This book contains the full proceedings of the 2015 Academy of Marketing Science Annual Conference held in Denver, Colorado. Marketing has become ubiquitous: it doesn't matter who you are, where you are or what you are doing, you cannot escape it. In these times of instantaneous news, information and entertainment, everyone is exposed to messages from the moment they awake until the minute they drift off to sleep. America spends the most money in the world on advertising and other marketing communication. So, it could be said that marketing is America's pastime, as much so as the classics: baseball, hot dogs, and apple pie. Under the theme of " Celebrating America's Pastimes: Baseball, Hot Dogs, Apple Pie and Marketing", this volume discusses all of the good things that marketing can do. Showcasing research from academics, scholars and practitioners from around

the world, this volume provides insight and strategies that will help marketers move forward and focus on the positive that marketing can provide to consumers, stakeholders and society. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science.

This historically organized introductory text, which begins with Hesiod and goes up to Derrida and Quine, presents philosophy as an ongoing conversation about humankind's deepest and most persistent concerns. The Great Conversation traces the exchange of ideas between history's key philosophers, demonstrating that while constructing an argument or making a claim, one philosopher almost always has others in mind. The book is also available in two volumes: Volume I covers Hesiod through Descartes (Chapters 1-13); Volume II includes "Moving from Medieval to Modern" (Chapter 12), and coverage of Descartes through Derrida and Quine (Chapters 13-25).

## **The Great Conversation**

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, “The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science.”

Beer Terrain tells the story of the emerging farm to glass revolution on the New England and New York craft brewing scene. Just four years ago, if a brewery wanted to use local ingredients, they were limited to what farmers had on hand for other markets, such as honey or fruit. Today, the region fosters numerous small hop farms as well as several malt houses that use local grain exclusively. As a result, breweries are now able to capitalize on a growing locavore economy by creating beer from here. While the cost of land in the northeast is among the highest in the nation, small farms are bucking a stagnant economy by marketing directly to the public as the growing number of both farms and farmers' markets demonstrates. The public wants local food and no drink is more of a meal than the liquid bread in a pint of beer. In recent years, craft brewing has grown at a 15 percent clip. In 2014, there are 2,700 craft breweries in the U.S. with another 1,500

in planning. Not since the 1880's have there been so many breweries all over the country. As more brewers try to get their brand noticed, incentive to distinguish one beer from another increases. Tapping the existing local food market by supporting small farms can help garner some attention for these start-ups. Back in the 19th century, brewers of the northeast had plenty of local malt and hops to choose from. Now, old meets new in a way that supports tradition and contributes to the future security of our farmlands. Whether it's the young mother who began her thriving and unique business by growing barley in her garden and malting it in her kitchen, or the incredible passion for the land of a brewer who began as a farmer himself, readers will be inspired by the dedicated characters in this story and the challenges they overcome. Not only does this book tell the story of these people, their products, and the land that supports them, it also serves as a guidebook for readers who want to explore this terrain for themselves. With a resource section that illustrates the connections between the land and the beer, and photographs depicting the people at work and the landscape that shapes their lives and products, Beer Terrain will be a valuable companion on any New England vacation or staycation.
