Non-Discrimination in International Trade in Services

This OECD publication includes statistics by detailed type of service on international trade in services for the 34 OECD countries, the European Union, the Euro Area and the Russian Federation.

OECD Statistics on International Trade in Services, Volume 2017 Issue 1 Detailed Tables by Service Category

This title provides a comprehensive introduction to the key issues in trade and liberalization of services. Providing a useful

overview of the players involved, the barriers to trade, and case studies in a number of service industries, this is ideal for policymakers and students interested in trade.

International Trade in Services

The services sector is key to economic growth, competitiveness, and poverty alleviation. Comprising more than two-thirds of the world economy, services are now commonly traded across borders, helped by technological progress and the increased mobility of persons. In recent years, a number of developing countries have looked at trade in services as a means to both respond to domestic supply shortages and to diversify and boost exports. Any country can tap into the trade potential of services, but not every country can become a services hub across sectors. The opening of the services sector potentially comes with large benefits, but also fears and costs that should not be overlooked. This book provides useful guidelines for the assessment of a country's trade potential, and a roadmap for successful opening and export promotion in select services sectors. It looks at both the effects of increased imports and exports, and provides concrete examples of developing country approaches that have either succeeded or failed to maximize the benefits and minimize the risks of opening. It focuses on sectors that have been rarely analyzed through the trade lens, and/or have a fast growing trade potential for developing countries. These sectors are: accounting, construction, distribution, engineering, environmental, health, information technology, and legal services. This book is designed for non-trade specialists to understand how trade can help improve access to key services in developing countries, and for trade specialists to understand the specific characteristics of each individual sector. It will be a useful tool for governments to design successful trade opening or promotion strategies, and for the private sector and consumers to advocate sound domestic policy reforms accompanying an offensive trade agenda.

The Ashgate Research Companion to International Trade Policy

OECD Statistics on International Trade in Services, Volume 2017 Issue 2 Detailed Tables by Partner Country

Trade impacts on the lives of all global citizens, influencing the range of commodities available for consumption and where those commodities are produced. Driven increasingly by market exchange, trade shapes the nature of work and how the costs and benefits of that work are distributed around the world. Economic growth and development are closely associated with the flows of goods and services between countries. International Trade: The Basics offers an accessible and engaging introduction to contemporary debates on international trade, inviting readers to explore the connections between national

Acces PDF International Trade In Services New Trends And Opportunities For Developing Countries Trade And Development

political economies within a globally integrated world. Topics covered include: Why nations trade Globalization and transnational production networks Transnational governance The emergence of Asia as a major trade region Ethical trade and environmental sustainability Trade in solar energy, services and ideas. Featuring case studies and social media links that help to illustrate key concepts, this book is an essential read for anyone seeking to understand how trade varies between regions, affects relationships between countries and influences a country's social, political and economic life.

OECD Statistics on International Trade in Services, Volume 2014 Issue 1 Detailed Tables by Service Category

This volume provides a state of the art review of current thinking on the full range of trade policy issues, addressing the economic and political dimensions of international trade policy. The volume contains a systematic examination of: - specific trade policy instruments (such as tariffs, non-tariff barriers and trade rules) - sectoral concerns (in agriculture, manufacturing and services) - trade linkages (to issues such as the environment and labour standards) - systemic considerations (what role for the WTO?) The organising theme of the volume is that open markets for trade and investment yield large potential gains in human welfare as long as trade policy is conducted as an integral part of broader domestic economic management and regulatory reform, and as long as the particular challenges facing developing countries are effectively addressed. This 'case' is presented on the basis of rigorous analysis of first principles and of empirical experience among key trading nations. An integrated set of original and comprehensive perspectives from a diverse group of experts, linked by a common organisational thread. The contributing authors create an ideal mix of internationally recognised experts together with younger specialists making their mark in trade policy analysis; academics as well as trade policy practitioners; and representatives of both developed and developing countries.

A Manual on Statistics of International Trade in Services

Liberalizing International Trade in Services

This OECD publication includes statistics by detailed type of service on international trade in services for the 35 OECD countries, the European Union, the Euro area, Colombia and the Russian Federation as well as links to definitions and methodological notes.

The World Trade Organization and Trade in Services

This collection of essays takes stock of the key challenges that have arisen since the entry into force of the General Agreement on Trade in Services in the mid-1990s and situates them in the context of the WTO's Doha Development Agenda and the proliferation of preferential agreements addressing services today. The multidisciplinary approach provides an opportunity for many of the world's leading experts and a number of new analytical voices to exchange ideas on the future of services trade and regulation. Cosmopolitan approaches to the treatment of labour mobility, the shape of services trade disciplines in the digital age and pro-competitive regulation in air transport are explored with a view to helping readers gain a better understanding of the forces shaping the changes. An essential read for all those concerned with the evolution of the rules-based trading system and its impact on the service economy.

OECD Statistics on International Trade in Services, Volume 2011 Issue 2 Detailed Tables by Partner Country

The World Trade Organisation plays the primary role in regulating international trade in goods, services and intellectual property. Traditionally, international trade law and regulation has been analysed primarily from the trade-in-goods perspective. Services are becoming an important competence for the WTO. The institutional, legal and regulatory influence of the General Agreement on Trade in Services (GATS) on domestic economic policymaking is attracting increasing attention in the academic and policymaking literature. The growing importance of services trade to the global economy makes the application of the GATS to trade in services an important concern of international economic policy. The GATS contains important innovations that build on the former GATT and existing WTO/GATT trade regime for goods. This book fills a void in the academic and policymaking literature by examining how the GATS governs international trade in services and its growing impact on the regulatory practice of WTO member states. It offers a unique discussion of the major issues confronting WTO member states by analysing the GATS and related international trade issues from a variety of perspectives that include law, political economy, regulation, and business. Moreover, the role of the WTO in promoting liberalised trade and economic development has come under serious strain because of the breakdown of the Doha Development Round negotiations. The book analyses the issues in the Doha services debate with some suggested policy approaches that might help build a more durable GATS framework. The book is a welcomed addition to the WTO literature and will serve as a point of reference for academics, policymakers and practitioners.

A Handbook of International Trade in Services

This OECD publication provides statistics on international trade in services by partner country for 33 OECD countries plus the European Union, the Euro area, Lithuania and the Russian Federation as well as links to definitions and methodological notes.

International Trade in Services and Domestic Regulations

"In 2012, U.S. and European firms accounted for the highest share of revenue generated by the top international architecture and engineering firms in Africa, at 27 and 31 percent, respectively," according to a U.S. International Trade Commission trade brief. These findings show that company revenues growth in an overseas market does not just have to depend on the sale of manufactured products or agricultural commodities. Opportunities also exist for service providers. International Trade in Services: Effective Practice and Policy addresses a reality that receives minimal attention in the current debate about international trade -- how the export and import of services drive a significant portion of international trade. The United States has a US\$269 billion surplus in trade in services with the world. On other hand, U.S. trade in goods with the world continues to experience a wide trade deficit of US\$946 billion. Nevertheless, U.S. policy response focuses mainly on the manufacturing and agricultural sectors. In addition, as an international trade educator in business schools at different universities, many of the textbooks emphasize the various aspects of importing and exporting goods. Workshops aimed to educate and inform the business community also focus on the trade in goods. Consequently, business students and practitioners miss another important component of international trade that presents opportunities--trade in services. The book provides a simple, yet thorough, introduction on how to export a service to an overseas market. The book will guide its audience with a step-by-step process on exporting a service from research to strategy to implementation. Furthermore, the book will highlight the opportunities presented by the international-level General Agreement on Trade in Services (GATS) and bilateral and regional level reciprocal trade agreements. Service providers will be able to use the book as a guide to start the export process successfully with the first step. Essentially, the book will provide results in the following areas: - Time savings - The step-by-step process, highlight of various programs, and list of key resources will save a future exporter of a service the time that he/she would spend trying to just understand another market. - Frustration reduction - The book's outline of the formal mechanisms available to service exporters will save them the frustration that may arise from encountering trade practices, some of which can also be very costly, in different markets that make it difficult to compete against local service providers. - Money savings - Having substantive knowledge of formal mechanisms and key resources that help to reduce the risks associated with exporting to another market, such as not receiving payment, will help the services-based exporter to use its financial resources more efficiently while reducing its risk of nonpayment.

The Regulation of International Trade

Through country case studies as well as econometric analysis, this book attempts to identify the factors that have helped developing countries succeed in exporting services. It examines strategies that have been successful as well as those that have not delivered expected results..

International Trade

This OECD publication provides statistics on international trade in services by partner country for 33 OECD countries plus the European Union (EU27), the Euro area (EA16), and Hong Kong, China as well as definitions and methodological notes.

OECD Statistics on International Trade in Services

Health ministries around the world face a new challenge: to assess the risks and respond to the opportunities of the increasing openness in health services under the World Trade Organization's (WTO) General Agreement on Trade in Services (GATS). 'International Trade in Health Services and the GATS' addresses this challenge head-on by providing analytical tools to policymakers in health and trade ministries alike who are involved in the liberalization agenda and, specifically, in the GATS negotiations. This book informs and assists policymakers in formulating trade policy and negotiating internationally. There is ongoing and animated international debate about the impact of GATS on public services in general and health in particular. In response, the book offers different perspectives from more than 15 leading experts. Some of the authors stress opportunities linked to trade in health services, others focus more on the risks. The book offers: Detailed legal analysis of the impact of the agreement on health policy An overview of trade commitments in health-related services New empirical evidence from nine country studies A simple 10-step explanation on how to deal with GATS negotiations. 'International Trade in Health Services and the GATS' is a must-have resource for policymakers and other practitioners working in the trade and health sectors.

Global Trade in Services

International Trade and Developing Countries

The principle of non-discrimination is fundamental to the regulation of international trade in goods and services. In the context of trade in goods, the concept of 'like products' has become a key element of the legal analysis of whether a trade obstacle violates GATT non-discrimination obligations. The equivalent concept of 'like services and service suppliers' in GATS rules on non-discrimination has received little attention in WTO jurisprudence. In light of the remaining uncertainties, Nicolas Diebold analyses the legal problems of the GATS 'like services and services suppliers' concept using a contextual and comparative methodology. The 'likeness' element is not analysed in isolation, but in context with 'less favourable treatment' and regulatory purpose as additional elements of non-discrimination. The book also explores how far theories from non-discrimination rules in GATT, NAFTA, BITs and EC as well as market definition theories from competition law may

be applied to 'likeness' in GATS.

International Trade in Services

Quantitative measures of international exchange have historically focused on trade in tangible products or capital. However, services have recently become a larger portion of developed economies and international trade, and will only increase in the future. In *International Trade in Services and Intangibles in the Era of Globalization*, Marshall Reinsdorf and Matthew J. Slaughter examine new and emerging patterns of trade, especially the growing importance of transactions involving services or intangible assets such as intellectual property. A distinguished team of contributors analyzes the challenges involved in measuring trade in intangibles, the comparative advantages enjoyed by United States service industries, and the heightened international competition for jobs, capital investment, economic growth, and tax revenue that results from trade in services. This comprehensive volume will be necessary reading for scholars seeking to understand the rapidly changing global economy.

OECD Statistics on International Trade in Services, Volume 2019 Issue 2

This OECD publication provides statistics on international trade in services by partner country for 32 OECD countries plus the European Union (EU27), the Euro area (EA17), and the Russian Federation as well as links to definitions and methodological notes. The data concern trade between residents and non-residents of countries and are reported within the framework of the *Manual on Statistics of International Trade in Services*. This book includes summary tables of trade patterns listing the main trading partners for each country and by broad service category. Series are shown in US dollars and cover the period 2007-2011.

Regulatory Autonomy and International Trade in Services

A Handbook of International Trade in Services

The service sector is large and growing. Additionally, international trade in services is growing rapidly. Yet there is a dearth of empirical research on the size, scope and potential impact of services trade. The underlying source of this gap is well-known-official statistics on the service sector in general, and trade in services in particular, lack the level of detail available for the manufacturing sector in many dimensions. Because services are such a large and important component of the US economy, understanding the implications of increased trade in services is crucial to the trade liberalization agenda going

forward. In this path-breaking book, J. Bradford Jensen conducts primary research using a range of data sources to produce the most detailed and robust portrait available on the size, scope, and potential impact of trade in services on the US economy. Jensen presents new evidence on the prevalence of service firm participation in international trade. He finds that, in spite of US comparative advantage in service activities, service firms' export participation lags manufacturing firms. Jensen evaluates the impediments to services trade and finds evidence that there is considerable room for liberalization—especially among the large, fast-growing developing economies. The policy recommendations coming out of this path-breaking study are quite clear. The United States should not fear trade in services. It should be pushing aggressively for services trade liberalization. Because other advanced economies have similar comparative advantage in service, the United States should make common cause with the European Union and other advanced economies to encourage the large, fast-growing developing economies to liberalize their service sectors through multilateral negotiations in the General Agreement on Trade in Services and the Government Procurement Agreement. Jensen notes that the coming global infrastructure building boom is of historic proportions and provides an enormous opportunity for US service firms if the proper policies are in place. Increased trade in services might help rebalance the global economy, and both developed and developing economies would benefit from the productivity-enhancing reallocation brought by increased trade in services. -- Book Cover.

International Trade in Services and Intangibles in the Era of Globalization

The Manual sets out an internationally agreed framework for the compilation and reporting of statistics on international trade in services in the broad sense. It addresses the growing need, including in international trade negotiations and agreements, for more detailed, comparable, and comprehensive statistics on this type of trade in its various forms. The recommendations will enable countries to progressively expand and structure the information they compile in an internationally comparable way. The Manual conforms with and explicitly relates to the System of National Accounts 1993 and the fifth edition of the IMF's Balance of Payments Manual. It is published jointly by the United Nations, European Union, IMF, OECD, UNCTAD, and World Trade Organization.

International Trade in Services

This title provides a comprehensive introduction to the key issues in trade and liberalization of services. Providing a useful overview of the players involved, the barriers to trade, and case studies in a number of service industries, this is ideal for policymakers and students interested in trade.

International Trade in Services

Annotation This paper reviews the characteristics of international trade in services and of the World Trade Organizations General Agreement on Trade in Services (GATS) framework, which was established to regulate it. Further liberalization of services trade in developing countries, as currently envisaged in the context of the WTO Doha Development Agenda, holds a number of potential benefits, such as underpinning the liberalization of goods trade, but it is also being resisted due to its potential adjustment costs. Two implications for IMF activities are examined: coherence among the three principal international economic institutions and sequencing with macroeconomic stabilization and regulatory reforms.

A Manual on Statistics of International Trade in Services

Research Handbook on Trade in Services

GATS and the Regulation of International Trade in Services

Centering on questions of the potential optimality of some trade protection, these original contributions present research at the frontier of international trade and trade policy. They expand and test the new trade theory that has developed during the last decade, incorporating elements of industrial organization and political economy into the study of trade structure and the formation of trade policy. Essays in the first two parts take up trade policy, addressing issues such as the formation of trading blocks, strategic trade policy, the political economy of protection, growth-oriented trade policies, and including empirical studies of the welfare effects of quality - upgrading voluntary export restrictions and import quotas. Essays in the third part discuss various structural issues such as trade in services, intersectoral adjustments, and the advantage of early entry. Contents: Trade Policy: Theory. Is Bilateralism Bad? Paul R. Krugman. Strategic Trade Policy and Direct Foreign Investment: When Are Tariffs and Quotas Equivalent? James A. Levinsohn. Making Altruism Pay in Auction Quotas, Kala Krishna. On the Ineffectiveness of Made-to-Measure Protectionist Programs, Aaron Tornell. Export Subsidies and Price Competition, Peter Neary. Adverse Selection in Credit Markets and Infant Industry Protection, Harry Flam and Robert W. Staiger. Protection, Politics, and Market Structure, Arye L. Hillman. Growth and Welfare in a Small Open Economy, Gene M. Grossman and Elhanan Helpman. Trade Policy: Evidence. Quality Upgrading and Its Welfare Cost in U.S. Imports, 1969-74, Randi Boorstein and Robert C. Feenstra. Counting the Cost of Voluntary Export Restraints in the European Car Market, Alasdair Smith and Anthony J. Venables. Structural Issues. Services in International Trade, Wilfred J. Ethier and Henrik Horn. First-Mover Advantages, Blockaded Entry, and the Economics of Uneven Development, James R. Markusen. Wage Sensitivity Rankings and Temporal Convergence, Ronald W. Jones and Peter Neary.

International Trade in Services and Intangibles in the Era of Globalization

Beginning with an examination of the nature of services, their categories, and increased importance in the world economy, Feketekuty analyzes the problems of dealing with barriers to trade in this area through international agreement. He discusses how traditional trade theories need to be modified to account for the characteristics for trade in services and the relationship between barriers to international trade in services and government regulations. He concludes with guidelines for organizing and shaping the negotiations on trade in services in the Uruguay Round of multilateral trade negotiations. ISBN 0-88730-241-6: \$26.95.

Exporting Services

International Trade in Services

This Research Handbook explores the latest frontiers in services trade by drawing on insights from empirical economics, law and global political economy. The world's foremost experts take stock of the learning done to date in services trade, explore policy questions bedeviling analysts and direct attention to a host of issues, old and new, confronting those interested in the service economy and its rising salience in cross-border exchange. The Handbook's 22 chapters shed informed analytical light on a subject matter whose substantive remit continues to be shaped by rapid evolutions in technology, data gathering, market structures, consumer preferences, approaches to regulation and by ongoing shifts in the frontier between the market and the state.

International Trade in Services

Quantitative measures of international exchange have historically focused on trade in tangible products or capital. However, services have recently become a larger portion of developed economies and international trade, and will only increase in the future. In *International Trade in Services and Intangibles in the Era of Globalization*, Marshall Reinsdorf and Matthew J. International Trade and Trade Policy

The Guide provides practical support on the compilation of service transactions between residents—non-residents transactions utilizing the EBOPS classification with special emphasis on the partner country break-down, the foreign affiliates statistics (FATS) and also on flows by modes of supply. The overarching aim is to increase the availability and quality of SITS in order to fulfil the urgent needs and demands for such data by policy makers, researchers, market analysts and the public in general. While the international standards in economic statistics are in the process of being implemented, this Guide comes timely, providing the statistical community with guidelines, best practices, case studies, and practical advice on the compilation of SITS.

International Trade in Business Services

This OECD publication includes statistics by detailed type of service on international trade in services for the 36 OECD countries, the European Union, the Euro area, Colombia and the Russian Federation as well as links to definitions and methodological notes. The data are reported within the framework of the fifth and sixth editions of the IMF's Balance of Payments Manual and the Extended Balance of Payments Services Classification (EBOPS), which is consistent with the balance of payments classification but is more detailed. This book includes summary tables by country and by service category and zone totals for the European Union and the Euro area as well as tables for each individual country and for the EU and the Euro area showing data for detailed service categories. Series are shown in US dollars and cover the period 2013-2017.

OECD Statistics on International Trade in Services, Volume 2013 Issue 1 Detailed Tables by Service Category

This book examines the regulation of services within the WTO. It examines the problem of reconciling a liberal system of trade in services with national governments' ability to protect social values through service regulation. The book analyses the existing legal framework and assesses the potential of ongoing trade negotiations.

Manual on Statistics of International Trade in Services 2010 Compiler's Guide

Essay by Maura Reilly. Text by Laurie Ann Farrell. Interview with Martine Antle.

International Trade in Services

The Manual sets out an internationally agreed framework for the compilation and reporting of statistics on international trade in services in the broad sense. It addresses the growing need, including in international trade negotiations and agreements, for more detailed, comparable, and comprehensive statistics on this type of trade in its various forms. The recommendations will enable countries to progressively expand and structure the information they compile in an internationally comparable way. The Manual conforms with and explicitly relates to the System of National Accounts 1993 and the fifth edition of the IMF's Balance of Payments Manual. It is published jointly by the United Nations, European Union, IMF, OECD, UNCTAD, and World Trade Organization.

U.S. International Trade in Goods and Services

This book considers how the interplay between multilateral and preferential liberalisation of trade in services increasingly raises concerns, both from the perspective of the beneficiaries of such liberalisation (whose rights are uncertain) and that of regulators (whose regulatory autonomy is constrained). The author shows how these concerns lead to vast underutilisation of, and strong prejudices against, the benefits of services liberalisation. The book meticulously analyses and compares the EU's obligations under the GATS and the services chapters of several RTAs to finally assess the merits of the raised concerns.

International Trade in Services

OECD Statistics on International Trade in Services, Volume 2013 Issue 2

This OECD publication includes statistics by detailed type of service on international trade in services for the 34 OECD countries, the European Union, the Euro Area and the Russian Federation.

International Trade in Health Services and the GATS

Drawing on a wide variety of classic and contemporary sources, respected authors Trebilcock and Howse here provide a critical analysis of the institutions and agreements that have shaped international trade rules. In light of the growing debate over globalization, they include special sections examinations of topics such as: * agriculture * services and trade-related intellectual property rights * labor rights * the environment * migration. *competition Drawing on previous highly praised editions, this comprehensive text is an invaluable guide to students of economics, law, politics and international relations. Now fully updated, this fourth edition includes full coverage of new developments including the Doha trade round, the
