The second revised edition of "Basic Documents on International" "Migration Law" brings together in a single volume the principal international conventions, declarations and instruments governing international migration in the form in which they stood as of early 1997. It contains the texts of these materials (or, where appropriate, extracts from the texts) together with information on the current state of ratification of each instrument and indications of any reservations, interpretative declarations or other statements made by the States parties. The book begins with excerpts from general multilateral texts, ranging from the Universal Declaration of Human Rights to the Vienna Declaration of 1993. This is followed by instruments governing nationality and statelessness; materials relating to refugees; and texts emanating from the Council of Europe, the Conference on Security and Cooperation in Europe, the European Community and Union and the International Labour Organization. The selection ends with a miscellany of texts of general significance, from the Inter-American Convention on Territorial Asylum of 1954 to the Convention of Human Rights concluded by the Commonwealth of Independent States in 1995. This publication is not intended for scholars alone, but also for practitioners in migration law. The texts are of practical significance for those concerned with the administration of the laws affecting migration and for representatives of those affected by these laws. It also serves as a companion to Richard Plender's monograph, "International Migration Law."

Laws, Ordinances and Documents, Relating to the Baltimore and Ohio Rail Road Company

United Nations peacekeepers currently play a crucial role in international responses to threats to peace and security across the globe. Since 1948 the UN has been involved in over 60 peacekeeping operations. However in the current environment of complex and rapidly changing threats to peace, there has been a dramatic increase in the use of UN peacekeepers to deal with situations of instability. In 2009 alone over 100,000 individuals are deployed on such missions. This situation has resulted in a range of new and pressing challenges to the legal framework applicable during such collective international action. This book provides, for the first time, a comprehensive account of the legal framework regulating this area of collective international action. The book contains key documents in the areas of privileges and immunities, human rights law, international humanitarian law, and international criminal law. Types of documents featured include foundational

treaties, international rules and regulations, memoranda, judgments of the International Court of Justice, and some mission specific documents. Before each document a prefatory note is included, outlining the historical development of the document as well as its relevance to UN peace operations. To further assist scholars and practitioners in their work, the work concludes with a guide on undertaking further legal research on the laws relevant to peace operations, a list of all UN peace operations and relevant enabling resolutions, and a suggested approach to interpreting Security Council mandates. From scholars and students to policy makers, representatives in the military, police and humanitarian organizations - this book will be an invaluable resource in the development of a better understanding of the legal framework surrounding the establishment, management, and conduct of peace operations that are mandated and controlled by the UN.

Joint Documents for the Year

International Law Documents Relating to Terrorism

The first edition of this book became a standard work in the field, and it has been extensively revised and updated for the second edition. It is prepared with assistance from the official Depositories of the various international agreements, and is an essential reference book for statesmen and diplomats, lawyers, journalists, and students of international relations and law. From reviews of the first edition: `Roberts and Guelff rely on the documents to speak for themselves, and are right to do so. Their becoming generally available in this neat and usable form is an event of much importance for all who take a serious interest in humanitarian law and endeavour, and the limitation of men's violence towards men.'New Society

This book examines the issue of free access to information as part of the openness and transparency principles. The free access to public information has become one of the most hotly contested aspects of contemporary government and public administration. Many countries in Europe have well-established Freedom of Information laws (FOIAs), while others have adopted them more recently. The problems that occur in the implementation of FOIAs are different due to the legal and institutional context; nevertheless, patterns of best practices and malfunctioning are comparable. The book analyses in comparative and empirical perspective the respective main challenges. Whilst the existing literature focusses on the legal provisions, this book offers practical insights through 13 national profiles and the EU level, on how effective the legal provisions of FOIAs really prove to be.
