Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them. "Golf's Grand Design," prepared as a companion volume to the PBS documentary of the same name, expands upon the information presented in the television program. Co-authored by Bob Cupp, one of America's leading golf course designers, and Ron Whitten, Golf Digest's longtime senior editor on golf architecture, the book features rare sketches and diagrams of golf holes—some never before published—by 34 past and present golf architects, including Alister MacKenzie, Pete Dye, Bill Coore, Ben Crenshaw, Tom Doak, Gil Hanse, Doug Carrick, Steve Smyers and David McLay Kidd. In each chapter, based upon one of the drawings, Cupp and Whitten explore a different facet of the course depicted and present unique perspectives into the craft and art of golf course architecture. These sketches are the vehicles by which design becomes grass. They are not AutoCAD plottings used to clear permits (full of technicalities practically indecipherable by everyday folks), but intimate, immediate and sometimes idiosyncratic streams of consciousness that are handed to a bulldozer operator, along with words of instruction, which become reality; the very crux of golf design. These drawings seldom survive; ending up as grocery lists, note pads or even shelf paper. But if one comes back to the designer after the fact - after the hole has been played and proclaimed fun, the drawings become treasures. Written in a lively conversational format, "Golf's Grand Design" takes readers behind the scenes in the creation of many of America's finest courses, from the modest-budget Bully Pulpit in North Dakota to the mega-budget Shadow Creek in Nevada. The authors retell the discovery of the land that became the groundbreaking Sand Hills Golf Club in Nebraska and relate the extensive process required to complete the environmentally-sensitive Liberty National in New Jersey. They take readers behind the scenes with Jack Nicklaus at work and at play, analyze what made Donald Ross and A.W. Tillinghast such great architects, offer insights into

the little-known design talents of PGA Tour Hall of Famers Tom Kite and Tom Watson and pass along revelations regarding such famous holes as “The Cape” and “The Redan.” They conclude with a short discussion of the impact that technology has had on the world of golf. "Golf's Grand Design" is intended for all who enjoy golf or who, by virtue of these stories, might consider the game. It provides a fresh approach to understanding and appreciating good golf architecture. It will certainly be one of those books with a long shelf life because its content is not trendy but factual. It is the story of American golf and a living description of the creative process of a game that somehow worked its way into our very souls.

So many works of golfing history focus on the greats: the best players, the most prestigious championships, the hardest courses, and the like. But most avid golfers are average players, relishing in the joy of the sport itself. In Golf's Iron Horse, celebrated golf writer John Sabino chronicles the previously untold story of Ralph Kennedy, a golf amateur whose love of the game set him on par to play more courses than anyone before. A founding member of Mamaroneck, New York's prestigious Winged Foot Golf Club, Kennedy had long been an avid golfer when he met Charles Leonard Fletcher in 1919. When the Englishman told Kennedy that he had played more than 240 courses in his lifetime, Kennedy took it as a challenge and became determined to play more. In a feat that caused the New York Sun to declare him "golf's Lou Gehrig" in 1935, Kennedy succeeded in beating Fletcher's record, and then some. He played golf on more than 3,165 different courses in all forty-eight states, nine Canadian provinces, and more than a dozen different countries during his forty-three year love affair with the game. In addition to the 3,165 unique courses he played, the unrelenting Ralph also played golf a total of 8,500 times over his lifetime, the equivalent of teeing it up every day for twenty-three straight years. Lou Gehrig's seventeen years in professional baseball pales in comparison. This intriguing story includes details of the special conditions under which he was able to play the Augusta National Golf Club and the unique circumstances of his visits to Pebble Beach and
