A guide to Leylines, Earth Energy lines and Nodes

The bestselling author of *The Lemon Tree Hotel* returns with an enchanting new holiday read about family bonds and following your heart, wherever it might take you. With her marriage in danger of falling apart, Joanna returns home to the beautiful but dilapidated Mulberry Farm Cottage in rural Dorset, where her sister Harriet is struggling to keep the Farm afloat and cope with their eccentric mother. When Joanna discovers a bundle of love letters in the attic, written by a watercolourist named Emmy, she is intrigued and sets out to discover Emmy's true story. Emmy's letters take Joanna to the picturesque alleyways and bridges of Lisbon, Prague, and the most romantic place of all: Venice - where a whole new magical world seems to unfold in front of her. Meanwhile, back at Mulberry Farm Cottage, a mysterious prowler adds to Harriet's problems and interrupts her search for a perfect partner. Will she ever find true love? Where will Emmy's mesmerising pathway lead? And more importantly, will Joanna and Harriet be able to rescue the cottage and finally be able to re-discover their sisterly bond?

Timpson's Leylines

A Treatise on Stars

Combining current trends, academic theories, and historical insights, this travel guide brings both lesser-known and famous European spiritual locales into perspective by explaining the significance of each sacred site. The cultural relevance, history, and spirituality of each site—including Stonehenge, the Acropolis, Mont Saint Michel, Pompeii, and Saint Peter's Basilica—are explained, creating a moving and artistic travel experience. Each destination—with selections spanning more than 15 countries throughout Europe—is accompanied by easy-to-follow maps and directions.

Secrets in the Fields

Rare Earth

Eclipses have long been seen as important celestial phenomena, whether as omens affecting the future of kingdoms, or as useful astronomical events to help in deriving essential parameters for theories of the motion of the moon and sun. This is the first book to collect together all presently known records of timed eclipse observations and predictions from antiquity to the time of the invention of the telescope. In addition to cataloguing and assessing the accuracy of the various records, which come from regions as diverse as Ancient Mesopotamia, China, and Europe, the sources in which they are found are described in detail. Related questions such as what type of clocks were used to time the observations, how the eclipse predictions were made, and how these prediction schemes were derived from the available observations are also considered. The results of this investigation have important consequences for how we understand the relationship between observation and theory in early science and the role of astronomy in early cultures, and will be of interest to historians of science, astronomers, and ancient and medieval historians.

Interventional Pulmonology

What determines whether complex life will arise on a planet, or even any life at all? Questions such as these are investigated in this groundbreaking book. In doing so, the authors synthesize information from astronomy, biology, and paleontology, and apply it to what we know about the rise of life on Earth and to what could possibly happen elsewhere in the universe. Everyone who has been thrilled by the recent discoveries of extrasolar planets and the indications of life on Mars and the Jovian moon Europa will be fascinated by Rare Earth, and its implications for those who look to the heavens for companionship.

The Sun and the Serpent

From Venice with Love

Proceedings of the Geological Society of London

Who Owns Stonehenge?

Paperback re-print of Earthstars The Visionary Landscape. London's Sacred sites are not scattered about the capital at random. Many form a recognisable pattern of sacred geometry, a vast temple groundplan identical to the design used to lay out Stonehenge's megaliths over 3,500 years ago. Astonishingly, it also relates to the measures and proportions of the New Jerusalem, The City of Revelation. If the conclusions drawn by the author are correct, this pattern is a circuit diagram of the forces of creation and a new evolutionary impulse is coming through our sacred sites, a transformatory influence which will change the way we perceive the world

Leys

An ethereal new collection that is “visceral with intellection” (David Lau) A Treatise on Stars extends Mei-mei Berssenbrugge’s intensely phenomenological poetics to the fiery bodies in a “field of heaven...outside spacetime.” Long, lyrical lines map a geography of interconnected, interdimensional intelligence that exists in all places and sentient beings. These are poems of deep listening and patient waiting, open to the cosmic loom, the channeling of daily experience and conversation, gestalt and angels, dolphins and a star-visitor beneath a tree. Family, too, becomes a type of constellation, a thought “a form of organized light.” All of our sense are activated by Berssenbrugge’s radiant lines, giving us a poetry of keen perception grounded in the physical world, where “days fill with splendor, and earth offers its pristine beauty to an expanding present.”

Ley Lines in Question

The Beer Guru's Guide

World travelers and armchair tourists who want to explore the mythology and archaeology of the ruins, sanctuaries,

mountains, lost cities, and temples of ancient civilizations will find this guide ideal. Detailed here are the monuments and sites where ancient peoples once gathered to perform sacred rituals and ceremonies to worship various gods and to achieve spiritual enlightenment. Important archaeological, historical, and geological destinations worldwide are profiled, from the Great Pyramid in Egypt and the Forbidden City in China to the Temples of Angkor in Cambodia and Mount Shasta in California. Sites are described in historical and cultural context, and practical contemporary travel information is provided, including detailed maps, drawings, photographs, and travel directions. This replaces 1888729023.

Ley Lines

Leys are as elusive as beams of starlight. They are everywhere, you just can't see them. They may be compared to the hidden knowledge of a secret tradition. On public display and freely available to those in the know. Invisible and unsuspected by those who aren't. Thus the ancient wisdom at the basis of leys is encoded within the land for future generations to discover anew, if they possess the vision. London's leys can lead you to magical places, to the soul of the city and to an understanding of the hidden unity which connects our ancient sacred sites to each other and also links our spiritual dimensions to theirs. To our ancestors these locations were places of the gods, places of healing, places of power, places of vision initiation, inspiration and revelation. They still are.

The Illustrated London News

How do people avoid the stresses of the digital age? Urban dwellers must now turn to nature to recover, restore and rebalance after the stresses brought on by relentless digital connectivity. It is easy to task nature as the cure, with technology as the ailment. In *Network Nature*, Richard Coyne challenges the definitions of both the natural and the artificial that support this time-worn narrative of nature's benefits. In the process, he attacks the counter-claim that nature must succumb to the sovereignty of digital data. Covering a spectrum of issues and concepts, from big data and biohacking to animality, numinous spaces and the post-digital, he draws on the rich field of semiotics as applied to natural systems and human communication, to enhance our understanding of place, landscape and architecture in a digital world.

London's Camelot and the Secrets of the Grail

"Hack the angel's wings off and send them to Scotland Yard in a plastic bag. That should get his attention." Things are not looking good for Detective Inspector Judas Iscariot. Cursed with immortality by a vengeful and angry God, Judas finds himself in present-day London and head of the secret occult crime division known as the Black Museum at Scotland Yard. It's his job to keep London's mysterious and macabre underworld under control. He's on top of his caseload and everything

seems fine until one morning a pair of severed angel wings is delivered to the Black Museum and his world is turned inside out and upside down. Again. It's true that he is one of history's most hated men, but he's been given a second chance that could also be - his last. His investigation takes him on a journey through a city where angels work in pubs, pulling pints and delivering the post, along invisible pathways created by the ancient druids to slave pits under construction sites and on special trains that use Britain's Ley lines as their tracks. Danger is everywhere and characters from London's evil past are queuing up to see him fall, but there are also those who will fight his corner too. WW2 Black Magicians, werewolves in U Boats and the mysterious 10 all want him dead but If Judas can change, if he can help those that need it most and become a 'Hero' then it's just possible that he will finally be forgiven for the crime of all crimes and find peace.

The Quarterly Journal of the Geological Society of London

From sacred mountains and places of pilgrimage to visions and out-of-body travel, this reference explores unusual and unexplained physical events, apparitions, and other phenomena rooted in religious beliefs. Each entry features a balanced presentation and includes a description of the phenomenon, the religious claims surrounding the occurrence, and a scientific response. Touring the world and history, this comprehensive reference includes entries on angels, comets, Marian apparitions, and religious figures such as Jesus, Mohammad, and Lao Tzu.

Quarterly Journal of the Geological Society of London

This book, designed for professionals, introduces a psychobiological model for understanding the paths that lead people to illness and provides recommendations for alterations of maladaptive pathways so that health is regained. Research findings are incorporated to identify causal variables for illness that can be targets for change. Evidence based recommendations for healthy behaviors and therapies are described. Throughout the book, the authors emphasize recognition of turning points on the path to illness that, through informed decision making and implementation of behavioral change, can be re-directed to pathways to health. This book presents case material to illustrate the directions that lead people to illness or to health. The pathways metaphor provides an organizing force, both in addressing variables contributing to illness onset, and in identifying interventions to restore health. This approach will guide the clinician to understanding how people become ill and the types of interventions that are appropriate for stress related illnesses. The clinician will also become better informed about ways to help clients make better decisions, mobilize clients' survival skills, and implement an interactive model of care. The book includes chapters on stress-related illnesses with high prevalence in today's society. For each illness, the genetic-psychobiological etiology is explored with enough detail so that the clinician understands the best method of patient assessment and treatment. One of the strengths of the book is the step-wise system of interventions that are applied to the stress-related illnesses. Beginning with re-establishment of normal daily psychobiological rhythms and

continuing to evidence based state of the art interventions, the professional is presented with detailed intervention plans. For example, the section on "Applications to common illnesses: metabolic disorders of behavior: diabetes, hypertension, and hyperlipidemia" considers the confluence of genetics, behavior, and maladaptive mind body interactions to produce the metabolic syndrome. Then the personal and professional assessments are described to establish the baseline for recommending treatment while fully engaging the patient. Finally, multilevel interventions are formulated for these disorders. The plan begins with clinician guided self care recommendations to re-establish the normal rhythm of appetite and satiety. The next level of interventions consists of skill building techniques, such as relaxation and imagery. Lastly, psychotherapy and advanced applied psychophysiological interventions are detailed. Case examples are used throughout to illustrate the pathways to illness, the turning points, and the pathways to health. From the patients' viewpoints, the pathways metaphor is a motivator. The patient is guided to understand the paths that led to illness. Subsequently, the patient becomes empowered by the pathways framework to begin to make choices that lead to health.

Sacred Places Around the World

A beautiful new edition of a classic work of landscape history, in which Alfred Watkins introduced the idea of ancient 'ley lines' criss-crossing the English countryside. First published in 1925, *The Old Straight Track* described the author's theory of 'ley lines', pre-Roman pathways consisting of aligned stone circles and prehistoric mounds, used by our Neolithic ancestors. Watkins's ideas have intrigued and inspired generations of readers - from historians to hill walkers, and from amateur archaeologists to new-age occultists. This edition of *The Old Straight Track*, with a substantial introduction by Robert Macfarlane, will appeal to all who treasure the history, contours and mystery of Britain's ancient landscapes.

Second Series of Bibliographical Collections and Notes on Early English Literature, 1474-1700

Examines the phenomena of crop circles, explaining how to tell a genuine circle from a hoaxed one and exploring time distortions, magnetic field disturbances, energy forces, the images, and their connection with music.

Matrix Energetics

What do walking, weaving, observing, storytelling, singing, drawing and writing have in common? The answer is that they all proceed along lines. In this extraordinary book Tim Ingold imagines a world in which everyone and everything consists of interwoven or interconnected lines and lays the foundations for a completely new discipline: the anthropological archaeology of the line. Ingold's argument leads us through the music of Ancient Greece and contemporary Japan, Siberian labyrinths and Roman roads, Chinese calligraphy and the printed alphabet, weaving a path between antiquity and the present. Drawing on a multitude of disciplines including archaeology, classical studies, art history, linguistics, psychology, musicology, philosophy and many others, and including more than seventy illustrations, this book takes us on an exhilarating intellectual journey that will change the way we look at the world and how we go about in it. This Routledge Classics edition includes a new preface by the author.

Network Nature

The mystical role of beer is explored in this humorous satire that promises ecstatic bliss, immortality, wisdom, and freedom from the hangover. Readers follow a step-by-step guide that takes them on a quest for The Holy Ale, a sacred beer that flows from the Font of All Wisdom and bestows infinite knowledge, immortality, and instant enlightenment. If initiation is survived, readers meet the Beer Guru himself, the Dalai Lager, the Beer Goddess, and the Barmy Swami. Teaching how to master the art of Tantric Beer drinking and how to create a Beer Temple, the central theme of this sacred scroll is that drinking beer is a religious experience.

Observations and Predictions of Eclipse Times by Early Astronomers

Ranging from the Hawaiian Archipelago to the Aleutian Islands, from Silicon Valley to Guam, Pathways to the Present is a thoroughly researched and concisely argued account of economic and environmental change in the postwar "American" Pacific. Following a brief survey of the history of the Pacific, the author takes the Hawaiian Islands as the center of American activities in the region and looks at interactions among native Hawaiian, developmental, military, and environmental issues in the archipelago after World War II. He then turns to land- and water-use problems that have intersected with more nebulous quality-of-life concerns to generate policy controversies in the Seattle region and the San Francisco Bay area, especially Silicon Valley. Economic expansion and environmentalism in Alaska are examined through the lens of changes occurring along the Aleutians. From there the study considers Hiroshima after its destruction by the atomic bomb in 1945, looking at residents' desire to combine urban-planning concepts. The author investigates the effort to remake Hiroshima as

a high-tech city in the 1990s, an attempt inspired by the perceived success of Silicon Valley, and postwar planning on Okinawa, where American influences were particularly strong. The final chapter takes into account issues raised on Guam regarding the growth of tourism and the use of the island for military purposes and links these to developments in the Philippines to the west and American Sâmoa to the south.

Ley Lines

An introduction to the phenomenon of the alignment of ancient sites. It examines the discovery of ley lines by Alfred Watkins in the 1920s, exploring all the explanatory theories, before going on to look at developments in research into ley lines.

Judas the Hero

Set in 17th century and 21st century London, the Enlightenment-era court of the Hapsburgs, China during the Qing Dynasty and ancient Egypt, Bright Empires is a five-volume fantasy. In The Skin Map, Kit Livingstone and his great-grandfather, Cosimo, are brought together to find a map originally tattooed on the skin of its author, a seventeenth-century explorer who had discovered the secret of access to other worlds and parallel universes. Malign forces are also after the map and, to the surprise of all, the map proves to be not the end of the quest but its beginning. A far greater prize remains, and a much more dangerous search will need to be undertaken.

Teaching British Literature

Matrix Energetics is a teachable healing phenomenon which merges the science of subtle energy and quantum physics with the incredible power of our own active imaginations and focused intent to produce physical and verifiable results. You can begin to unlock and awaken the powers, abilities, and awareness that are your birth right and spiritual heritage--the transformation of your morphic resonance of the whole being through Matrix Energetics--a technology of awareness that is transferable, teachable and universally available. Quantum physics teaches us that we are made of light and information; that so-called "Classic Reality" is actually an illusion. Photons move backwards and forwards in time and where they meet creates the present moment. Bartlett has found that metaphorically, we can time travel and access states of health and awareness and bring them into the present moment, instantly affecting beneficial changes in the conditions of people's lives. This is possible because everything is part of the zero point energy field, what some physicists have called "The Mind of God."

Archaeological review from Cambridge

The Old Straight Track

The Old Straight Track

Presents contradictory ideas about Stonehenge from the viewpoints of archaeologists, ancient Britons, earthmystery students, civil libertarians, and bystanders.

Pathways to Illness, Pathways to Health

Join bestselling author and media star John Timpson as he investigates leylines, ancient routes said to be energy lines of the earth. Relating his discoveries of holy wells, carved green men, early preaching crosses, Celtic fertility objects, and pagan sacred sites in his own witty style, you'll view the fascinating places and intriguing items that he found on his quest. Breathtaking photography rounds out this enthralling armchair travel companion. 224 pages (all in color), 7 3/4 x 9 5/8.

London's Ley Lines Pathways of Enlightenment

Across the world, sacred sites are linked together by mysterious alignments on the landscape. In the British Isles these links have come to be known as Ley Lines. First discovered in ancient times by the legendary Alfred Watkins, who first coined the term, they have been rigorously studied over the last fifty years. This revised and updated edition of the book by Danny Sullivan is the classic, comprehensive guide to the subject.
