Development and Modern Industrial Policy in Practice

Christmas comes to Beachwood Bay in this flirty, festive treat from NYT bestselling author Melody Grace! Lacey James is wild, spontaneous and up for anything. Daniel Sullivan is careful, sensible, and mending his broken heart. It's a match nobody saw coming, but when the unlikely pair get stranded together on the way home for the holidays, Lacey finds her long-term crush impossible to ignore. As the snow keeps falling, and a friendly game of truth or dare gets way out of control, Daniel discovers that the one girl he wants more than anything is the last person he expected. But when the snow melts, will their night together be more than just a memory? And will they make it to Beachwood Bay in time for the wedding?

Anything can happen this holiday season! * Author's note: Welcome to Beachwood Bay! Each book in the bestselling series is a stand-alone love story following a new couple, but you'll enjoy reading the other titles and seeing familiar faces return.

The Beachwood Bay series: 1. Untouched 2. Unbroken 3. Untamed Hearts 4. Unafraid 5. Unwrapped 6. Unconditional 7. Unrequited 8. Uninhibited 9. Unstoppable 10. Unexpectedly Yours 11. Unwritten 12. Unmasked 13.

Unforgettable PRAISE FOR MELODY GRACE: "Melody Grace created fascinating

characters that are simply I-R-R-E-S-I-S-T-I-B-L-E ! Her stories leave you with a big smile on your face and a heart bursting with love." - A Bookish Escape Blog "Sexy and sweet: the perfect summer read!" - Corinne Michaels, New York Times bestselling author "Heartwarming, swoony, and sexy as hell." - Claire Contreras, New York Times bestselling author "Sizzling summer perfection! Melody Grace does it again." - Kendall Ryan, New York Times bestselling author "Sizzling hot and super emotional - the perfect combo!" - NYT and USA Today bestselling Lauren Blakely "A roller coaster ride of pure emotion beautifully written." Blame it on the Rain Reviews

The Berenstain Bears Think of Those in Need

This volume contains the edited proceedings of the Working Conference on the Transfer and Diffusion of IT for Organizational Resilience, sponsored by the International Federation for Information Processing (IFIP) Working Group 8.6 (Transfer and Diffusion of Information Technology), and held in Galway, Ireland in June of 2006. The material contained in this book represents current thinking on the topic of resilience by academics and leading practitioners.

Handbook on Tourism Product Development

Dictionary of Hard Words

This book is about the UN's role in housing, land, and property rights in countries after violent conflict.

Unwrapped

This open access book analyzes and seeks to consolidate the use of robust quantitative tools and qualitative methods for the design and assessment of energy and climate policies. In particular, it examines energy and climate policy performance and associated risks, as well as public acceptance and portfolio analysis in climate policy, and presents methods for evaluating the costs and benefits of flexible policy implementation as well as new framings for business and market actors. In turn, it discusses the development of alternative policy pathways and the identification of optimal switching points, drawing on concrete examples to do so. Lastly, it discusses climate change mitigation policies' implications for the agricultural, food, building, transportation, service and manufacturing sectors.--

Climate Change in Cities

This book provides an overview of the global pharmaceutical pricing policies.

Medicines use is increasing globally with the increase in resistant microbes, emergence of new treatments, and because of awareness among consumers. This has resulted in increased drug expenditures globally. As the pharmaceutical market is expanding, a variety of pharmaceutical pricing strategies and policies have been employed by drug companies, state organizations and pharmaceutical pricing authorities.

The Sweet Gum Tree

What if every choice you ever made had the power to reshape reality?Joni, the daughter of World Walker Seb Varden, has never met her father. And the world he left behind has become a dangerous place for the last generation of Manna users. Mee and John insist Seb will return, but what if they're wrong?Could it be possible she has none of Seb Varden's powers? Or might her abilities reveal themselves as she leaves childhood behind? In her seventeenth year, Joni will be forced to leave those she loves, face a great evil, and finally learn the truth about her father.Book Three in the bestselling The World Walker series."Yet another amazing book by Mr Sainsbury""A new name to look out for in Sci-Fi"

Agenda-setting Dynamics in Canada

This book describes how surface tension effects can be used by engineers to provide mechanical functions in miniaturized products (1 mm). Even if precursors of this field such as Jurin or Laplace already date back to the 18th century, describing surface tension effects from a mechanical perspective is very recent. The originality of this book is to consider the effects of capillary bridges on solids, including forces and torques exerted both statically and dynamically by the liquid along the 6 degrees-of-freedom. It provides a comprehensive approach to various applications, such as capillary adhesion (axial force), centering force in packaging and micro-assembly (lateral force) and recent developments such as a capillary motor (torque).

Drought phenotyping in crops: From theory to practice

This book surveys the development of eight issues in Canada over a decade - AIDS, crime, the debt/deficit, the environment, inflation, national unity, taxes, and unemployment - to explore how the salience of issues changes over time, and to examine why these changes are important to our understanding of everyday politics."

Huling | The MW Summary Guide

Light for Visual Artists

So, you've been given a conference to run. Whether it's part of your job or you are a complete novice, you will only get one chance to get it right. It is a 'live' event, which cannot be re-run. But don't panic. As with most organisational projects, there is a formula you can use and a sequence you can follow to minimise the risk of failure. This revised and updated edition of *How to Run A Successful Conference* shows you how. John G Fisher gives clear and practical guidance on how to manage, in the right sequence, all those who contribute to the success of a conference, from the service providers to the speakers. He gives sound advice on everything you need to consider, such as: the objectives of your conference; building the budget; finding the right venue; when to bring in the professionals; event management and logistics; organising accommodation; food and drink; going abroad; using technology. You'll also find advice on how to assess the success of your event. If you've just been given the task of running a conference, don't even think about it until you've read this book.

The Element Encyclopedia of Birthdays

Tourism products are the basis for a destination's tourism sector operation: This Handbook outlines the essential elements in the process of tourism product development planning and implementation. It illustrates successful approaches and case studies and sets out best practice examples and benchmarks."

How to Run a Successful Conference

Light for Visual Artists is the first book to look at the way light can be used to create realistic and fantastical effects in a wide range of visual media. It is a valuable resource for animators, digital illustrators, painters, photographers, and artists working in any medium. Clearly written by a practicing illustrator, this book is essential reading for both students and professional artists.

Pictorial Atlas of Botulinum Toxin Injection

As the ultimate resource on the basics of the Linux desktops, servers, and programming tools, this book is written by the ultimate author on all things Linux.

This transition resource is ideal if you are making the move from Windows or Macintosh to using Linux as your desktop system, and explains the Linux technology, offers detailed installation instructions, and includes step-by-step descriptions of key desktop and server components. You'll relish the in-depth descriptions that will help you choose the best Linux distribution to suit your needs. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Housing, Land, and Property Rights in Post-Conflict United Nations and Other Peace Operations

Sweet tea, corn bread and soup beans; everyday fare for eight-year-old Alix French, the precocious darling of a respected southern family. But nothing was ordinary about the day she met ten-year-old Nick Anderson, a boy from the wrong side of town. Armed with only a tin of bee balm and steely determination, Alix treats the raw evidence of a recent beating that mars his back, an act that changes both their lives forever. Through childhood disasters and teenage woes they cling together as friendship turns to love. The future looks rosy until the fateful night when Frank Anderson, Nick's abusive father, is shot to death in his filthy trailer. Suddenly, Nick is gone, leaving Alix alone, confused and pregnant. For the next fifteen years she wrestles with the pain of Nick's abandonment, a bad

marriage, her family and friends. But finally, she's starting to get her life back together. Her divorce is almost final, her business is booming, and she's content if not happy-until the day she looks up and sees Nick standing across the counter. He's back, and he's not alone. Once again Alix is plunged into turmoil and pain as Nick tries to win her love, something she resists with all her strength. Only one thing might break the protective wall she's built around her emotions-the truth about Frank Anderson's death. But when that truth comes out and those walls crumble, neither Alix nor Nick is prepared for the emotional explosion that could destroy as well as heal.

Sustainability in Project Management

This book introduces readers to Sonia Sotomayor, the first Latina Supreme Court Justice.

Understanding Risks and Uncertainties in Energy and Climate Policy

Emphasizing sound, cost-effective management rather than emergency repairs, this comprehensive volume offers practical guidelines on evaluating and managing pavements for airports, roads, and parking lots. The author focuses on the

implementation and maintenance of successful management strategies for both network and project levels, with repair techniques also described . Detailed chapters: 1) outline step-by-step procedures for project and network level pavement management 2) illustrate effective cost analysis and budget planning for pavement maintenance 3) guide the reader in the selection and use of non-destructive deflection, roughness measurement, and friction measurement equipment 4) present state-of-the-art pavement rehabilitation and condition prediction techniques 5) demonstrates the Pavement Condition Index (PCI) procedure for airfields and surfaced and unsurfaced roads. Extensive appendices serve as a field manual for identifying all types of pavement distress and their causes, and hundred of photographs facilitate accurate pavement evaluation. Civil and pavement engineers will find complete information on pavement inspection, evaluation, and management in this indispensable reference.

Sustainability Impact Assessment of Land Use Changes

A friend's duty. Tyler Murphy was an LAPD detective, single and happy—until a near-fatal tragedy crippled his friend, fellow detective Eric Catalano. While Tyler supported Eric, he also became a shoulder for Eric's wife, Delaney, to lean on. But with one naughty suggestion from Eric, a drunken night with Delaney spilled into erotic abandon. Before it was over, Tyler saw his best friend's wife as a woman and yearned for more. When Eric struggled to deal with the aftermath, Delaney begged

Tyler to leave. Crushed, he fled to Louisiana, hoping to escape his longing for the one woman he could never have again...and unaware of what he'd left behind. A lover's desire. After two years of living with regret, Tyler finds Delaney on his doorstep, her husband having abandoned her long ago. She's protecting a shocking secret and desperately needs refuge from a stalker determined to see her dead. As they fight to stay alive and catch the killer, they struggle to resolve the guilt of their past pleasures. But they can't deny that what was once a spark is now a flame burning out of control. To possess Delaney—body and soul—Tyler must heal her pain and thwart the evil that's a mere breath behind her... MATURE AUDIENCE

Systems Analysis and Design with UML

This book presents pioneering work on a range of innovative practices, experiments, and ideas that are becoming an integral part of urban climate change governance in the 21st century. Theoretically, the book builds on nearly two decades of scholarships identifying the emergence of new urban actors, spaces and political dynamics in response to climate change priorities. However, it further articulates and applies the concepts associated with urban climate change governance by bridging formerly disparate disciplines and approaches. Empirically, the chapters investigate new multi-level urban governance arrangements from around the world, and leverage the insights they provide for both theory and

practice. Cities - both as political and material entities - are increasingly playing a critical role in shaping the trajectory and impacts of climate change action. However, their policy, planning, and governance responses to climate change are fraught with tension and contradictions. While on one hand local actors play a central role in designing institutions, infrastructures, and behaviors that drive decarbonization and adaptation to changing climatic conditions, their options and incentives are inextricably enmeshed within broader political and economic processes. Resolving these tensions and contradictions is likely to require innovative and multi-level approaches to governing climate change in the city: new interactions, new political actors, new ways of coordinating and mobilizing resources, and new frameworks and technical capacities for decision making. We focus explicitly on those innovations that produce new relationships between levels of government, between government and citizens, and among governments, the private sector, and transnational and civil society actors. A more comprehensive understanding is needed of the innovative approaches being used to navigate the complex networks and relationships that constitute contemporary multi-level urban climate change governance. Debra Roberts, Co-Chair, Working Group II, IPCC 6th Assessment Report (AR6) and Acting Head, Sustainable and Resilient City Initiatives, Durban, South Africa “Climate Change in Cities offers a refreshingly frank view of how complex cities and city processes really are.” Christopher Gore, Associate Professor and Chair, Department of Politics and Public Administration, Ryerson University, Canada “This book is a rare and welcome contribution

engaging critically with questions about cities as central actors in multilevel climate governance but it does so recognizing that there are lessons from cities in both the Global North and South.” Harriet Bulkeley, Professor of Geography, Durham University, United Kingdom “This timely collection provides new insights into how cities can put their rhetoric into action on the ground and explores just how this promise can be realised in cities across the world - from California to Canada, India to Indonesia.”

Handwriting Practice 120 Page Honey Bee Book Helena

This is an elementary introduction to syntactic analysis. Assuming no prior knowledge of the subject whatsoever, it is intended for students who are encountering such analysis for the first time. For those embarking on a longer term study of syntax, this will be a valuable and quickly assimilated foundation course. For students who will need to use syntax as a basic descriptive tool - such as trainee teachers, speech therapists or students of literacy style - the book provides a framework for their analysis and practice in its use. The book begins by looking at the use of generalizations in describing sentence structure and the basis for word categories. It then moves through increasingly more complex constructions giving students plenty of opportunity by way of practical exercises to understand the basis of each analysis before moving further. The aim of the book is not to explore complex issues of argumentation. Its emphasis is on practical "hands on"

analysis.

The Seventeenth Year

Here is every concept you need to successfully manage infrastructure facilitiesÑfrom roads and bridges to airports and sports complexes. This sure-fire guide shows you how to identify infrastructure needs throughout the service life of a facilityand offers a framework for infrastructure management which integrates all planning, design, construction, maintenance, rehabilitation, and renovation issues. You'll find methods for database management, data collection, performance monitoring, quality control in design and construction, life-cycle analysis, and more.

Is That Really You, God?

The 4th edition of Dennis/Wixon/Tegarden's Systems Analysis and Design with UML continues to offer a concise, modern and applied introduction to OO SAD. The new edition offers updated material, more hands-on exercises, and more applied examples. Furthermore a new emphasis on agile methods tackles programming issues and on business process modeling and ethics to add strategic coverage that appeals to IS majors. Additional coverage of new mobile devices and tablets

refresh the content as well as supplementary material, including minicases, coverage of ethics, business process modeling, mobile applications and better illustrations, examples, and exercises.

Pavement Management for Airports, Roads, and Parking Lots

Development and Modern Industrial Policy in Practice provides an up-to-date analysis of industrial policy. Modern industrial policy refers to the set of actions and strategies used to favor the more dynamic sectors of the economy. A key aspect of moder

Fabrics of Freedom

This book provides a clear understanding of the nuts and bolts of valuation approaches for business investments, including market, income and asset-based methods. It reviews tools that arbitrators may employ to reach their final compensation assessment on a principled basis. The bookand's many practical recommendations explore the decision making processes entailed in three central aspects of the arbitratorand's role: and' advance planning to enhance understanding of expert valuation evidence; and' identification of and'apples-to-orangesand' miscomparisons; and and' recognition of the true comparability

between the business at issue and other examples offered in the expert evidence. The presentation focuses not only on the legal standards applicable to the valuation (full or adequate compensation, reparations, restitution, actual loss, fair market value, fair or reasonably equivalent value, lost profits, etc.), but also on the informed judgment and reasonableness that must enter into the process of weighing the facts of each case and determining its aggregate significance. The book considers common valuation methods like discounted cash flows, adjusted present values, capitalized cash flows, adjusted book values and comparable sales and transactions. Additionally, it addresses means for arbitrators to assess expert valuation evidence in complex business investment disputes. andquot;Best book 2008 of the OGEMID awards!andquot;

I Am Sonia Sotomayor

Did you know that your birthday can give you surprising details about your personality profile, your ideal partner, and your dark side? The Element Encyclopedia of Birthdays combines astrology, psychology, numerology and tarot for practical advice on how to make the best of yourself and shape your future.

Heritage, Culture and Society

There are many reasons why strategic intelligence is required to support policy decisions. These primarily stem from the nature of today's knowledge society with two contrasting trends. On the one hand, there is a trend of increasing human intelligence in the economic, social and political systems. On the other hand, there is a trend towards dissolving certainties about the problems and solutions of today's society. Clearly, more information does not necessarily imply more certainties on how to act. What is more, the same facts are often interpreted in markedly different ways: the same policy relevant information can – and often does – result in conflicting framing of a problem by different stakeholders. This is mainly due to competing assumptions, rather than because of inconsistent facts. Therefore, it is not surprising that policy-makers are calling for strategic intelligence to support their understanding of today's challenges, including the relevant aspects of science and technology, their impact and their possible future developments. Over the last 15 years, Europe has rapidly adopted the practice of developing and using Impact Assessment (IA) tools to support decision-making. Formal procedures and guidance for IA are well established within the European Commission and in most EU Member States. The adoption of IA procedures alone, however, does not guarantee that every policy domain is actually using the full potential of these assessment tools in the preparation of policies and legislation.

Pharmaceutical Prices in the 21st Century

The concept of sustainability has grown in recognition and importance. The pressure on companies to broaden their reporting and accountability from economic performance for shareholders, to sustainability performance for all stakeholders is leading to a change of mindset in consumer behaviour and corporate policies. How can we develop prosperity without compromising the life and needs of future generations? Sustainability in Project Management explores and identifies the questions surrounding the integration of the concepts of sustainability in projects and project management and provides valuable guidance and insights. Sustainability relates to multiple perspectives, economical, environmental and social, but also to responsibility and accountability and values in terms of ethics, fairness and equality. The authors will inspire project managers to be aware of these considerations, and to apply them to the role they play in projects, not just 'doing things right' but 'doing the right things right'.

Beginning Syntax

This practical guide to hearing God's voice shows how an ordinary man who was committed to hearing God and obeying Him became the founder of the largest interdenominational missions organization in the world. Loren Cunningham's dream began with a vision - waves of young people moving out across the continents announcing the Good News of Jesus Christ to the whole earth. Decades later, Loren's vision has grown into an interdenominational movement of Christians

from around the world who are dedicated to presenting the Gospel to this generation. How did God move Loren's dream from vision to reality? He led Loren and his wife, Darlene, through a series of tough lessons in guidance. The exciting story of Youth With A Mission has much to teach us about the art of listening to God as we seek to be used by Him. Is That Really You, God? is not only a practical guide to hearing God's voice, but also an amazing testimony to how following His direction can impact our lives and our world for the glory of God's kingdom. International statesman and conference speaker Loren Cunningham and his wife, Darlene, are the founders of Youth With A Mission. They currently live at the YWAM University of the Nations center in Kona, Hawaii. Loren speaks and teaches internationally. His extensive missionary travels have taken him to every country on earth. Pages: 203 (paperback)

Energy, Environment and Sustainable Development

"Fabrics of Freedom" is the saga of a family whose origins are in the Marches of Scotland. Tragedy, born of the desire to live free, gives birth to one desperate challenge after another as Robbie Liddle is swept toward his destiny on the battlegrounds of America's War for Independence. The deaths of his father and maternal grandfather conspire to send his mother, grandmother, and uncle on the perilous journey across the Atlantic in hopes of founding a tailor shop. This dream was inspired by the contents in his grandfather's chest of tools of the trade.

Through shipwreck and financial hardship, they are led to the possibility of freedom in the Township of Leacock, County of Lancaster, Proprietorship of Pennsylvania. In spite of physical challenges, Robbie displays hereditary skills in the demands of tailoring. Bondage to his uncle, however, arouses in him the first yearning for freedom. With his best friend, Robbie flees northeastward to West Jersey. His wit and charm, inherited from the father he never knew, combined with the skills learned at his mother's knee, enable Robbie to find a new kind of freedom in the arms of the maiden who captured his heart--Miss Isabella Barclay. The Jerseys, however, are directly in the path of the coming conflict for a national freedom. Back and forth across what would become the third State among the United States, the forces of the British and the Continentals bloody the soils of this tiny colony. For the sake of freedom from such bondage to England, Robbie enlists in the New Jersey Militia. His military experiences in places like Brandywine and Monmouth and Valley Forge provide fodder for the tales he will spin throughout the rest of his long life. The tailor becomes the teller of tales. Heroes of such world-changing conflicts are not entirely the general officers, but the citizens who answer the call to risk their lives in the cause of freedom. Every chapter of Robbie Liddle's story is loosely connected with the various fabrics and materials with which he worked and in which he and his family dressed. Together they create that wonderful quilt of a life that rejoices in a liberty that is never free.

The History of India

Heritage, Culture and Society contains the papers presented at the 3rd International Hospitality and Tourism Conference (IHTC2016) & 2nd International Seminar on Tourism (ISOT 2016), Bandung, Indonesia, 10—12 October 2016). The book covers 7 themes: i) Hospitality and tourism management ii) Hospitality and tourism marketing iii) Current trends in hospitality and tourism management iv) Technology and innovation in hospitality and tourism v) Sustainable tourism vi) Gastronomy, foodservice and food safety, and vii) Relevant areas in hospitality and tourism Heritage, Culture and Society is a significant contribution to the literature on Hospitality and Tourism, and will be of interest to professionals and academia in both areas.

The Transfer and Diffusion of Information Technology for Organizational Resilience

New information and strategies for managing the energy crisis from the perspective of growing economies are presented. Numerous case studies illustrate the particular challenges that developing countries, many of which are faced with insufficient resources, encounter. As a result, many unique strategies to the problems of energy management and conservation, environmental engineering, clean technologies, biological and chemical waste treatment and waste management have been developed.

Linux Bible 2009 Edition

While the Internet revolution has vastly improved communication among businesses and individuals, pressure has been building for faster and less expensive broadband data services. Such services could not only yield vastly improved and less expensive provision of traditional applications such as voice telephony and Web browsing, but could also enable new applications such as Internet-based television, videoconferencing, and software distribution. However, broadband services and prices have not kept pace either with demand or with progress in information technology. This new book analyzes the markets and policy issues underlying the broadband dilemma. Charles Ferguson asserts that the Telecommunications Act of 1996 and federal policy have failed to provide sufficient levels of new entry, competition, and innovation in the local telecommunications market, which remains dominated by monopoly telephone companies. New entrants and Internet-based firms such as competitive local exchange carriers (CLECs), Internet service providers (ISPs), and enhanced service providers (ESPs) remain disadvantaged relative to the monopoly incumbent local exchange carriers (ILECs). Flawed policy has also allowed ILECs to continue to engage in monopolistic practices, mergers, and anticompetitive conduct. Through a combination of inefficiency and rational monopolistic conduct, the ILECs are thus able to retard the deployment of new technology and services through delaying tactics, regulatory procedures, litigation, and political influence. Competition from the cable television

(CATV) industry probably cannot fully address these problems. The CATV industry cannot compete in most business markets. In residential markets CATVs competitive potential is greater, but CATV vendors incentives to favor their own networks, services, and proprietary content raise major concerns analogous to those raised by the ILECs. The combined result of these market and policy failures is inadequate technological progress, innovation, and productivity growth in advanced Internet services and in telecommunications services generally. This significantly retards U.S. and global economic growth, perhaps by as much as one percent per year. Ferguson believes federal policy must be adjusted to ensure the robust infrastructure necessary for advanced Internet services, electronic commerce, open-systems HDTV, videoconferencing, and improved voice telephony. Ferguson recommends several policy changes, including increased regulatory surveillance of ILEC conduct, antitrust actions against ILECs, limits on conflicts of interest in government and academia, limits on CATV control of proprietary content, and possibly tax measures to stimulate construction of competitive

The Broadband Problem

This book examines the interaction between art, design, technology and the social sciences. It features 56 papers that were presented at the International Symposium on Research of Arts, Design and Humanities, ISRADH 2014, held at

Sutera Harbour Resort, Kota Kinabalu, Malaysia. Complete with helpful diagrams and tables, the papers cover such topics as artificial reef development, racial discourse in the social media, stoneware as a replacement material for modern ventilation walls, and factors contributing to internet abuse in the workplace. Overall, the coverage focuses on global design trends and demands with an emphasis on people, business and technology. Inside, readers will find information on art and science in industrial applications; art management and entrepreneurship; cognitive, psychological and behavioral science; design technology and sustainable development; humanities and social applications in quality of life; social implications of technology; and visual communication and technologies. Taking a multi-disciplinary approach, the book features insightful discussions among academicians and industrial practitioners on the evolution of design that will appeal to researchers, designers and students.

Proceedings of the International Symposium on Research of Arts, Design and Humanities (ISRADH 2014)

Provides information on using the smartphone, covering such topics as customizing the device, connecting to Wi-Fi and Bluetooth, browsing the Internet, navigating with Google Maps, managing media, and finding apps and games.

Valuation for Arbitration

This topic is a unique attempt to simultaneously tackle theoretical and practical aspects in drought phenotyping, through both crop-specific and cross-cutting approaches. It is designed for – and will be of use to – practitioners and postgraduate students in plant science, who are grappling with the challenging task of evaluating germplasm performance under different water regimes. In Part I, different methodologies are presented for accurately characterising environmental conditions, implementing trials, and capturing and analysing the information this generates, regardless of the crop. Part II presents the state-of-art in research on adaptation to drought, and recommends specific protocols to measure different traits in major food crops (focusing on particular cereals, legumes and clonal crops). The topic is part of the CGIAR Generation Challenge Programme’s efforts to disseminate crop research information, tools and protocols, for improving characterisation of environments and phenotyping conditions. The goal is to enhance expertise in testing locations, and to stimulate the development and use of traits related to drought tolerance, as well as innovative protocols for crop characterisation and breeding.
