Salvation is from our side a choice, from the divine side [...] a conquest of the Most High God. - A. W. Tozer With words like these, Tozer shakes the soul. He crumbles the lies we believe and calls us to the more sure way. In these pages, Tozer says what it means to truly be saved. It is not merely to assent to Jesus and go on our same old way, but to be conquered by the Almighty God and invaded by His Spirit. A saved person is a transformed person. Let Tozer upend you in this moving prequel to The Pursuit of God. And being upended, may you be found standing upright in an upside-down world.

A compelling analysis of how "middling" Americans entertained themselves and how these entertainments changed over time. The changing styles of middle-class home entertainments, Melanie Dawson argues, point to evolving ideas of class identity in U.S. culture. Drawing from 19th- and early-20th-century fiction, guidebooks on leisure, newspaper columns, and a polemical examination of class structures, *Laboring to Play* interrogates the ways that leisure performances (such as parlor games, charades, home dramas, and tableaux vivants) encouraged participants to test out the boundaries that were beginning to define middle-class lifestyles. From 19th-century parlor games involving grotesque physical contortions to early-20th-century recitations of an idealized past, leisure employments mediated between domestic and public spheres, individuals and class-based affiliations, and ideals of egalitarian social life and visible hierarchies based on privilege. Negotiating these paradigms, home entertainments provided their participants with unique ways of performing displays of individual ambitions within a world of polite social interaction. *Laboring to Play* deals with subjects as wide ranging as social performances, social history (etiquette and gentility), literary history, representations of childhood, and the history of the book.

## **Young Migrant Identities**

In this day and age, much has been discussed as to what it means 'to be an Arab'. However, this enlightening volume seeks instead to invite us deeper into young Arab-Australian men's lives as we explore their vocational aspirations and working experiences within highly racialised and hierarchical industries. *Young Migrant Identities* is an in-depth exploration into the lives of Arab-Australian young men living in Western Sydney with creative career aspirations. Indeed, not only does Idriss explore how these men develop interests in fields such as music, filmmaking, and design, but she also examines the multilinear routes that they take to turn these interests into vocational identities. However, in the local migrant communities in which these young men live, creative identities are seen to compromise individual and familial prospects for social mobility, and artistic interests tend to go unsupported. Thus, this book also strives to offer new insights about how notions of gender, ethnicity, and social class are experienced because of these young men's 'risky' career ambitions. A timely volume, *Young Migrant Identities* draws together a range of theoretical issues and debates, engaging with sociological approaches to race and social class, creative and cultural economies, and studies on youth. It will particularly appeal to post-graduate students and post-

doctoral researchers interested in fields such as Youth Studies, Ethnicity Studies, Cultural Economy, and Migration Studies.

## **The Templar Cross**

Here is the first book to identify American builders of planers, shapers and slotters, who operated throughout the 19th and early 20th centuries. Written in the style of the author's previous groundbreaking books on the American machine tool industry, this volume provides the reader with invaluable information on over 300 makers. Some are very well known, but many have previously gone virtually unrecognized by researchers. More than 1000 illustrations, taken from original catalogs and contemporary periodicals, show how these machines developed: starting out in the early 1800s as crude, hand-built copies of English machines and becoming, over the course of a century, monster machines weighing nearly one million pounds, unmatched elsewhere in the world. Numerous machine accessories, such as chucks, dividing heads, milling attachments and keyseating attachments, among others, are identified and illustrated. In addition, the book includes a glossary of terms used in describing the various types of planers, shapers and slotters, and provides illustrations that help identify the individual parts of the machines.

## **Challenge Math**

Postcolonialism and Political Theory explores the intersection between the political and the postcolonial through an engagement with, critique of, and challenge to some of the prevalent, restrictive tenets and frameworks of Western political and social thought. It is a response to the call by postcolonial studies, as well as to the urgent need within world politics, to turn towards a multiplicity largely excluded from globally dominant discourses of community, subjectivity, power and prosperity—constituted by otherness, radical alterity, or subordination to the newly reconsolidated West. The book offers a diverse range of essays that re-examine and open the boundaries of political and cultural modernity's historical domain; that look at how the racialized and gendered and cultured subject visualizes the social from elsewhere; that critique the limits of postcolonial theory and its claim to celebrate diversity; and that complicate the notion of postcolonial politics within settler societies that continue to practice exile of the indigenous. Postcolonialism and Political Theory is an ideal book for graduate and advanced undergraduate level study and for those working both disciplinarily and interdisciplinarily, both inside and outside academia.
