The classic, intimate, and magisterial biography of JFK In January 1953, freshman

senator John F. Kennedy of Massachusetts hired a twenty-four-year-old from Nebraska as his Number Two legislative assistant—on a trial basis. Despite the differences in their backgrounds, in the eleven years that followed Sorensen became known as Kennedy's intellectual blood bank, top policy aide, and alter ego. Sorensen knew Kennedy the man, the senator, the candidate, and the president as no other associate did throughout these eleven years. He was with him during the key crises and turning points—including the spectacular race for the vice presidency at the 1956 convention, the launching of Kennedy's presidential candidacy, the speech to the Protestant clergy of Houston, the TV debates with Nixon, and election night at Hyannis Port. The first appointment that Kennedy made as a new president was Ted Sorensen as his Special Counsel. Kennedy is an account of this president's failures as well as successes, told with surprising candor and objectivity. Sorensen relates the role of the White House staff and evaluates Kennedy's relations with his Cabinet and other appointees, reveals Kennedy's errors on the Bay of Pigs and his attitudes toward the press, Congress, and the Joint Chiefs of Staff, and details his actions in the Cuban missile crises and the evolution of his beliefs on civil rights and arms control. Three months to the day after Dallas, Sorensen left the White House to write the account of those eleven years that only he could write. First published in 1965, Kennedy is an intimate biography of an extraordinary man, and one of the most important sources of history in this century.

Presenting his view of life as "optimism triumphant," Dr. Ken Merz, Sr., reflects on the limits of life, the limits of the physical universe, and the role of humans in that universe. King Solomon, the Bible's wisest king, was possessed of extraordinary wealth. The grand temple he built in Jerusalem was covered in gold. Over the ages, many have sought to find the source of the great king's wealth -- but none with so much flair, wit, or whimsy as Tahir Shah. Intrigued by a map he finds in a shop not far from the site of the temple, Shah assembles a multitude of clues to the location of Solomon's mines. From ancient texts to modern hearsay, all point across the Red Sea to Ethiopia. Shah's trail takes him on a wild ride by taxi, bus, camel, and donkey to the gold-bearing corners of this storied and beautiful country. He interviews the hyena man of Harar, is hauled up on a rope to enter a remote cliff-face monastery, and stumbles upon an illegal gold mine where thousands of men, women, and children dig with their hands. But the hardest leg of the journey is to the accursed mountain of Tullu Wallel, where legend says the devil keeps watch over the entrance to an ancient mine shaft Book jacket.

Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the Internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.
