Finley's Interactive Cadaveric Dissection Guide is a step-by-step instructional text for cadaveric dissection. The dissection is presented regionally on the body and includes the trunk, extremities, face, neck, thorax, abdomen and viscera. Other dissections include all joints of the extremities, a spinal laminectomy, and dissections of the larynx, pharynx, TMJ, and pelvic anatomy for both male and female. Each section is illustrated using line drawings, digital still images. Each chapter of the text includes illustrations and still color photos of the steps. Each new textbook includes a DVD. \*Please note: Electronic/eBook formats do not include access to the DVD.

This text is designed to present a comprehensive and state-of-the-art approach to robotic female pelvic reconstructive surgery. Written by experts in both urology and urogynecology, each of these sections address patient selection, pre-operative considerations, surgical technique, and management of intra and post-operative complications. Furthermore, each chapter includes the most current evidence in the literature that supports specific techniques. Extensive illustrations make this an interactive text. Emphasis is placed on sacrocolpopexy, the mostly commonly performed robotic procedure performed in female pelvic medicine. The set up of this operation, surgical technique, and tips and tricks are discussed. In addition, the management of the uterus is also be addressed in detail, including supracervical and total hysterectomy, as well as uterine-sparing techniques. The appropriate preoperative evaluation, including decisions to be made in addressing concomitant surgical conditions such as stress urinary incontinence, is addressed so that the reader can provide comprehensive management for all surgical pelvic floor disorders. Other reconstructive procedures covered include controversial topics such as power morcellation of the uterus and placement of vaginal mesh. The text will also include elements that pertain to male and female patients, such as ureteral reimplantation and sigmoid resection. The Use of Robotic Technology in Female Pelvic Floor Reconstruction will be invaluable to both urologists and gynecologists in the field.
