Active Listening 2 Student's Book with Self-study Audio CD

In a dynamic two-year interview an angel answers your most compelling questions. When psychologist Linda Sue Nathanson consulted holistic practitioner Stevan J. Thayer, she was seeking help for a chronic illness. What she received was a gift so unexpected it changed her deepest beliefs about life . . . and death. Along with the healing she sought, Linda met an angel named Ariel who, channeled through Steven, allowed her to ask questions that touch us all. Do Heaven and Hell Exist? What is the most powerful prayer? What is the real meaning of angel encounters? Based on audiotapes of those astounding sessions, this book brings us Ariel's teachings and stunning revelations about finding love and our soul mate . . . about our karma and a divine plan . . . about the afterlife, the biblical Eden, Jesus Christ, and even startling information about aliens. Miraculously, Interview with an Angel directly conveys a message from a spirit guide—words of comfort and guidance, and answers to the questions we most want to know. "A timely, exciting look at

angels in our lives.”—Rabbi Joseph H. Gelberman, Ph.D., president, The New Seminary, NYC

Over the past three decades, colleges and universities have committed to encouraging, embracing, and supporting diversity as a core principle of their mission. But how are goals for achieving and maintaining diversity actually met? What is the role of students in this mission? When a university is committed to diversity, what is campus culture like? In *Learning to Speak, Learning to Listen*, Susan E. Chase portrays how undergraduates at a predominantly white urban institution, which she calls "City University" (a pseudonym), learn to speak and listen to each other across social differences. Chase interviewed a wide range of students and conducted content analyses of the student newspaper, student government minutes, curricula, and website to document diversity debates at this university. Amid various controversies, she identifies a defining moment in the campus culture: a protest organized by students of color to highlight the university's failure to live up to its diversity commitments. Some white students dismissed the protest, some were hostile to it, and some fully engaged their peers of color. In a book that will be useful to students and educators on campuses undergoing diversity initiatives, Chase finds that both students' willingness to share personal stories about their diverse experiences and collaboration among student organizations, student affairs offices, and academic programs encourage speaking and listening across differences and help incorporate diversity as part of the overall mission of the university.

An Intercultural Approach to English Language Teaching

Bernard R. Gifford In the United States, the standardized test has become one of the major sources of information for reducing uncertainty in the determination of individual merit and in the allocation of merit-based educational, training, and employment opportunities. Most major institutions of higher education require applicants to supplement their records of academic achievements with scores on standardized tests. Similarly, in the workplace, as a condition of employment or assignment to training programs, more and more employers are requiring

prospective employees to sit for standardized tests. In short, with increasing frequency and intensity, individual members of the political economy are required to transmit to the opportunity marketplace scores on standardized examinations that purport to be objective measures of their abilities, talents, and potential. In many instances, these test scores are the only signals about their skills that job applicants are permitted to send to prospective employers. THE NATIONAL COMMISSION ON TESTING AND PUBLIC POLICY In view of the importance of these issues to our current national agenda, it was proposed that the Human Rights and Governance and the Education and Culture Programs of the Ford Foundation support the establishment of a "blue ribbon" National Commission on Testing and Public Policy to investigate some of the major problems, as well as the untapped opportunities, created by recent trends in the use of standardized tests, particularly in the workplace and in schools.

EI-Hi Textbooks & Serials in Print, 2005

This may be the single most important book you ever buy during your medical training. Rotations come and go, exams come and go, but regardless of specialty, patient-care will be at the heart of your practice. It is no exaggeration to say that motivational interviewing (MI) has transformed the way doctors engage with patients, families, and colleagues alike. MI is among the most powerful tools available to promote behavior change in patients. In an age of chronic diseases (diabetes, hypertension, heart disease, obesity), behavior change is no longer limited to substance use or the field of psychiatry - maladaptive choices and behaviors that negatively impact health outcomes are rampant. There is an explosion of research projects using MI or adaptations of MI in the behavioral health medicine field in the past decade. Hospitalizations can't make people change. How marvelous is it that an evidence-based health behavior change approach (MI) can help people change the outcomes of their illnesses and the course of their lives. This therapeutic approach is not a form of psychotherapy and is not the stuff of cobwebs and old leather couches. MI is readily integrated into regular ward rounds and office visits and provides an effective and efficient approach to patients clinical encounters. Written by experts in the field and medical trainees across medicine, this is the first MI guide of its kind. It explores how MI enhances contact with patients from every level of training, following an accessible, succinct approach. This book covers the application of MI method and skills into practice and also includes numerous clinical scenarios, personal reflections and online animated clinical vignettes (video clips) that share the challenges and successes the authors have focused. Furthermore this book is endorsed by the pioneers of MI: William R. Miller & Stephen Rollnick.

The Adult Learner

Julia Wood, a leading scholar in the field of communication, brings us a new edition of the extremely popular COMMUNICATION MOSAICS: AN INTRODUCTION TO THE FIELD OF COMMUNICATION. The new edition continues with the holistic approach to the field of communication by first explaining the basic processes central to all communication contexts (e.g. listening, perceiving, using verbal and nonverbal communication, establishing climate), and then applying these processes to various contexts (interpersonal, small group, public, organizational, intercultural, and mass communication). Through reviewer and student-praised "Student Voices" features, seamless and thoughtful integration of diversity, skill-building pedagogy and real-life examples, students are exposed to the vast world of communication and the tools needed to become effective communicators. This book will provide

readers with a clear understanding of the fundamental skills and processes that are a part of the broad array of communication encounters in personal, professional and public life in the 21st century.

Communication for Accountants

This indispensable resource, for teachers of pupils aged 7-13 years, consists of a series of graduated lesson plans aimed at improving children's speaking and listening skills, their self-confidence and their motivation to learn, ultimately leading to better school performance. The scheme was developed and tested in schools during a four year period with over three thousand children and their teachers, and focuses on class and group activities that are enjoyable as well as instructive. All pupils are able to participate regardless of background, academic standing or facility in English, and the skills acquired are central to the National Curriculum for England and Wales Key Stages 2 and 3. Each lesson worksheet includes learning objectives, guidance on preparation and organisation, an activity guide, and follow-up suggestions, all presented in a clear and simple manner to lead the teacher step by step through the session. The materials are grouped into four levels of difficulty which combine to build a powerful range of abilities associated with persuasive and presentational speech, dialogue and debate, as well as developing the children's command, use, and articulation of English. Each level consists of twelve starter lessons suitable for class-based group work, with sections preparing pupils for a variety of class competitions including public speaking, poetry reading and debating. The activities link naturally with other areas of the curriculum, and topics already being studied can easily be incorporated. In a parallel controlled research project highly significant gains in a nationally standardised test of non-verbal reasoning were made over a seven month period by children who followed the activities for one lesson a week compared to those who did not. These were well in excess of what would be expected for their increased age. Particularly high gains were made by children of lesser ability and those for whom English was an additional language. The improvements recorded were later confirmed by the schools' own National Curriculum assessments of progress against targets, where on average the project children exceeded substantially the end of year forecasts made by their teachers.

The most widely-used text for the interviewing course, Stewart and Cash offers comprehensive coverage of a wide range of interviews, and careful integration of relevant communication theory as a foundation for the practical aspects of interviewing--for both the interviewer and the interviewee. Instructors note its clear writing, abundance of real-world examples and sample interviews as particularly appealing to their students. This 10th edition continues to reflect the growing sophistication with which interviewing is being approached, the ever-expanding body of research in all types of interview settings, recent interpersonal communication theory, and the importance of equal opportunity laws on interviewing practices. The increasing diversification of the workplace and the influences of the global village receive special treatment in several chapters.
