The British Army of the Eighteenth Century

Huddersfield's Roll of Honour 1914-1922 is a detailed account of 3,439 service personnel from Huddersfield who lost their lives during the First World War. In the Preface, HRH The Duke of York KG writes: This publication represents the lifetime work of Margaret Stansfield who sadly passed away in 2012. Margaret spent 30 years compiling the 3,439 biographical entries giving a poignant insight into the background, working lives and families of those who selflessly left Huddersfield to fight for their country never to return. Along with the biographical accounts there are many moving letters to the families of soldiers who lost their lives reflecting an attempt to bring comfort amid the darkness that their loss brought to both families and comrades alike.

A cutting exploration of how cities drive climate change while being on the frontlines of the coming climate crisis How will climate change affect our lives? Where will its impacts be most deeply felt? Are we doing enough to protect ourselves from the coming chaos? In *Extreme Cities*, Ashley Dawson argues that cities are ground zero for climate change, contributing the lion's share of carbon to the atmosphere, while also lying on the frontlines of rising sea levels. Today, the majority of the world's megacities are located in coastal zones, yet few of them are adequately prepared for the floods that will increasingly menace their shores. Instead, most continue to develop luxury waterfront condos for the elite and industrial facilities for corporations. These not only intensify carbon emissions, but also place coastal residents at greater risk when water levels rise. In *Extreme Cities*, Dawson offers an alarming portrait of the future of our cities, describing the efforts of Staten Island, New York, and Shishmareff, Alaska residents to relocate; Holland's models for defending against the seas; and the development of New York City before and after Hurricane Sandy. Our best hope lies not with fortified sea walls, he argues. Rather, it lies with urban movements already fighting to remake our cities in a more just and equitable way. As much a harrowing study as a call to arms *Extreme Cities* is a necessary read for anyone concerned with the threat of global warming, and of the cities of the world.

Tourism Management

In *The Merchants of Siberia*, Erika Monahan reconsiders commerce in early modern Russia by reconstructing the trading world of Siberia and the careers of merchants who traded there. She follows the histories of three merchant families from various social ranks who conducted trade in Siberia for well over a century. These include the Filat'evs, who were among Russia's most illustrious merchant elite; the Shababins, Muslim immigrants who mastered local and long-distance trade while balancing private endeavors with service to the Russian state; and the Noritsyns, traders of more modest status who worked sometimes for themselves, sometimes for bigger merchants, and participated in the emerging Russia-China trade. Monahan demonstrates that trade was a key component of how the Muscovite state sought to assert its authority in the Siberian periphery. The state's recognition of the benefits of commerce meant that Russian state- and empire-building in Siberia were characterized by accommodation; in this diverse borderland, instrumentality trumped ideology and the Orthodox state welcomed Central Asian merchants of Islamic faith. This reconsideration of Siberian trade

invites us to rethink Russia's place in the early modern world. The burgeoning market at Lake Yamysh, an inner-Eurasian trading post along the Irtysh River, illuminates a vibrant seventeenth-century Eurasian caravan trade even as Europe-Asia maritime trade increased. By contextualizing merchants and places of Siberian trade in the increasingly connected economies of the early modern period, Monahan argues that, commercially speaking, Russia was not the "outlier" that most twentieth-century characterizations portrayed.

Created in the Image of God

Social advantage and disadvantage are potent catch-all terms. They have no established definition but, considered in relation to one another, they can embrace a wide variety of more specific concepts that address the ways in which human society causes, exacerbates or fails to prevent social divisions or injustices. This book captures the sense in which any conceptualisation of disadvantage is concerned with the consequences of processes by which relative advantage has been selectively conferred or attained. It considers how inequalities and social divisions are created as much by the concentration of advantage among the best-off as by the systematic disadvantage of the worst-off. The book critically discusses - from a global and a UK perspective - a spectrum of conceptual frameworks and ideas relating to poverty, social exclusion, capability deprivation, rights violations, social immobility, and human or social capital deficiency. It addresses advantage and disadvantage from a life course perspective through discussions of family and childhood, education, work, old age, and the dynamics of income and wealth. It considers cross-cutting divides that are implicated in the social construction and maintenance of advantage and disadvantage, including divisions premised on gender, 'race', ethnicity, migration and religion, neighbourhood and the experience of crime.

Mapping Colonial Conquest

Brief, simplified tales introduce youngsters to the gods and goddesses of ancient Greek mythology.

The Road to Botany Bay, first published in 1987 and considered a classic in the field of cultural and historical geography, examines the poetic constitution of colonial society. Through a far-reaching exploration of Australia's mapping, narrative description, early urbanism, and bush mythology, Paul Carter exposes the mythopoetic mechanisms of empire. A powerfully written account of the ways in which language, history, and geography influenced the territorial theater of nineteenth-century imperialism, the book is also a call to think, write, and live differently.

The Road to Botany Bay

This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

Social Advantage and Disadvantage

Tourism Management, Marketing, and Development revolves around the implementation of ICT applications in the tourism sector: technology is engendering a major shift both in the performance of individuals and companies involved in the tourism sector and having an impact on the way individuals consume services and enjoy experiences in space and time.

The Merchants of Siberia

"This catalogue examines one of the most important educational tools and sources of inspiration for Western artists for over five hundred years: drawing after the Antique. From the Renaissance to the 19th century, classical statues offered young artists idealised models from which they could learn to represent the volumes, poses and expressions of the human figure and which, simultaneously, provided perfected examples of anatomy and proportion. For established artists, antique statues and reliefs presented an immense repertory of forms that they could use as inspiration for their own creations. Through a selection of thirty-nine drawings, prints and paintings, covering more than four hundred years and by artists as different as Federico Zuccaro, Hendrick Goltzius, Peter Paul Rubens, Charles-Joseph Natoire, Henry Fuseli and Joseph Mallord William Turner, this catalogue provides the first overview of a phenomenon crucial for the understanding and appreciation of European art."--Page 2 of cover.

South Carolina Baptists, 1670-1805

Why did Napoleon succeed in 1805 but fail in 1812? Were the railways vital to Prussia's victory over France in 1870? Was the famous Schlieffen Plan militarily sound? Could the European half of World War II have been ended in 1944? These are only a few of the questions that form the subject-matter of this meticulously researched, lively book. Drawing on a very wide range of unpublished and previously unexploited sources, Martin van Creveld examines the 'nuts and bolts' of war: namely, those formidable problems of movement and supply, transportation and administration, so often mentioned - but rarely explored - by the vast majority of books on military history. In doing so he casts his net far and wide, from Gustavus Adolphus to Rommel, from Marlborough to Patton, subjecting the operations of each to a thorough analysis from a fresh and unusual point of view. The result is a fascinating book that has something new to say about virtually every one of the most important campaigns waged in Europe during the last two centuries.

In Mapping Colonial Conquest, cartography is revealed to be the product of powerful social formations — fiscal, dynastic, military, commercial, and imperial — informing not only where we see ourselves in the world, but also how our cultural, historical, and economic identities have developed over time. This book is a cross-disciplinary survey of the history of cartography in Australia and Southern Africa and charts the trajectories of both colonial conquest and mapping technologies in both regions.

Curious Encounters

Principles and Recommendations for Population and Housing Censuses

This book, translated from the original Spanish, is the primary academic and historical study of the Blue Division -- a Falangist initiative involving the dispatch of some forty-thousand Spanish combatants (over a half of whom paid with their lives, health, or liberty) to the Russian Front during the Second World War. Xavier Moreno Juliá does not limit himself to relating their deeds under arms, but also analyses -- for the first time -- the political background in detail: the complex relations between the Spanish government and Hitler's Germany; the internal conflicts between the Falangists and the Army; the rise and fall of Franco's brother-in-law, Minister Ramón Serrano Suñer, who inspired the Blue Division and became the second most powerful person in Spain; and the attitude of General Agustín

Muñoz Grandes, commander of the Blue Division, who was encouraged by Berlin to seriously consider the possibility of taking over the reins of Spanish power. In the end, there were 45,500 reasons that led to joining the Blue Division -- one for each young man who decided to enlist. To understand all of the complex reasons behind their military service under German command is impossible at this juncture. It is an irrecoverable past that lies in Spanish cemeteries and on the Russian steppes. This book, based on massive documentation in German, British and Spanish archives, is an essential source of information to understand Spain in the 1940s -- an epoch when the Caudillos power and the regimes good fortune were less secure than is often believed. Published in association with the Cañada Blanch Centre for Contemporary Spanish Studies, LSE.

Joining Hitler's Crusade

As the Holocaust passes out of living memory, future generations will no longer come face-to-face with Holocaust survivors. But the lessons of that terrible period in history are too important to let slip past. *How Was It Possible?*, edited and introduced by Peter Hayes, provides teachers and students with a comprehensive resource about the Nazi persecution of Jews. Deliberately resisting the reflexive urge to dismiss the topic as too horrible to be understood intellectually or emotionally, the anthology sets out to provide answers to questions that may otherwise defy comprehension. This anthology is organized around key issues of the Holocaust, from the historical context for antisemitism to the impediments to escaping Nazi Germany, and from the logistics of the death camps and the carrying out of genocide to the subsequent struggles of the displaced survivors in the aftermath. Prepared in cooperation with the Jewish Foundation for the Righteous, this anthology includes contributions from such luminaries as Jean Ansel, Saul Friedlander, Tony Judt, Alan Kraut, Primo Levi, Robert Proctor, Richard Rhodes, Timothy Snyder, and Susan Zuccotti. Taken together, the selections make the ineffable fathomable and demystify the barbarism underlying the tragedy, inviting readers to learn precisely how the Holocaust was, in fact, possible.

Leichhardt Historical Journal No 24

This book, originally published in 1977 examines in detail the organisation, training, and personnel of the British Army during the eighteenth century, and explains how the government policies of containing the enemy and colonial conquest were achieved. It also illustrates how the Army survived the constant nervousness of Parliament in reducing its strength after each emergency had passed. There are specific chapters devoted to the strategies of Marlborough, Amherst and Howe and to tactics as displayed at the battles of Ramillies, Fontenoy, Camden and Guildford Court House.
