete proposals for Muslim countries to democratize their constitutions without accepting Western values and without violating the principles of Islamic law. More importantly, Universal Democracy further develops the idea of Free State, which the author first presented in his previous book, *The Extinction of Nation-States* (Kluwer, 1996). The proposed fusion of Universal Democracy and Free State is designed to revolutionize the classical theory of government and to offer a new paradigm that accommodates both universality and uniqueness. Scholars, teachers and students of international law, constitutional law, legal theory, and Islamic law will find this book a source of valuable ideas.

International Humanitarian Law

This book provides a theoretically grounded and practically oriented synthesis of the international law of indigenous peoples. Against a historical background, James Anaya discusses a new generation of international treaty and customary norms, within international law's human rights program, concerning groups that are descended from the original inhabitants of lands now dominated by others. Anaya

further identifies and analyzes institutions and procedures, both at the domestic and international levels, for implementing international norms concerning indigenous peoples.

Contemporary Issues in International Arbitration and Mediation

This book explores the changing nature of international law and its ability to respond to the contemporary issues related to international environment, trade and information technology. The evolution of international law has reached a stage where we are witnessing diminishing power of the state and its capacity to deal with the economic matters challenging the existing notions of territory and sovereignty. Recent trends in international law and international relations show that states no longer have exclusive control over the decision-making process at the global level. Keeping this in mind, the book brings together the perspectives of various international and national scholars. The book considers diverse issues such as, sustainable development, climate change, global warming, Rio+20, technology transfer, agro-biodiversity and genetic resource, authority for protection of environment, human right to water, globalization, human rights, sui generis options in IP laws, impact of liberalization on higher education, regulation of international trade, intellectual property rights, collective administration of copyright, broadcast reproduction rights, implementation of copyright law, communication rights under copyright law, arbitration for IP disputes, doctrine of

exhaustion of rights, trans-border reputation of trademark, information as an asset, cyber obscenity and pornography, e-governance, taxation of e-commerce, computer crime, information technology, domain names, research excellence in legal education, ideological perspective on legal education, challenges for law teachers, and clinical legal education. The topics, though diverse, are closely interrelated, with the common concern throughout being that the global environment, international trade, information technology and legal education need appropriate national normative and institutional responses as well as the global cooperation of members of the international community. Presenting reflections of a number of Asian, African and European scholars on these varied facets, the book is of great value to scholars, practitioners, teachers and students associated with contemporary international law.

Contemporary Issues in International Law:A Collection of the Josephine Onoh Memorial Lectures

This book is a collection of essays dealing with issues of contemporary significance in the law of treaties. It neither purports nor aspires to provide a general overview of all aspects of the law of treaties, and it is by no means intended to be a comprehensive textbook. The discussion of the subjects selected in this book will shed some light on a number of areas of the contemporary law of treaties, and,

consequently, on some important features of the international legal system at the beginning of the twenty-first century. The relevance of the rules governing the law of treaties for other central fields of international law continue to be the subject of frequent doctrinal discussion. In addition, some rapidly developing newer areas of public international law, which are regulated for the most part by treaties, have renewed the importance of some older problems, for example, the question of conflicts between treaties regulating the same subject-matter and the matter of treaty interpretation. One other important issue is the relevance of the emergence of new actors and factors, other than states, in the international legal order in general, and in the law of treaties in particular.
