Professor Maxwell's Duplicitous Demon

Naomi Judd's life as a country music superstar has been nonstop success. But offstage, she has battled incredible adversity. Struggling through a childhood of harsh family secrets, the death of a young sibling, and absent emotional support, Naomi found herself reluctantly married and an expectant mother at age seventeen. Four years later, she was a single mom of two, who survived being beaten and raped, and was abandoned without any financial support and nowhere to turn in Hollywood, CA. Naomi has always

been a survivor: She put herself through nursing school to support her young daughters, then took a courageous chance by moving to Nashville to pursue their fantastic dream of careers in country music. Her leap of faith paid off, and Naomi and her daughter Wynonna became The Judds, soon ranking with country music's biggest stars, selling more than 20 million records and winning six Grammys. At the height of the singing duo's popularity, Naomi was given three years to live after being diagnosed with the previously incurable Hepatitis C. Miraculously, she overcame that too and was pronounced completely cured five years later. But Naomi was still to face her most desperate fight yet. After finishing a tour with Wynonna in 2011, she began a three-year battle with Severe Treatment Resistant Depression and anxiety. She suffered through frustrating and dangerous roller-coaster effects with antidepressants and other drugs, often terrifying therapies and, at her absolute lowest points, thoughts of suicide. But Naomi persevered once again. RIVER OF TIME is her poignant message of hope to anyone whose life has been scarred by trauma.

Black Panther: Long Live the King (Marvel Premiere Graphic Novel)

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Myths, Lies and Old Age: a collection of poems by Bob Eccleston. Within these pages there are myths: some known, some newly created, some yet to occur and some which may prove to be reality. There are vistas of old age from a viewpoint which does not preclude a future or a sense of humour; where the use of set forms indicates maturity and balance. There are lies aplenty although different readers may have different views as to where they occur. There is love and murder, hope and despair, tragedy and comedy; even nonsense. There is a modicum of sex involving two amorous seals. In short, there is variety and, hopefully, enjoyment.

"Mary Ellen Mark fell in love with the Indian circus in 1969, during her first trip to India. As she watched a huge hippopotamus walk around the ring with its mouth wide open, wearing a pink tutu, she was struck by the beauty and innocence of the show. She returned to India many times, and in 1989 and 1990 she devoted six months to photographing eighteen circuses, following them around the continent by train, plane, van, and auto-rickshaw. Secretive, highly competitive, and each a closed, self-sufficient society, the circuses embody what Mark calls "a poetry and a craziness that are still uncorrupted, and honest, and pure."" "Beautifully printed in tritone, this remarkable collection of photographs captures the texture of

circus life outside of the ring - exhausting, humorous, poignant, and often bizarre - as well as the affection and devotion that the performers have for each other and their animals." The photographs are not only compelling portraits of the performers, but also eloquent and poetic narratives about life in the Indian circus."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Ralph Compton One Man's Fire

This cookbook was written for all the dogs who rely on their master for all their needs and ask nothing in return. Good nutrition is as important to your dog as it is to you. Cancer is the leading cause of death in dogs and cats today, so the food they ingest is paramount to their health, as well as exercise and annual visits to the veterinarian. This cookbook was written to have fun in the kitchen cooking delicious recipes that your dog will love. He will probably join you in the kitchen when he starts to know that the aroma of good food is for him. P.J.'s Bichon Frise lived to be 22 years old and spunky to the end of her life. P.J. attributes her Bichon Frise's excellent health to the meals she cooked for her, long before the pet food recall scare. You have control of all the ingredients your dog eats. If your dog had to cook for you, don't you think it would give you the best possible food to keep you healthy and living longer? You bet they would. Do you feed your dog the same thing, day after day, week after week? Yuk. This cookbook will get you out of this rut and you will see a happier and healthier dog if you start

Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key Features A go-to guide to help you master AI algorithms and concepts 8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillance Use TensorFlow, Keras, and other Python libraries to implement smart AI applications Book Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and

create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn

Build an intelligent machine translation system using seq-2-seq neural translation machines
Create AI applications using GAN and deploy smart mobile apps using TensorFlow
Translate videos into text using CNN and RNN
Implement smart AI Chatbots, and integrate and extend them in several domains
Create smart reinforcement, learning-based applications using Q-Learning
Break and generate CAPTCHA using Deep Learning and Adversarial Learning

Who this book is for
This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

Unconquerable Nation

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

This title includes a number of Open Access chapters. The twenty-first century world faces several enormous challenges: how to mitigate climate change, meet a growing energy demand without relying on fossil fuels, and manage the escalating quantities of solid waste generated by cities around the world. This compendium volume offers a viable

solution to all three: using solid waste as a renewable resource. Intended for a wide audience ranging from engineers and academics to decision-makers in both the public and private sectors, this volume has gathered together research into a range of technologies and methodologies. The editors, two well-published researchers at the top of their field, have selected articles that lay the foundation for this discussion. They have then included chapters for the following waste management scenarios: anaerobic digestion, composting, pyrolysis and chemical upgrading, incineration and carbonization, and gasification. Research has been included from around the world, representing potential international solutions to what are global challenges, as well as crucial implications for ongoing research in this important field of study.

Sir Arthur Ignatius Conan Doyle DL (22 May 1859 - 7 July 1930) was a Scottish physician and writer who is most noted for his fictional stories about the detective Sherlock Holmes, which are generally considered milestones in the field of crime fiction. He is also known for writing the fictional adventures of a second character he invented, Professor Challenger, and for popularising the mystery of the Mary Celeste. He was a prolific writer whose other works include fantasy and science fiction stories, plays, romances, poetry,

non-fiction, and historical novels. Sherlock Holmes is a fictional detective created by Scottish author and physician Sir Arthur Conan Doyle, a graduate of the University of Edinburgh Medical School. A London-based "consulting detective" whose abilities border on the fantastic, Holmes is famous for his astute logical reasoning, his ability to adopt almost any disguise, and his use of forensic science skills to solve difficult cases. Holmes, who first appeared in publication in 1887, was featured in four novels and 56 short stories. The first novel, *A Study in Scarlet*, appeared in Beeton's Christmas Annual in 1887 and the second, *The Sign of the Four*, in Lippincott's Monthly Magazine in 1890. The character grew tremendously in popularity with the first series of short stories in *The Strand Magazine*, beginning with "A Scandal in Bohemia" in 1891; further series of short stories and two novels published in serial form appeared between then and 1927. The stories cover a period from around 1880 up to 1914. All but four stories are narrated by Holmes's friend and biographer, Dr. John H. Watson; two are narrated by Holmes himself ("The Blanched Soldier" and "The Lion's Mane") and two others are written in the third person ("The Mazarin Stone" and "His Last Bow"). In two stories ("The Musgrave Ritual" and "The Gloria Scott"), Holmes tells Watson the main story from his memories, while Watson becomes the narrator of the frame story. The first and fourth novels, *A Study in Scarlet* and *The Valley of Fear*, each include a long interval of omniscient narration recounting events unknown to either Holmes or Watson.

separatist Liberation Tigers of Tamil Eelam (LTTE) are no longer carrying out political assassinations and suicide attacks, yet structural violence continues, and has arguably intensified since the war's end. Anti-Tamil discrimination, anti-Muslim violence, and Sinhala Buddhist majoritarianism all increased in the war's aftermath, as President Mahinda Rajapakse's government invoked its military victory over the LTTE to silence any opposition. The election of Maithripala Sirisena as president in January 2015 began to alleviate some of the worst of these post-war abuses of power, but many long-term problems will take longer to solve. This book brings together scholars in the fields of anthropology, sociology, history, law, religious studies and diaspora studies to critically engage issues such as post-war development, constitutional reform, ethnic and religious identity, transnational activism, and transitional justice. Through an interdisciplinary approach to post-war Sri Lanka, this volume examines the intractable and complex issues that continue to plague this war-torn island.

Asked to name a great physicist, most people would

mention Newton or Einstein, Feynman or Hawking. But ask a physicist and there's no doubt that James Clerk Maxwell will be near the top of the list. Maxwell, an unassuming Victorian Scotsman, explained how we perceive colour. He uncovered the way gases behave. And, most significantly, he transformed the way physics was undertaken in his explanation of the interaction of electricity and magnetism, revealing the nature of light and laying the groundwork for everything from Einstein's special relativity to modern electronics. Along the way, he set up one of the most enduring challenges in physics, one that has taxed the best minds ever since. 'Maxwell's demon' is a tiny but thoroughly disruptive thought experiment that suggests the second law of thermodynamics, the law that governs the flow of time itself, can be broken. This is the story of a groundbreaking scientist, a great contributor to our understanding of the way the world works, and his duplicitous demon.
