Career Essentials: The Interview

“[Think on Your Feet] is a helpful maven’s guide ideal for anyone who views a podium with fear and trembling.”—Publishers Weekly Get out of your own way! Our professional lives are full of situations outside of our control. A job interviewer asks a question out of left field. A coworker puts you on the spot in front of the boss. Your PowerPoint presentation crashes at a critical moment. Most people react to the unexpected with anxiety and unease. We get rattled, stumble over our words, and overthink the situation. Others, though, handle it with self-assurance and aplomb. They gain a sense of empowerment and energy when the pressure is on. Like great improv actors, they’re able to think on their feet. The great thing is, improv isn’t about winging it or flying by the seat of your pants; improv at its core is about listening and responding. It’s based on rules and techniques, and it taps directly into your soft communication skills. By incorporating it into your prep work for professional situations, you’ll learn how to retrain your brain for the unexpected and get out of your own way in those unexpected—and expected—professional situations. Practicing improv isn’t about being funny. Instead, it’s about developing the mental agility to spin any surprise in your favor and to communicate with confidence. Filled with engaging improv activities, this interactive guide will ensure you never come away from a tough moment pondering the woulda, coulda, shoulda! again. You’ll learn how to nurture your personal style for communicating in every professional situation. From effective listening in the office, giving presentations, and leading meetings to negotiating a raise, acing an interview, and more, you’ll start communicating with confidence and stop letting the unexpected hold you back. Take your workplace communication—and your career—to the next level by mastering the art of Thinking on Your Feet.

Choice Outstanding Academic Title of 2016 From the presidential race to the battle for the office of New York City mayor, American political candidates' approach to new media strategy is increasingly what makes or breaks their campaign. Targeted outreach on Facebook and Twitter, placement of a well-timed viral ad, and the ability to roll with the memes, flame wars, and downvotes that might spring from ordinary citizens' engagement with the issues—these skills are heralded as crucial for anyone hoping to get their views heard in a chaotic election cycle. But just how effective are the kinds of media strategies that American politicians employ? And what effect, if any, do citizen-created political media have on the tide of public opinion? In *Controlling the Message*, Farrar-Myers and Vaughn curate a series of case studies that use real-time original research from the 2012 election season to explore how politicians and ordinary citizens use and consume new media during political campaigns. Broken down into sections that examine new media strategy from the highest echelons of campaign management all the way down to passive citizen engagement with campaign issues in places like online

comment forums, the book ultimately reveals that political messaging in today's diverse new media landscape is a fragile, unpredictable, and sometimes futile process. The result is a collection that both interprets important historical data from a watershed campaign season and also explains myriad approaches to political campaign media scholarship—an ideal volume for students, scholars, and political analysts alike.

Integrating Socially

Craig Lewis Lewis has returned from WWII in 1945. He and his wife, Claire settle near Atlanta, Georgia. They already have a daughter, Karen Ann, born in 1942, while he was in training as a medic. Craig was deployed to North Africa, then to Sicily and finally to Italy. They soon have another daughter, Susie, born in May, 1947. Claire becomes terminally ill. How Craig handles her illness, eventual death, and their children, is a story repeated all too often even today. If only he would have looked to Providence for his help instead of a bottle, his life and that of his daughters', would have turned out differently. It is the lack of inner strength drawn from a loving family, or from God, that throws his and his childrens' lives into turmoil and violence. His youngest daughter, Susie is catapulted into a life of alter personalities unknown to her until she totally

collapses. The dark cloud that has followed her all her life, finally consumes her and wreaks total havoc and insanity in her life and that of her family. Her path through depression and quagmire of multiple personalities is long, disruptive, and harrowing.

What We Really Value traces the origins of traditional rubrics within the theoretical and historical circumstances out of which they emerged, then holds rubrics up for critical scrutiny in the context of contemporary developments in the field. As an alternative to the generic character and decontextualized function of scoring guides, he offers dynamic criteria mapping, a form of qualitative inquiry by which writing programs (as well as individual instructors) can portray their rhetorical values with more ethical integrity and more pedagogical utility than rubrics allow. To illustrate the complex and indispensable insights this method can provide, Broad details findings from his study of eighty-nine distinct and substantial criteria for evaluation at work in the introductory composition program at "City University." These chapters are filled with the voices of composition instructors debating and reflecting on the nature, interplay, and relative importance of the many criteria by which they judged students' texts. Broad concludes his book with specific strategies that can help writing instructors and programs to discover, negotiate, map, and express a more robust truth about what they value in their students' rhetorical performances.

Interviewing, Interrogation & Communication for Law Enforcement

Barbara Jordan spoke for many Texas women when she told a reporter, "I get from the soil and spirit of Texas the feeling that I, as an individual, can accomplish whatever I want to, and that there are no limits, that you can just keep going, just keep soaring. I like that spirit." Indeed, the sense of limitless possibilities has inspired countless Texas women—sometimes in the face of daunting obstacles—to build lives rich in work, family, friends, faith, and community involvement. In this collection of interviews conducted by PJ Pierce, twenty-five Texas women ranging in age from 53 to 93 share the wisdom they've acquired through living unconventional lives. Responding to the question "What have you found that really matters about life?" they offer keen insights into motherhood, career challenges, being a minority, marriage and widowhood, anger, assertiveness, managing change, persevering, power, speaking out, fashioning success from failure, writing your own job description, loving a younger man, and recognizing opportunities disguised as disaster—to name only a few of their topics. In her introduction, Pierce describes how she came to write the book and how she chose her subjects to represent a cross-section of career paths and ethnic groups and all geographic areas of Texas. A topical index makes it easy to compare several women's views on a given subject.

Communicating for Results

Over the last several decades, video testimony with aging Holocaust survivors has brought these witnesses into the limelight. Yet the success of these projects has made it seem that little survivor testimony took place in earlier years. In truth, thousands of survivors began to recount their experience at the earliest opportunity. This book provides the first full-length case study of early postwar Holocaust testimony, focusing on David Boder's 1946 displaced persons interview project. In July 1946, Boder, a psychologist, traveled to Europe to interview victims of the Holocaust who were in the Displaced Persons (DP) camps and what he called "shelter houses." During his nine weeks in Europe, Boder carried out approximately 130 interviews in nine languages and recorded them on a wire recorder. Likely the earliest audio recorded testimony of Holocaust survivors, the interviews are valuable today for the spoken word (that of the DP narrators and of Boder himself) and also for the song sessions and religious services that Boder recorded. Eighty sessions were eventually transcribed into English, most of which were included in a self-published manuscript. Alan Rosen sets Boder's project in the context of the postwar response to displaced persons, sketches the dramatic background of his previous life and work, chronicles in detail the evolving process of interviewing both Jewish and non-Jewish DPs, and examines from several angles the implications for the history of Holocaust testimony. Such early postwar testimony, Rosen avers, deserves to be taken on its own terms rather than to be enfolded into earlier or later schemas of testimony. Moreover, Boder's efforts and the support he was given for them demonstrate that American postwar response to the Holocaust was not universally indifferent but rather often engaged, concerned, and resourceful.

This easy-to-use book addresses the key phases of any ethnographic project from beginning a project and defining its aims, to data collection, analysis, writing, and reporting results. Advanced Public Speaking

This book provides an overview of effectively collecting, understanding, and presenting information. First, this book examines various situations via math, grammar, and logic. It is important for officers to apply math and English to the law so that they may be able to effectively articulate their actions in court. For example, laws and police actions can be evaluated via truth tables and Venn Diagrams. Second, this book discusses interrogation techniques and body language. Manipulating a suspect and collecting the right information in a legal and effective manner is a part of police work. Third, this book presents a deposition. The defense lawyer may ask certain questions in order to discredit the officer or to undermine the officers report. Police officers should ask themselves the purpose of each question that is being asked during a deposition. Fourth, this book presents some resume information and typical job interview questions for potential police officers. Knowing what kinds of questions will be asked during an interview and effectively communicating to potential employers is essential. Fifth, this book discusses code information and handwriting comparisons. Code information may be important in a prison environment and handwriting comparisons allows for a totality of circumstance exercise. Sixth, this book discusses assumptions and limitation associated with information. Magic is a useful tool to demonstrate how flawed assumptions may lead to inaccurate conclusions. Seventh, this book provides a table that can be used to generate

impromptu speeches. Various words can be randomly selected and the reader can use the words to create a short story. Eighth, this book discusses how to handle situations that deal with special situations and individuals who have disabilities. Finally, this book discusses various search techniques for evidence collection.
