Finalist for the 2015 Helen Bernstein Book Award for Excellence in Journalism Longlisted for the Lionel Gelber Award for the Best Non-Fiction book in the world on Foreign Affairs An Economist Book of the Year, 2014 A New York Times Book Review Editor's Choice "One of the best analyses of the impact of Tiananmen throughout China in the years since 1989." --The New York Times Book Review On June 4, 1989, People's Liberation Army soldiers opened fire on unarmed civilians in Beijing, killing untold hundreds of people. A quarter-century later, this defining event remains buried in China's modern history, successfully expunged from collective memory. In *The People's Republic of Amnesia*, Louisa Lim charts how the events of June 4th changed China, and how China changed the events of June 4th by rewriting its own history. Lim reveals new details about those fateful days, including how one of the country's most senior politicians lost a family member to an army bullet, as well as the inside story of the young soldiers sent to clear Tiananmen Square. She also introduces us to individuals whose lives were transformed by the events of Tiananmen Square, such as a founder of the Tiananmen Mothers, whose son was shot by martial law troops; and one of the most important government officials in the country, who post-Tiananmen became one of its most prominent dissidents. And she examines how June 4th shaped China's national identity, fostering a generation of young nationalists, who know little and care less about 1989. For the first time, Lim uncovers the details of a brutal crackdown in a second Chinese city that until now has been a near-perfect case study in the state's ability to rewrite history, excising the most painful episodes. By tracking down eyewitnesses, discovering US diplomatic cables, and combing through official Chinese records, Lim offers the first account of a story that has remained untold for a quarter of a century. *The People's Republic of Amnesia* is an original, powerfully gripping, and ultimately unforgettable book about a national tragedy and an unhealed wound.

The Politics of Postmodernity outlines in a clear and coherent manner the implications for political theory that are inherent

in philosophical hermeneutics. Hermeneutics is not only a general theory of human understanding, it is also, in terms of its practical consequences, a general Theory of Democracy. This book demonstrates, with reference to current debates, how hermeneutical theory provides the ultimate philosophical justification for democratic practice and universal human rights. One of the book's most significant features is the way in which it attempts to work through postmodernism and the way in which throughout it shows how hermeneutics, while fully a form of 'postmodern' thought, is nevertheless distinctive in this regard in eschewing all forms of relativism and in resolutely defending a nonessentialist universalism. This book will be of interest to all those concerned with the fate of the core values traditionally defended by philosophy and, indeed, with the future of philosophy itself after postmodernity.

## **Speeches, Messages, and Other Writings of the Hon. Albert G. Brown**

"Now completely revised and updated, this balanced and lively history of the Peoples Republic of China offers a narrative and interpretive appraisal of this great nation since its post-World War II beginnings. Opening with the sweeping changes that occurred when Mao Zedong and the Communists defeated Chiang Kai-shek in 1949 and took over a China which was still reeling from World War II, this text introduces the unique characters and events which have shaped recent Chinese history. It also illuminates such epic events as the Great Leap Forward, the Cultural Revolution, and the post-Mao reforms. This new edition takes into account China's increasing economic liberalization along with its continuing authoritarianism. Including important new materials as well as a thoroughly rewritten final chapter, the third edition of People's China is completely up-to-date, chronologically unpacking the essential story of modern China -- the historical background, the ideologies, the grand economic achievements, and the cruel repression, making it an ideal text for courses in history and political science."--Publisher description.

## **Selected Writings and Speeches of Marcus Garvey**

This anthology contains some of the African-American rights advocate's most noted writings and speeches, among them "Declaration of the Rights of the Negro Peoples of the World" and "Africa for the Africans."

## **Facing Public Interest**

Conceptions of Chinese Democracy provides a coherent and critical introduction to the democratic thought of three fathers of modern Taiwan—Sun Yat-sen, Chiang Kai-shek, and Chiang Ching-kuo—in a way that is accessible and grounded in broader traditions of political theory. David J. Lorenzo's comparative study allows the reader to understand the leaders' democratic conceptions and highlights important contradictions, strengths, and weaknesses that are central to any

discussion of Chinese culture and democratic theory. Lorenzo further considers the influence of their writings on political theorists, democracy advocates, and activists on mainland China. Students of political science and theory, democratization, and Chinese culture and history will benefit from the book's substantive discussions of democracy, and scholars and specialists will appreciate the larger arguments about the influence of these ideas and their transmission through time.

#### **Conceptions of Chinese Democracy**

This volume offers a variety of perspectives on politics and culture. The authors are united in their assumption of, and inquiry into, the pre-existing cultural values and practices that are brought to and reflected in activities of the state, as well as in organized activities against the state. The authors also address the intercultural nature of such political activism. Part One describes ways of configuring politics, culture and communication. Part Two presents case studies that explore the cultural grounds of political activism. The final section introduces a new feature to the Annual: a forum in which scholars question, challenge and explore a topic related to the volume's theme. In this year's forum, four scho

Strictly speaking, there is no such thing as private business since business activities have widespread and sometimes far-reaching impacts on the community. The side-effects of entrepreneurial decision making - increasing unemployment, for instance, or pollution - increasingly expose corporations to the public gaze, with management in the limelight. Facing Public

Interest opens up new vistas on business policy and corporate communications facing public interest. The relationship between private enterprise and public interest is subjected to an ethical examination, highlighting the role of the general public as a locus of morality for business and the guiding concept of a corporate dialogue between management and the concerned public. Instructive case studies are also presented. The volume not only proposes corporate dialogue: it puts into practice. Business leaders, representatives of citizens' groups, public affairs consultants, and academics discuss the topics thoroughly and thoughtfully in the best contributions to the seventh conference on the European Business Ethics Network, held at the University of St. Gallen in September 1994.

### **Inklings of Democracy in China**

Since 1979 China's leaders have introduced economic and political reforms that have lessened the state's hold over the lives of ordinary citizens. By examining the growth in individual rights, the public sphere, democratic processes, and pluralization, the author seeks to answer questions concerning the relevance of liberal democratic ideas for China and the relationship between a democratic political culture and a democratic political system. The author also looks at the contradictory impulses and negative consequences for democracy generated by economic liberalism. Unresolved issues concerning the relationships among culture, democracy, and socioeconomic development are at the heart of the analysis. Nonideological criteria are used to assess the success of the Chinese approach to building a fair, just, and decent society.

Abraham Lincoln measured the promise—and cost—of American freedom in lucid and extraordinarily moving prose, famous for its native wit, simple dignity of expressions, and peculiarly American flavor. This volume, with its companion, *Abraham Lincoln: Speeches and Writing 1859–1865*, comprises the most comprehensive selection ever published. Over 240 speeches, letters, and drafts take Lincoln from rural law practice to national prominence, and chart his emergence as an eloquent antislavery advocate and defender of the constitution. Included are the complete Lincoln-Douglas debates, perhaps the most famous confrontation in American political history.
