### WALNECK'S CLASSIC CYCLE TRADER, NOVEMBER 2005

The story of an iconic model in the long history of Harley-Davidson motorcycles, the WLA, which was used by Allied forces during WWII, is told for the first time. Developed for the US Army's mechanized cavalry, it became the leading US military motorcycle of the war. It served the US armed services as a messenger

and military police vehicle. The Red Army's motorcycle battalions, reconnaissance units of its tank armies, also used them as their primary vehicle. The armies of the Soviet Union, Canada, the United Kingdom, Australia, France, China, and Brazil also made use of the model and its variants. It is known today as the "Liberator"; discover the history and stories of individuals who rode this icon to war and why the model is now a favorite among civilian collectors.

Based on the civilian WL model, Harley-Davidson's WLA ("A" for "Army") motorcycle was first produced in 1940. It would remain in production through 1945, and eventually over 90,000 were delivered for use in all theaters of WWII. Like the WL, the WLA was equipped with a 45 cubic inch (740 cc) flathead high compression engine and a rugged frame. Military modifications included blackout lights, fenders without traditional sides (to reduce mud clogging), an air cleaner to facilitate off-road use and easy maintenance, and a crankcase breather that enabled the fording of water obstacles. The motorcycle typically was also equipped with leg protectors, a skid plate, leather rifle or machine gun scabbard, an ammunition box, radio or luggage rack, and a windscreen. This U.S. Army technical manual TM 9-879 was created in 1943 for the men who operated and serviced the WLA in the field. In its pages you will find a description of the motorcycle, and information regarding its use and care. Originally classified "restricted", this manual was declassified long ago and is reprinted here in its entirety. Among all the older Harley-Davidson models, none holds the allure of the Panhead. Manufactured from 1948 to 1965, the Panhead might be called the first modern Harley. Rick Schunk starts the discussion of Panhead restoration with a brief history lesson, followed by a list of things to look for, and avoid, when shopping for a Panhead. Before starting on a restoration, you have to assess both the machine's needs and your own abilities. The next section is dedicated to the bike's chassis, like the rest of the book, this part is made up of photo sequences that explain exactly how to disassemble the chassis, repair the fork, and lace the wire wheels. Other chapters cover paint, engines and transmissions including the overhaul of both an engine and a transmission. Related components like the carburetor, primary drive, clutch and electrical components are covered as well. While there are other restoration guides, there are no how-to restoration books that provide extensive, start-to-finish photo sequences explaining each major operation necessary to the restoration of a Harley-Davidson Panhead.

Although the Harley-Davidson 45 -- better known as the Flathead -- was designed as an entry-level big twin, its sturdy and dependable construction and unlikely racing pedigree made it one of the most prolific production powerplants in the history of motorcycles. Built and sold from 1929 to 1973, the Flathead turned up in a wide range of Harley-Davidsons, from World War II military models to the utilitarian Servi-Car. The engine also became the power unit of choice among flat-track racers from 1934 to 1969. This new MBI Motorcycle Color History chronicles the entire development and production history of the Flathead, examining its application in street, racing, and military bikes. In addition to a selection of archival black-and-white photographs, the author features nearly 100 modern color shots of restored Harley-Davidsons powered by the Flathead.

The Harley-Davidson WLA and other American military motorcycles performed crucial roles during the Second World War in the U.S. armed forces and other Allied armies worldwide. *Liberator: The Harley-Davidson WLA in the Second World War* for the first time tells the full story of how the U.S. Army and Marine Corps and other Allied armed forces used the Harley-Davidson WLA and other American military motorcycles during the war. The book traces the development of the WLA in 1940-42 from the civilian Forty-Five models of 1929-39, describes the evolution of U.S. Army and Marine Corps usage of motorcycles through the motorcycle-borne mechanized cavalry experiments of 1940-41, and addresses wartime use of motorcycles in each major type of U.S. Army unit (mechanized cavalry, armored divisions, infantry divisions, airborne divisions, military police, etc.) and in Marine Divisions, with detailed tables of organization and equipment for each. Moreover, *Liberator: The Harley-Davidson WLA in the Second World War* describes the use of the WLA, Indians, and other Harley-Davidsons in each Allied army that used them. It especially emphasizes their use by the Soviet Union, which was the largest user of the WLA, receiving more through Lend-Lease than the number used by the U.S. armed services. These countries include:- Soviet Union- Canada- United Kingdom- Australia- New Zealand- South Africa- India- Poland - France - Brazil- Iran- Republic of China Although primarily focused on the Harley-Davidson WLA, the book also describes use of other Harley-Davidsons, Indians, and small motorcycles designed for airborne troops, in the U.S. armed services and other allied armies. These other models include:- Harley-Davidson WL- Harley-Davidson "Big Twins"- Indian 741, 640, 344, and 340- Cushman Model 53 scooter - Simplex Servicycle Unique human perspectives on the Harley-Davidson WLA and other American military motorcycles during the war come from the stories of several individual U.S. Army soldiers who fought on motorcycles, and the histories of a U.S. Army military police unit and a Red Army motorcycle battalion. These stories, several of them previously unpublished, are reminders of the men who once rode these machines during the war. This book will be of interest to enthusiasts of Harley-Davidson, Indian, and military motorcycles, and to military historians and preservationists worldwide.
