ISO 6887-5:2010(en), Microbiology of food and animal

ISO 6887-1:2017 is applicable to the general case and other parts apply to specific groups of products as mentioned in the foreword. Some aspects might also be applicable to molecular methods where matrices can be associated with inhibition

of the PCR steps and consequently affect the test result.

ISO 6887-1 : 2017 MICROBIOLOGY OF THE FOOD CHAIN

ISO 6887-1 defines the general rules for the preparation of the initial suspension and decimal dilutions for microbiological examination. This part of ISO 6887 excludes preparation of samples for both enumeration and detection test methods where preparation details are specified in the relevant International Standards.

Standard ISO 6887-1:2017-ed.2.0 15.3.2017

This document specifies rules for the preparation of samples of milk and milk products and their suspensions for microbiological examination when the samples require a different preparation from the general methods specified in ISO 6887-1.
