Biology for CXC is a comprehensive course for students in their fourth and fifth years of secondary school who are preparing for the CXC Examinations in Biology. The book has seven main sections, each divided into smaller self contained units to allow a flexible approach to teaching and learning.

The Commercial and Financial Chronicle

Shadows of Cavernous Shades

Standard Monomial Theory

This book constitutes the refereed proceedings of the 10th European Conference on Machine Learning, ECML-98, held in Chemnitz, Germany, in April 1998. The book presents 21 revised full papers and 25 short papers reporting on work in progress together with two invited contributions; the papers were selected from a total of 100 submissions. The book is divided in sections on applications of ML, Bayesian networks, feature selection, decision trees, support vector learning,

multiple models for classification, inductive logic programming, relational learning, instance-based learning, clustering, genetic algorithms, reinforcement learning and neural networks.

The Commercial & Financial Chronicle

Packed with fascinating discoveries and facts, Science Year by Year takes kids on a fantastic visual journey through time, from stone tools and simple machines to rockets and robots. Easy-to-follow illustrated timelines of pivotal scientific developments explore the ideas, experiments, and technologies that have shaped our daily lives over the past 2.5 million years. With more than 1,200 images, in-depth explanations of key inventors and innovations, quotes from groundbreaking scientists like Marie Curie, and stunning "moment in time" images of key events such as the first human landing on the moon, kids are sure to be amazed on every page. Young readers can learn about the early understanding of gravity, the discovery of dinosaur fossils, the first open heart surgery in human history, and

much more. Created in association with the Smithsonian Institution, Science Year by Year will fascinate kids as they go on an amazing journey through time, tracing key moments in the history of science and technology along the way.

Schubert varieties provide an inductive tool for studying flag varieties. This book is mainly a detailed account of a particularly interesting instance of their occurrence: namely, in relation to classical invariant theory. More precisely, it is about the connection between the first and second fundamental theorems of classical invariant theory on the one hand and standard monomial theory for Schubert varieties in certain special flag varieties on the other.
