This book is open access under a CC BY licence. It spans the areas of assessment, second language acquisition (SLA) and pronunciation and examines topical issues and challenges that relate to formal and informal assessments of second language (L2) speech in classroom, research and real-world contexts. It showcases insights from assessing other skills (e.g. listening and writing) and highlights perspectives from research in speech sciences, SLA, psycholinguistics and sociolinguistics, including lingua franca communication, with concrete implications for pronunciation assessment. This collection will help to establish commonalities across research areas and facilitate greater consensus about key issues, terminology and best practice in L2 pronunciation research and assessment. Due

to its interdisciplinary nature, this book will appeal to a mixed audience of researchers, graduate students, teacher-educators and exam board staff with varying levels of expertise in pronunciation and assessment and wide-ranging interests in applied linguistics.

Materially grounded analysis of contemporary film, literature, and music in Hong Kong that resists the superficial stereotypes of the "global city." Hong Kong is often cast in the role of the paradigmatic "global city," epitomizing postmodernism and globalization, and representing a vision of a cosmopolitan global and capitalist future. In *Paradigm City*, Janet Ng takes us past the obsession with 1997—the year of Hong Kong's return to China—to focus on the complex uses and meanings of urban space in Hong Kong in the period following that transfer. She demonstrates how the design and ordering of the city's space and the practices it supports inculcates a particular civic aesthetic among Hong Kong's population that corresponds to capitalist as well as nationalist ideologies. Ng's insightful connections between contemporary film, literature, music and other media and the actual spaces of the city—such as parks, shopping malls, and domestic spaces—provide a rich and nuanced picture of Hong Kong today. "Paradigm City is pleasant reading and conveys quite comprehensively the complex socio-political dynamics of a city that has yet to find a clear identity in the midst of a seemingly never-ending transition." "China Journal" covers much in a quite interesting way. CHOICE

The 10th anniversary edition of the iconic book that takes parents into the mysterious world of boys, with new foreword, introduction and tribute to the author. THE TENTH ANNIVERSARY EDITION OF A PARENTING CLASSIC How do you raise boys to men in a world where trouble beckons at every turn? How do you make sure they learn the 'right' lessons, stay out of danger, find a path to follow? How do you ensure they'll be OK? Celia Lashlie has some of the answers. After years working in the prison service, she knows what can happen when boys make the wrong choices. She also knows what it's like to be a parent - she raised a son on her own and feared for his survival. As a crucial part of the Good Man Project, she talked to 180 classes of boys. Her insights into what boys need - and what parents can do to help them - are ground-breaking. In this new edition of her honest, no-nonsense and best-selling book, Celia reveals what goes on inside the world of boys. With clarity and insight, she offers parents - especially mothers - practical and reassuring advice on raising their boys to become good, loving, articulate men. "Celia did an enormous amount of work, particularly standing up for at risk young people, and she made an enormous contribution." - New Zealand Prime Minister John Key

Law and Society is a rapidly-growing interdisciplinary field that turns on its head the conventional, idealized view of the “Law” as a magisterial abstraction. Kitty Calavita’s Invitation to Law and Society brilliantly brings to life the ways in which law shapes and manifests itself in the institutions and interactions of human society, while inviting the reader into conversations that introduce the field’s dominant themes and most lively disagreements. Deftly interweaving scholarship with familiar personal examples, Calavita shows how scholars in the discipline are collectively engaged in a subversive exposé of law’s public mythology. While surveying prominent issues and distinctive approaches to the use of the law in everyday life, as well as its potential as a tool for social change, this volume provides a view of law that is more real but just as compelling as its mythic counterpart. In a field of inquiry that has long lacked a sophisticated yet accessible introduction to its ways of thinking, Invitation to Law and Society will serve as an engaging and indispensable guide.

The world and its resources are finite, yet we are seemingly locked into a system based on growth: growth of population, growth of income and growth of consumption. From this irrefutable starting point, *Time to Eat the Dog?* attempts to uncover what sustainability really means. Brenda and Robert Vale explore the environmental impact of the decisions we make, from what we eat and what we wear to how we travel and enjoy ourselves. Their book will make you see your life and your place in the world in a completely new light. Challenging the orthodoxies that underpin our entire economic system, this is one subversive read.

A Modern History of Hong Kong

This book "Problems and Solutions for Undergraduate Real Analysis II " is the continuum of the first book "Problems and Solutions for Undergraduate Real Analysis I ". Its aim is the same as its first book: We want to assist undergraduate students or first-year students who study mathematics in learning their first rigorous real analysis course. The wide variety of problems, which are of varying difficulty, include the following topics: Sequences and Series of Functions, Improper Integrals, Lebesgue Measure, Lebesgue Measurable Functions, Lebesgue Integration, Differential Calculus of Functions of Several Variables and Integral Calculus of Functions of Several Variables. Furthermore, the main features of this book are listed as follows: 1. The book contains 226 problems, which cover the topics mentioned above, with detailed and complete solutions. Particularly, we include over 100 problems for the Lebesgue integration theory which, I believe, is totally new to all undergraduate students. 2. Each chapter starts with a brief and

concise note of introducing the notations, terminologies, basic mathematical concepts or important/famous/frequently used theorems (without proofs) relevant to the topic. 3. Three levels of difficulty have been assigned to problems so that you can sharpen your mathematics step-by-step. 4. Different colors are used frequently in order to highlight or explain problems, examples, remarks, main points/formulas involved, or show the steps of manipulation in some complicated proofs. Soft and warm, Jane's blanket had always been there to comfort her, and she couldn't imagine drifting off to sleep without it. But with the passage of time, Jane grew bigger and bigger and her beloved pink blanket got smaller and smaller. This tender tale of how Jane learned to do without her blanket is a story that children and adults will be happy to share. In his only work for children, the author of *Death of a Salesman* offers a different kind of story. Book 3 covers the topics of Wave Motion, which lays the foundation of physics and the concepts are also used in other sections of the syllabus. Moreover, this section carries a significant weight in the HKDSE examination. It takes time for students to grasp the concepts and master the necessary skills in solving problems. Some examination questions on this section cover integrated topics and require candidates' ability to comprehend an unfamiliar situation and to apply suitable knowledge in solving problems. In this book, although topics are grouped clearly in different chapters, some questions in a later chapter require application of knowledge learned in previous chapters. This will help candidates to consolidate their knowledge and to build up their confidence in tackling problems demanding higher order skills.
