THE LEGEND AND MYSTERY OF RIGEL On a frigid night in 1912 the great unsinkable Titanic sank 2 miles down to a watery grave. Many stories of heroes and villains have been passed down since that fateful night. Yet there is one hero in particular whose story has remained a mystery. Meet Rigel- the Titanic's Newfoundland dog mascot. His incredible story of courage and survival was originally published as an alleged factual account in 1912 just days after the

sinking. Come along and enjoy this fictionalized story of Rigel's tragedy and triumph in spite of challenges no human could have survived! * * * Yes Virginia, there may have been a Rigel. The story of Rigel was first reported in the "New York Herald" the day the Carpathia docked with Titanic's survivors. It also appeared in a well-known book: " The Sinking of Titanic and Great Sea Disasters" which was first published in 1912 a few short months after the disaster. After that there was no mention of him at all, no disclaimers, no retractions, nothing to my knowledge. Although there has been some recent mention of him in dog books all subsequent books and movies about Titanic by historians, crew and survivors don't mention him either. Why? Was he a figment of the reporter's imagination? That seems unlikely. If Rigel and new owner didn't exist then who was interviewed? Someone playing a cruel joke while wearing a uniform and holding onto a 150-pound dog? Unlikely again, but I suppose that could have happened. The only two well-known dogs that survived the sinking were toy breeds lovingly smuggled on board the lifeboats in their owner's coats. All of the other dogs on board lost their lives including a champion English Bulldog who was last seen trying to swim in the frigid water. Comparing a bulldog's swimming ability to a Newfoundland's is like expecting your Shetland Pony to win the Kentucky Derby. Bulldogs are among the worst swimmers in dog-dom and Newfoundlands are the absolute best. Many people are skeptical as to whether any creature could have survived a long distance swim in freezing water. Certainly none of the people did. "Newfie" owners and breeders have no problem believing a Newfoundland could do exactly what

the record states. Bred to withstand the harsh conditions of the frigid north Atlantic they have been used to haul in heavy fishing nets and assist in water rescues. Newfoundlanders could be called the "Polar bears" of the dog world. They have the same adaptations for swimming albeit on a smaller scale. And since Scientists have seen Polar Bears swimming 100 miles out to sea in freezing water and not looking the least bit exhausted, then why not? The near lifeboat collision was also never mentioned again. Perhaps it was dropped purposely. No one wanted to detract from the heroics of the Carpathia and crew. After pushing their small steamer full speed into the very same icefield that doomed Titanic, they deserved all the credit and praise that was bestowed on them. Finally there is the Jonas Briggs mystery. He isn't listed on either ship's crew list for that year. For many that is proof positive this was nothing more than a hoax. Apparently these people have never done genealogy research. Our ancestors were not sticklers for detail. Sometimes they'd spell names phonetically. Other times they'd scribble a name and then not be able to decipher it. I found one of my ancestor's names spelled 4 different ways. One spelling was way off. I changed Jonas to John in my book, a common name that could have been mistaken for Jonas. Taking into account the pandemonium surrounding the Carpathia's arrival there would certainly be some examples of miscommunication.

Geography of the Gaze offers a new history and theory of how the way we look at things influences what we see. Focusing on Western Europe from the seventeenth to nineteenth centuries, Renzo Dubbini shows how developments in science, art, mapping, and visual epistemology affected the ways natural and artificial landscapes were perceived and portrayed. He begins with the idea of the "view," explaining its role in the invention of landscape painting and in the definition of landscape as a cultural space. Among other topics, Dubbini explores how the descriptive and pictorial techniques used in mariners' charts, view-oriented atlases, military cartography, and garden design were linked to the proliferation of highly realistic paintings of landscapes and city scenes; how the "picturesque" system for defining and composing landscapes affected not just art but also archaeology and engineering; and how the ever-changing modern cityscapes inspired new ways of

seeing and representing the urban scene in Impressionist painting, photography, and stereoscopy. A marvelous history of viewing, *Geography of the Gaze* will interest everyone from scientists to artists.

Manual for Courts Martial 2012

The more modern culture shines its light on sex, the longer the shadow it casts. This shadow is commercialism, pornography and shame. This approach to sexuality distorts it to create performance pressure, increasing numbers of sexual 'dysfunctions' and a fundamental disconnect from ourselves and others. Yet sexuality is one of the most important paths to happiness, simply because it requires us to engage all the other aspects of ourselves. To have deeply satisfying sex we must engage the mind, the body and our feelings. Real Sex will show you how almost everything that our society has tried to teach you about your sexuality is misleading or simply wrong. Real Sex is a journey into the heart of your sexual self; a way of creating meaningful and fulfilling intimacy. It sets out seven keys that will teach you how to love and accept your mind, body, feelings, desires and sexuality at a deeper level, leaving behind feelings of guilt, insecurity and shame. Real Sex offers a new, integrated idea of sexuality that holds a positive perspective of the sexual beings that we are; longing for intimacy and aliveness that we know deep down makes our lives meaningful.

Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

Orgasms

Henry Miller's monumental venture in self-revelation was begun with his Tropic of Cancer and Tropic of Capricorn, which on their American publication were hailed as "miraculous," "superb," "ribald," "brilliant," and "shamelessly shocking." Sexus is the first volume of a series called The Rosy Crucifixion, in which Miller completes his major life work. It was written in the United States during World War II, and first published in Paris in 1949. Of this remarkable project, Lawrence Durrell has said: "The completion of his seven-volume autobiography, if it fulfills the promise of what he has already given us, will put his name amongst the three or four great figures of the age."
