QUANTUM VIBE

Typographic organization has always been a complex system in that there are so many elements at play, such as hierarchy, order of reading, legibility, and contrast. In *Typographic Systems*, Kim Elam, author of our bestselling books, *Geometry of Design* and *Grid Systems*, explores eight major structural frameworks beyond the gridincluding random, radial, modular, and bilateralsystems. By taking the reader through exercises, student work, and professional examples, Elam offers a broad range of design solutions. Once essential visual organization systems are understood the designer can fluidly organize words or images within a structure, combination of structures, or a variation of a structure. With clarity and substance, each systemfrom the structured axis to the nonhierarchical radial arrayis explained and explored so that the reader comes away with a better understanding of these intricate complex arrangements. *Typographic Systems* is the seventh title in our bestselling *Design Briefs* series, which has sold more than 100,000 copies worldwide.

John Mellencamp is one of the true Renaissance men of popular music. In the public spotlight for over twenty-five years, with a string of number one hits and multiplatinum records side to his artistic talent that is celebrated in the full-color selection of evocation paintings. Mellencamp began pursuing oil painting in 1988 as a means of further artistic exploration. His first subjects were friends, family, and landscapes reminiscent of the French impressionists, which have since evolved into a personal style of portraiture. Critics have drawn parallels between Mellencamp's work and the dark, shadowy paintings of the German expressionists. Mellencamp believes in art as a means of self-exploration and as an incentive to make people more curious about the world. He has exhibited extensively in the Midwest and the South, and most of his paintings have been purchased for private collections. With seventy-five full-color representations of the artist's favorite paintings, twenty-five black-and-white photographs taken from his personal collection, and an introduction by Billboard magazine's editor-in-chief, Timothy White, Mellencamp: Paintings and Reflections is the perfect gift for any Mellencamp fan or anyone who appreciates fine art. --This text refers to an out of print or unavailable edition of this title.

Fundamentals of Anatomy and Physiology

In the late nineteenth and early twentieth centuries, working-class Americans had eating habits that were distinctly shaped by jobs, families, neighborhoods, and the tools, utilities, and size of their kitchens—along with their cultural heritage. *How the Other Half Ate* is a deep exploration by historian and lecturer Katherine Turner that delivers an unprecedented and thoroughly researched study of the changing food landscape in American working-class families from industrialization through the 1950s. Relevant to readers across a range of disciplines—history, economics, sociology, urban studies, women's studies, and food studies—this work fills an important gap in historical literature by illustrating how families experienced food and cooking during the so-called age of abundance. Turner delivers an engaging portrait that shows how America's working class, in a multitude of ways, has shaped the foods we eat today.

Girls on City Streets

The United States and its joint forces must be able to respond to challenges across the full spectrum of conflict. Our tendency as a country to ignore forms of conflict that are not conventional and kinetic in character has impeded our performance in the past and will continue to do so until we grasp the full set of conflict types. A variety of terms are used to describe unconventional forms of warfare: hybrid warfare, indirect warfare, the gray zone, and others. Americans are used to thinking of a binary state of either war or peace. That is the way our organizations, doctrine, and approaches are geared. Other countries, including Russia, China, and Iran, use a wider array of centrally controlled, or at least centrally directed, instruments of national power and influence to achieve their objectives. Whether it is contributing to foreign political parties, targeted assassinations of opponents, infiltrating non-uniformed personnel such as the little green men, traditional media and social media, influence operations, or cyber-connected activity, all of these tactics and more are used to advance their national interests and most often to damage American national interests. These tactics are not new. The historical records suggest that hybrid warfare in one form or another may well be the norm for human conflict, rather than the exception.
