Land Rover Discovery Service and Repair Manual

From the Foreword: "This manual is the text for your training as a B-25 pilot and airplane commander. The Air Forces' most experienced training and supervisory personnel have collaborated to make it a complete exposition of what your pilot duties are, how each will be performed, and why it must be performed in the manner prescribed. The techniques and procedures described in this book are standard and mandatory. In this respect the manual serves the dual purpose of a training checklist and working handbook. Use it to make sure that you learn everything described herein. Use it to study and review the essential facts concerning everything taught. Such additional self-study and review will not only advance your training, but will alleviate the burden of your already overburdened instructors. This training manual does not replace the Technical Orders for the airplane, which will always be your primary source of information concerning the B-25 so long as you fly it. This is essentially the textbook of the B-25. Used properly, it will enable you to utilize the pertinent Technical Orders to even greater advantage."

The Art of the Rapier is a comprehensive manual intended to teach modern people how to fence in the style of the late sixteenth and seventeenth centuries. Profusely illustrated with both photographs and examples from period treatises, it is written for three main audiences: devotees of the Historical European Martial Arts (HEMA) movement; members of the Society for Creative Anachronism (SCA) and other medieval-recreation groups; and coaches of the modern sport of fencing who are looking to expand their competencies. No prior experience is necessary: The Art of the Rapier draws from the works of Camillo Agrippa (1553), Salvator Fabris (1606), Nicoletto Giganti (1606 and 1608), and Ridolfo Capo Ferro (1610) to present their essential actions and teaches the movement skills to perform these actions from the ground up. It then builds the actions into period-accurate tactical sequences and shows how to incorporate these concepts into actual bouts. The

final chapters teach advanced skills such as grappling techniques, rapier and dagger, and coaching techniques. A translation of Albert Lacaze and George Dubois' 1925 essay on sword and dagger completes the work. This is a book that not only presents the art of Renaissance fencing in a way that is accessible to modern people, but also an entire philosophy and structure for reconstructing and teaching historical martial arts that will enable you to translate any historical fencing treatise from page to practice.
