Kawasaki KLR650 2008-2012 Carolus Clusius The Remains The Psychology of Perspective and Renaissance Art

## Kawasaki KLR650 2008-2012

When the world goes mad, a blackjack dealer and an exotic dancer are mysteriously spared. But now they're trapped in Reno, surrounded by a veritable army of the undead - and with no idea what might wait for them beyond the city limits if they can escape. Are they the last man and woman on Earth? And if so, how long can they last?

## Carolus Clusius

Carolus Clusius (Arras 1526-Leiden 1609) was one of the most eminent botanists of the European Renaissance. His name is closely connected with the introduction of many exotic plants in Europe, in particular the tulip. In this volume a group of distinguished scholars explore his role in both the botanical renaissance and the genesis of botany as a field of study. Clusius' wide-ranging correspondence provides a rich source of information and documents the formation of the European community of naturalists. These interdisciplinary essays will fascinate anyone interested in natural history, the history of science, and Renaissance culture.

## The Psychology of Perspective and Renaissance Art

Michael Kubovy, an experimental psychologist, recounts the lively history of the invention of perspective in the fifteenth century, and shows how, as soon as the invention spread, it was used to achieve subtle and fascinating aesthetic effects. A clear presentation of the fundamental concepts of perspective and the reasons for its effectiveness, drawing on the latest laboratory research on how people perceive, leads into the development of a new theory to explain why Renaissance artists such as Leonardo and Mantegna used perspective in unorthodox ways which have puzzled art scholars. This theory illuminates the author's broader consideration of the evolution of art: the book proposes a resolution of the debate between those who believe that the invention/discovery of perspective is a stage in the steady progress of art and those who believe that perspective is merely a conventional and arbitrary system for the representation of space.
