### Secrets to Kill For

### Why PETA Kills

Based on Evan Wright's National Magazine Award-winning story in Rolling Stone, this is the raw, firsthand account of the 2003 Iraq invasion that inspired the HBO® original mini-series. Within hours of 9/11, America's war on terrorism fell to those like the twenty-three Marines of the First Recon Battalion, the first generation dispatched into open-ended combat since Vietnam. They were a new pop-culture breed of American warrior unrecognizable to their forebears—soldiers raised on hip hop, video games and The Real World. Cocky, brave, headstrong, wary and mostly unprepared for the physical, emotional and moral horrors ahead, the "First Suicide Battalion" would spearhead the blitzkrieg on Iraq, and fight against the hardest resistance Saddam had to offer. Hailed as "one of the best books to come out of the Iraq war" (Financial Times), Generation Kill is the funny, frightening, and profane firsthand account of these remarkable men, of the personal toll of victory, and of the randomness, brutality and camaraderie of a new American War.

### He Killed Them All

Why? Why does PETA kill thousands of dogs and cats every year? Why are PETA employees instructed to acquire animals by any means necessary - which has

included lying and theft - in order to kill those animals? Why do they encourage others to kill them? And why do they embrace and defend even abusive animal shelters? Former PETA employees say it is the result of the deeply perverse version of animal activism promoted by PETA founder and President, Ingrid Newkirk. They can explain how employees are made to watch "heart wrenching" films about animal abuse to instill into them the belief that people are incapable of caring for animals and that PETA is doing what is best for animals by killing them. PETA also claims that animals cannot live without human care, which is why they round up animals living outdoors in order to put them to death. The animals are, in short, damned either way and thus killing them is a "gift." Collected within are interviews with former PETA employees, documents from civil and criminal court cases against PETA, photos of animals killed by PETA, inspection reports by the State Veterinarian in Virginia where PETA is headquartered, as well as admissions of killing, and support for killing, by Ingrid Newkirk herself. Together, this information leads to a tragic and disturbing conclusion: PETA is letting loose upon the world individuals who not only believe that killing is a good thing and that the living want to die, but who are legally armed with lethal drugs which they have already proven - at least 32,744 times in the last 13 years - that they are not averse to using.

"Kill the Messenger describes the current debate, the players, their interests, and their positions. It explains and refutes many of the common criticisms of testing. It describes testing opponents' strategies, through case studies of Texas and the SAT. It illustrates the profound media bias against testing. It acknowledges testing's limitations, and suggests how it can be improved. It defends testing by comparing it with its alternatives. And finally, it outlines the consequences for America of losing the "war on standardized testing."--BOOK JACKET.

With Obama's election to the presidency in 2008, many believed the United States had entered a new era: Obama came into office with high expectations that he would end the war in Iraq and initiate a new foreign policy that would reestablish American values and the United States' leadership role in the world. In this shattering new assessment, historian Lloyd C. Gardner argues that, despite cosmetic changes, Obama has simply built on the expanding power base of presidential power that reaches back across decades and through multiple administrations. The new president ended the "enhanced interrogation" policy of the Bush administration but did not abandon the concept of preemption. Obama withdrew from Iraq but has institutionalized drone warfare—including the White House's central role in selecting targets. What has come into view, Gardner argues, is the new face of American presidential power: high-tech, secretive, global, and lethal. *Killing Machine* skillfully narrates the drawdown in Iraq, the counterinsurgency warfare in Afghanistan, the rise of the use of drones, and targeted assassinations from al-Awlaki to Bin Laden—drawing from the words of key players in these actions as well as their major public critics. With unparalleled historical perspective, Gardner's book is the new touchstone for understanding not only the Obama administration but the American presidency itself.

This volume is a critical edition of the 1587 treatise by Oliva Sabuco, *New Philosophy of Human Nature*, written during the Spanish Inquisition. Puzzled by medicine's abject failure to find a cure for the plague, Sabuco developed a new theory of human nature as the foundation for her remarkably modern holistic philosophy of medicine. Fifty years before Descartes, Sabuco posited a dualism that accounted for mind/body interaction. She was first among the moderns to argue that the brain—not the heart—controls the body. Her account also anticipates the role of cerebrospinal fluid, the relationship between mental and physical health, and the absorption of nutrients through digestion. This extensively annotated translation features an ample introduction demonstrating the work's

importance to the history of science, philosophy of medicine, and women's studies.

In Biloxi, Mississippi, a landmark tobacco trial with hundreds of millions of dollars at stake begins routinely, then swerves mysteriously off course. The jury is behaving strangely, and at least one juror is convinced he's being watched. Soon they have to be sequestered. Then a tip from an anonymous young woman suggests she is able to predict the jurors' increasingly odd behavior. Is the jury somehow being manipulated, or even controlled? If so, by whom? And, more important, why? **BONUS:** This edition includes an excerpt from John Grisham's *The Litigators*.

Use Bloom's Taxonomy to Help Students Independently Evaluate Literature. Instead of teaching your students how to answer questions about a particular text, help them develop the skills to critically evaluate literature without relying on outside guidance. Using Bloom's learning domains, *Levels of Understanding* breaks down complex questions into smaller parts and outline the steps necessary for students to develop a sound evaluation of a text. Students will begin with the most

basic and fundamental skill, comprehension, move on to reader response, analysis, and synthesis, and gradually build to the highest skill, evaluation. Not only will these guides help you prepare your students for standardized tests like the AP Language and Literature exam, the SATs, and the ACTs, but they will also give students the self-assurance to develop and articulate a personal assessment of the text — a skill that will be advantageous in college and beyond.

George L. Parsenios explores the legal character of the Gospel of John in the light of classical literature, especially Greek drama. Johannine interpreters have explored with increasing interest both the legal quality and the dramatic quality of the Fourth Gospel, but often do not connect these two ways of reading John. Some interpreters even assume that the one approach excludes the other, and that John is either legal or dramatic, but not both. Legal rhetoric and tragic drama, however, were joined throughout antiquity in a complex pattern of mutual influence. To connect John to drama, therefore, is to connect John to legal rhetoric, and doing so helps to see even more clearly the pervasiveness of the legal motif in the Gospel of John. Tracing the legal character of seeking in Sophocles' Oedipus Rex , for example, sheds new light on the legal character of seeking in the Fourth Gospel, especially in the enigmatic comment of Jesus at John 8:50. New insights are also offered regarding the evidentiary character of the signs of Jesus, based on comparison with Aristotle's comments about signs and rhetorical evidence in both the Poetics and Rhetoric , as well as by comparison with plays by Aeschylus, Sophocles and Euripides. To call the signs of Jesus evidence, however, does not remove them from the dialectical tension inherent in Johannine theology. If the signs are evidence, they are evidence in a world in which the basis of forming judgments has been problematized by the appearance of the Word in the flesh.

Hello Friend We Missed You is a poignant and comic novel about loneliness, Netflix, existing, rural life, money, Jack Black, and learning to live in the least excruciating way possible. Its story, which unfolds on the small Welsh island of Môn, of people armed with every social media completely failing to communicate, is far, far funnier than it has any right to be. It's also, ultimately, extremely moving. An incredible debut novel from a truly unique prose stylist.

## **The Wall Street Journal**

Soon to be a major motion picture! Kill the Messenger tells the story of the tragic death of Gary Webb, the controversial newspaper reporter who committed suicide in December 2004. Webb is the former San Jose Mercury News reporter whose 1996 "Dark Alliance" series on the so-called CIA-crack cocaine connection created a firestorm of controversy and led to his resignation from the paper amid escalating attacks on his work by the mainstream media. Author and investigative journalist Nick Schou published numerous articles on the controversy and was the only reporter to significantly advance Webb's stories. Drawing on exhaustive research and highly personal interviews with Webb's family, colleagues, supporters and critics, this book argues convincingly that Webb's editors betrayed him, despite mounting evidence that his stories were correct. Kill the Messenger examines the "Dark Alliance" controversy, what it says about the current state of journalism in America, and how it led Webb to ultimately take his own life. Webb's widow, Susan Bell, remains an ardent defender of her ex-husband. By combining her story with a probing examination of the one of the most important media scandals in recent memory, this book provides a gripping view of one of the greatest tragedies in the annals of investigative journalism.

### **When Secrets Kill**

Genocide—the intent to destroy in whole or in part, a group of people. In *Open Season*, award-winning attorney Ben Crump exposes a heinous truth: Whether with a bullet or a lengthy prison sentence, America is killing black people and justifying it legally. While some deaths make headlines, most are personal tragedies suffered within families and communities. Worse, these killings are done one person at a time, so as not to raise alarm. While it is much more difficult to justify killing many people at once, in dramatic fashion, the result is the same—genocide. Taking on such high-profile cases as Trayvon Martin, Michael Brown, and a host of others, Crump witnessed the disparities within the American legal system firsthand and learned it is dangerous to be a black man in America—and that the justice system indeed only protects wealthy white men. In this enlightening and enthralling work, he shows that there is a persistent, prevailing, and destructive mindset regarding colored people that is rooted in our history as a slaveowning nation. This biased attitude has given rise to mass incarceration, voter disenfranchisement, unequal educational opportunities, disparate health care practices, job and housing discrimination, police brutality, and an unequal justice system. And all mask the silent and ongoing systematic killing of people of color. *Open Season* is more than Crump's incredible mission to preserve justice, it is a call to action for Americans to begin living up to the promise to protect the rights of its citizens equally and without question.
