The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from 'broader' contextual issues to a 'narrower' focus on classrooms and classroom discourse, the volume's inter-related themes focus on: ELT in the world: contexts and goals planning and organising ELT: curriculum, resources and settings methods and methodology: perspectives and practices second language learning and learners teaching language: knowledge, skills and pedagogy understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute, and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter. The Cambridge Guide to Pedagogy and Practice in Second Language Teaching

In the belief that effective writing instruction can be a critical component in successful learning, and to better understand the role that writing plays in content area learning, this book presents an extensive study of writing assignments in the secondary school curriculum. Following an introduction, the book provides an overview of the project, chapters 1 and 2 highlighting the data gathered and analytical methods used. The third chapter of the book provides a detailed introduction to the observations of teachers and their students, with some general findings about ways in which they used writing in the teaching of academic subjects. The fourth chapter describes the types of writing activities that worked in a variety of content-area classrooms. Chapter 5 shifts focus away from the activities provided and toward the redefinition of teaching and learning that occurred in the classrooms where writing worked best to foster learning. Chapters 6 through 8 examine the kinds of thinking promoted by different types of writing in the classroom. The final chapter brings together concerns

about the roles of teacher and learner in the instructional interaction, providing a theoretical framework, practical suggestions for an alternative model of instruction, and a discussion of the constraints that must be addressed if wide-scale use of writing to support learning is to become a reality. A five-page reference list and two appendices are included. (HTH)

Crazy Animals and Other Activities for Teaching English to Young Learners

Teaching English in Africa is a practical guide written for primary and secondary school teachers working all over the continent. This book relates the practice of English language teaching directly to the African context. As well as covering the underlying theory of how children learn languages and how teachers can best facilitate this learning, it also provides practical resources and ideas for activities and techniques that have proved successful in English classrooms in Africa, both at primary and secondary level. It is intended to be a practical guide, so references and citations are kept to a minimum and concepts are presented using examples that are likely to be familiar to most teachers working in Africa. If there is a bias in this book, it is towards the needs of teachers working in low-resource, isolated contexts in Africa, as these teachers are so often neglected by literature on teaching methodology.
