Arbitration Under International Investment Agreements

Investment treaty arbitration (sometimes called investor-state dispute settlement or ISDS) has become a flashpoint in the backlash against globalization, with costs becoming an area of core scrutiny. Yet "conventional wisdom" about costs is not necessarily wise. To separate fact from fiction, this book tests claims about investment arbitration and fiscal costs against data so that policy reforms can be informed by scientific evidence. The exercise is critical, as investment treaties grant international arbitrators the power to order states—both rich and poor—to pay potentially millions of dollars to foreign investors when states violate the international law commitments made in the treaties. Meanwhile, the cost to access and defend the arbitration can also climb to millions of dollars. This book uses insights drawn from cognitive psychology and hard data to explore the reality of investment treaty arbitration, identify core demographics and basic information on outcomes, and drill down on the costs of parties' counsel and arbitral tribunals. It

offers a nuanced analysis of how and when cost-shifting occurs, parses tribunals' rationalization (or lack thereof) of cost assessments, and models the variables most likely to predict costs, using data to point the way towards evidence-based normative reform. With an intelligent interdisciplinary approach that speaks to ongoing reform at entities like the World Bank's ICSID and UNCITRAL, this book provides the most up-to-date study of investment treaty dispute settlement, offering new insights that will shape the direction of investment treaty and arbitration reform more broadly.

The Handbook of Dispute Resolution

In modern times, the civil procedural laws of every country have been influenced by those of other countries. For instance, the Japanese legal system was itself influenced by Chinese culture and later developed independently under the policy of national isolation. And since 1868, Japan has modernized its civil procedural law, using French, German, and American law as its models. Japan has recently tried to contribute by way of legislative and legal educational assistance to other Asian countries (Vietnam, Cambodia, etc.) in civil and procedural law. The civil procedural laws of different countries should be expected to harmonize with each other in the global society. This book is the outcome of the Congress of the International Association of Procedural Law at the Ritsumeikan University in Kyoto, Japan. In this book, various outstanding contributors are treating a contemporary

For civil aviation to progress it has never been just about technology and business practices. To go from the rudiments of the early services that plied across short distances in Europe and America to what we experience today required most of all that politicians and policy-makers address the central problems of national sovereignty over air space and national ownership and control over airlines. Those problems have plagued the development of seamless and efficient air services for consumers in the international sphere. One would have thought that international airlines might have led the way towards a uniform globalized system given the nature of their enterprise, but that has definitely not been the case. Sovereignty and security issues have more often than not trumped commercial arguments for a more level playing field for international airlines. There has thus been an on-going tussle between sovereignty, state security and mercantilist practices on the one hand and the ambition for civil aviation to flourish on the other. As one early commentator put it: 'one is convinced that the sovereign state cannot be left without authority over what happens just above its territory, (but) one shrinks from the idea that aerial navigation could be the object of narrow-minded restrictions.' How those narrow-minded restrictions were gradually eroded, though still not eliminated, to enable civil aviation to flourish is at the heart of this work. This book will be of direct interest to students of aviation, modern history, international relations and transport. It is also of value to airline industry professionals and

Investor-state arbitration is a relatively new dispute settlement mechanism that allows foreign investors the opportunity to seek redress for damages arising out of breaches of investment-related treaty obligations by the governments of host countries. Claims are submitted to independent, international arbitration tribunals, which are called upon to interpret the treaty at hand. Because of the public interest involved in these cases, the awards of these tribunals are subject to much scrutiny and debate. Thus, it has already generated hundreds of cases and created new legal disciplines, inspiring a continuous string of legal writings. This book provides a comprehensive analysis of the main issues that arise in investor-state arbitration. It accompanies the reader through the phases of such a procedure, starting with an examination of the instruments, which provide, in the overwhelming majority of the cases, the legal basis for the requests for such arbitration. It then continues with the launching of the arbitration procedure, followed by the analysis of the main jurisdictional and substantive issues that the tribunals are confronted with, and the review procedures, when there is a request for setting aside of the award. It finally looks at the post-award phase and concludes with a reflection on the role of precedent in investment arbitration. Arbitration under International Investment Agreements: a Guide to the Key Issues contains in one volume what everybody needs to know on this evolving topic. Calling on the most renowned experts in this field, private practitioners, academics, government and international organization officials, it describes the process in all its phases from A to Z, providing a comprehensive insight in the way

been a main concern in international arbitration. It is a topic most often discussed and analyzed. In spite of the recent developments in thirdparty funding regulations as well as other mechanisms made available to users of arbitration to reduce costs, the topic remains a key focus for users of arbitration. As the founder of the world's leading international commercial arbitration Master's programme, Dr Patricia Shaughnessy is a huge advocate of communicating recent and important developments in international arbitration and has written and spoken extensively on such matters. Over twenty-five renowned practitioners and academics worldwide, who have been influenced by Dr Shaughnessy, explore this much-debated topic on the occasion of her 65th birthday. The contributions in this dedication to Dr Shaughnessy's legacy look at issues such as the following: costs arising out of Third-Party Funding; costs of court proceedings versus arbitration proceedings; fee arrangements with legal counsel; costs of commercial versus investment arbitration; how to deal with in-house costs in international arbitration; impact of tribunal secretaries in international arbitration; cost sanctions in international arbitration; damages in international arbitration. The analysis and views offered by leading scholars and practitioners on current day issues arising out of costs of arbitration will offer readers a unique perspective on various aspects of the finances involved in arbitration. This book will provide insightful thoughts and practical guidance for academics and practitioners in the field of international arbitration.

Dispute Resolution

This book examines the effect of biased and neutral mediators in civil wars. Based on analysis of both global data and case studies of contemporary peace processes, including India and Norway in Sri Lanka, China in Cambodia, US in Israel/Palestine, and Russia in Georgia, the book makes two main contributions. First, it explores the role of biased mediators in contemporary peace processes. The author develops a theory explaining why biased mediators are more effective than their neutral counterparts and the book identifies four different mechanisms through which biased mediators can be effective peace-brokers. By developing a comprehensive set of mechanisms to explain bias mediation, the work deepens understanding of biased mediators in general, and their role in resolving civil conflict in particular. The second contribution offered is a novel way of measuring mediation success. Previous research has concentrated on settlement, behavior, or implementation. While these conceptualisations of mediation success all have merit, they fail to address how the basic incompatible positions are regulated. This book focuses on mediators' ability to regulate core compatibilities by crafting institutional peace arrangements that generally are considered to enhance the prospect for durable peace. This approach has wider implications for peace and conflict research by bringing together research on durability of peace and studies on international mediation, two fields of research which hitherto have been kept apart. This book will be of much interest to students of international mediation,

The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits. Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security. What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict: Do the old methods still work? Are there new tools that could work better? How do old and new methods relate to each other? *International Conflict Resolution After the Cold War* critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners. It considers recent applications of familiar conflict management strategies, such as the use of threats of force, economic sanctions, and negotiation. It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution, including truth commissions, "engineered" electoral systems, autonomy arrangements, and regional organizations. It also opens up analysis of emerging issues, such as the dilemmas facing humanitarian organizations in complex emergencies. This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system.

America's Peacemakers: The Community Relations Service and Civil Rights tells the behind-the-scenes story of a small federal agency that made a big difference in civil rights conflicts over the last half century. In this second edition of Resolving Racial Conflict: The Community Relations Service and Civil Rights, 1964-1989, Grande Lum continues Bertram Levine's excellent scholarship, expanding the narrative to consider the history of the Community Relations Service (CRS) of the

U.S. Department of Justice over the course of the last three decades. That the Trump administration has sought to eliminate CRS gives this book increased urgency and relevance. Covered in this expanded edition are the post-9/11 efforts of the CRS to prevent violence and hate crimes against those perceived as Middle Eastern. Also discussed are the cross-border Elián González custody dispute and the notable tragedies of Trayvon Martin and Michael Brown, both of which brought police interaction with communities of color back into the spotlight. The 2009 Matthew Shepard and James Byrd, Jr., Hate Crimes Prevention Act substantially altered CRS's jurisdiction, which began to focus on gender, gender identity, religion, sexual orientation, and disability in addition to race, color, and national origin. Lum's documentation of this expanded jurisdiction provides insight into the progression of civil rights. The ongoing story of the Community Relations Service is a crucial component of the national narrative on civil rights and conflict resolution. This new edition will be highly informative to all readers and useful to professionals and academics in the civil rights, dispute resolution, domestic and international peacemaking, and law enforcement-community relations fields.

The Reception and Transmission of Civil Procedural Law in the Global Society

This work deals with the current state of investment dispute resolution and analyzes the problems associated with investor-state arbitration. The author examines developments in the existing legal framework and looks at the mechanisms under existing domestic and international systems — such as judicial review and class actions — to see if these can be applied to investment dispute resolution. The author concludes that the features of traditional arbitration are not flexible enough to meet the needs of this modern form of international dispute resolution. Investment arbitration is now entering a new phase of its development. The traditional, typically arbitration-related issues of consent, privity, and confidentiality are making room for the now more important questions of disclosure, transparency, legal certainty, and consistency. The author calls for setting up a "model procedure," specifically created for international investment disputes as this would enable the establishment of a "tailor-made" process for this ever-growing area of law.

The chapters separately address critical topics, including the role of the international lawyer, tips for international research and international resources, jurisdiction, service of process, obtaining the evidence, act of state, foreign sovereign immunity, and enforcement of judgments. Reflecting the growing use of alternative dispute resolution, an entire chapter is devoted to mediation and arbitration issues including a stand-alone problem on mediation and arbitration planning and clause drafting. An accompanying document supplement contains materials essential to a full understanding of practice issues posed by international dispute resolution. A Teacher's Manual also accompanies the materials and contains clear and concise answers to the questions posed in the student book and discussion of the issues raised. Guidance is also provided as to the amount of class time to allocate to the problems and other course management options and tips.

Early Neutral Evaluation

This valuable guide is a tool to teach lawyers, litigants, and judges what early neutral evaluation (ENE) consists of, why and under what circumstances it can be used most productively, the difference between it and mediation (in the forms most commonly encountered by litigants and lawyers), and how clients, litigators, and neutrals have been assessed the value of ENE.

Alternative Dispute Resolution in Tanzania

Privatization is occurring throughout the public justice system, including courts, tribunals, and state-sanctioned private dispute resolution regimes. Driven by a widespread ethos of efficiency-based civil justice reform, privatization claims to decrease costs, increase speed, and improve access to the tools of justice. But it may also lead to procedural unfairness, power imbalances, and the breakdown of our systems of democratic governance. *Civil Justice, Privatization, and Democracy* demonstrates the urgent need to publicize, politicize, debate, and ultimately temper these moves towards privatized justice. Written by Trevor C.W. Farrow, a former litigation lawyer and current Chair of the Canadian Forum on Civil Justice, *Civil Justice, Privatization, and Democracy* does more than just bear witness to the privatization initiatives that define how we think about and resolve almost all non-criminal disputes. It articulates the costs and benefits of these privatizing initiatives, particularly their potential negative impacts on the way we regulate ourselves in modern democracies, and it makes recommendations for future civil justice practice and reform.

Studies in International Air Law

Today, Alternative Dispute Resolution (ADR) has gained international recognition

Download Ebook International Civil Dispute Resolution American Casebook Series

and is widely used to complement the conventional methods of resolving disputes through courts of law. ADR simply entails all modes of dispute settlement/resolution other than the traditional approaches of dispute settlement through courts of law. Mainly, these modes are: negotiation, mediation, [re]conciliation, and arbitration. The modern ADR movement began in the United States as a result of two main concerns for reforming the American justice system: the need for better-quality processes and outcomes in the judicial system; and the need for efficiency of justice. ADR was transplanted into the African legal systems in the 1980s and 1990s as a result of the liberalization of the African economies, which was accompanied by such conditionalities as reform of the justice and legal sectors, under the Structural Adjustment Programmes. However, most of the methods of ADR that are promoted for inclusion in African justice systems are similar to pre-colonial African dispute settlement mechanisms that encouraged restoration of harmony and social bonds in the justice system. In Tanzania ADR was introduced in 1994 through Government Notice No. 422, which amended the First Schedule to the Civil Procedure Code Act (1966), and it is now an inherent component of the country's legal system. In recognition of its importance in civil litigation in Tanzania, ADR has been made a compulsory subject in higher learning/training institutions for lawyers. This handbook provides theories, principles, examples of practice, and materials relating to ADR in Tanzania and is therefore an essential resource for practicing lawyers as well as law students with an interest in Tanzania. It also contains additional information on evolving

Obtaining Discovery Abroad

This volume is an essential, cutting-edge reference for all practitioners, students, and teachers in the field of dispute resolution. Each chapter was written specifically for this collection and has never before been published. The contributors--drawn from a wide range of academic disciplines--contains many of the most prominent names in dispute resolution today, including Frank E. A. Sander, Carrie Menkel-Meadow, Bruce Patton, Lawrence Susskind, Ethan Katsh, Deborah Kolb, and Max Bazerman. The Handbook of Dispute Resolution contains the most current thinking about dispute resolution. It synthesizes more than thirty years of research into cogent, practitioner-focused chapters that assume no previous background in the field. At the same time, the book offers path-breaking research and theory that will interest those who have been immersed in the study or practice of dispute resolution for years. The Handbook also offers insights on how to understand disputants. It explores how personality factors, emotions, concerns about identity, relationship dynamics, and perceptions contribute to the escalation of disputes. The volume also explains some of the lessons available from viewing disputes through the lens of gender and cultural differences.

explanation of the effect of international public policy, the duties of arbitrators, the presentation and evaluation of evidence in international arbitration, and how to arbitrate against a state sovereign. The enforcement of international arbitral awards is explored, including interim relief and problems with enforcement, the New York Convention, parallel proceedings, and pivotal decisions such as *Chromalloy* and *TermoRio*. International mediation is also examined, including guidelines for selecting the best mediator for an international dispute, the power of mediation to resolve international commercial disputes, and the differences in U.S. and European approaches. Lastly, the section on investment and trade arbitration and mediation explores bilateral investment treaties, examines WTO arbitration procedures, offers advice on saving time and money in cross-border commercial disputes, and provides guidance for U.S. investors to follow in dealing with sovereign states. The chapters in the Handbook were selected from an extensive body of writings and, in the main, represent world-class assessments of arbitration and ADR practice. All the major facets of the field are addressed and provide the reader with comprehensive and accurate information, lucid evaluations, and an indication of future developments. They not only acquaint, but also ground the reader in the field.
