Biology 2e (2nd edition) is designed to cover the scope and sequence requirements of a typical two-semester biology course for science majors. The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens. Biology includes rich features that engage students in scientific inquiry, highlight careers in the biological sciences, and offer everyday applications. The book also includes various types of practice and homework questions that help students understand -- and apply -- key concepts. The 2nd edition has been revised to incorporate clearer, more current, and more dynamic explanations, while maintaining the same organization as the first edition. Art and illustrations have been substantially improved, and the textbook features additional assessments and related resources.

The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. *LONG WALK TO FREEDOM* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

This volume contains the papers of the 'Seventh Groningen Workshop on Hellenistic Poetry: Beyond the Canon' (Groningen 2004). During the workshop a first draft of each of the papers was commented on by an international group of specialists in the field of Hellenistic poetry. A number of previous workshops was devoted largely to the major Hellenistic poets.

This recent workshop explores what the poets 'beyond the canon' of Callimachus, Theocritus and Apollonius Rhodius had to offer and it discussed questions of canonicity in Hellenistic poetry on a more general level. The papers in the present volume deal with a large range of authors and genres: Herondas, Lycophron, Euphorion, Hermesianax, Cercidas, Crates of Thebes and Alexander Aetolus, and the didactic poetry of Aratus, Nicander and Ps.-Scymnus, the later bucolic poems of Moschus and Bion and the pattern poems of Simias. At the same time special attention is given to the hexameter in inscribed Hellenistic epigram, which is compared to that of poets in the environment of the Museum of Alexandria. This volume is part of a series. Every two years a 'Workshop on Hellenistic Poetry' takes place at the University of Groningen, the papers of which are published in 'Hellenistica Groningana'.
