A humorous and insightful look into what advice works, what doesn't, and what it means to transform yourself, by the co-hosts of the popular By the Book podcast. In each episode of their podcast By the Book, Jolenta Greenberg and Kristen Meinzer take a deep dive into a different self-help book, following its specific instructions, rules, and advice to the letter. From diet and productivity to decorating to social interactions, they try it all, record themselves along the way, then share what they've learned with their devoted and growing audience of fans who tune in. In How to Be Fine, Jolenta and Kristen synthesize the lessons and insights they've learned and share their experiences with everyone. How to Be Fine is a thoughtful look at the books and practices that have worked, real talk on those that didn't, and a list of philosophies they want to see explored in-depth. The topics they cover include: Getting off your device Engaging in positive self-talk Downsizing Admitting you're a liar Meditation Going outside Getting in touch with your emotions Seeing a therapist Before they began their podcast, Jolenta wanted to believe the promises of self-help books, while Kristen was very much the skeptic. They embraced their differences of opinion, hoping they'd be good for laughs and downloads. But in the years since launching the By the Book, they've come to realize their show is about much more than humor. In fact, reading and following each book's advice has actually changed and improved their lives. Thanks to the show, Kristen penned the Amish romance novel she'd always joked about writing, traveled back to her past lives, and she broached some difficult conversations with her husband about their marriage. Jolenta finally memorized her husband's phone number, began tracking her finances, and fell in love with cutting clutter. Part memoir, part prescriptive handbook, this honest, funny, and heartfelt guide is like a warm soul-baring conversation with your closest and smartest friends.

For readers of Inside of a Dog by Alexandra Horowitz, this New York Times bestseller offers mesmerizing insights into the interior lives of our smartest pets In the past decade, we have learned more about how dogs think than in the last century. Breakthroughs in cognitive science, pioneered by Brian Hare, have proven dogs have a kind of genius for getting along with people that is unique in the animal kingdom. This dog genius revolution is transforming how we live and work with our canine friends, including how we train them. Does your dog feel guilt? Is she pretending she can't hear you? Does she want affection—or just your sandwich? In The Genius of Dogs, Brian Hare and Vanessa Woods lay out what discoveries at the Duke Canine Cognition Lab and other research facilities around the world are revealing about how your dog thinks and how we humans can have even deeper relationships with our best four-legged friends.

A revelatory and timely look at how technology boosts our cognitive abilities—making us smarter, more productive, and more creative than ever It's undeniable—technology is changing the way we think. But is it for the better? Amid a chorus of doomsayers, Clive Thompson delivers a resounding “yes.” In Smarter Than You Think, Thompson shows that every technological innovation—from the written word to the printing press to the telegraph—has provoked the very same anxieties that plague us today. We panic that life will never be the same, that our attentions are eroding, that culture is being trivialized. But, as in the past, we adapt—learning to use the new and retaining what is good of the old. Smarter Than You Think embraces and extols this transformation, presenting an exciting vision of the present and the future. From the Trade Paperback edition.

### **Smarter Than You Think**

NEW YORK TIMES BESTSELLER • From the author of *The Power of Habit* comes a fascinating book that explores the science of productivity, and why managing how you think is more important than what you think—with an appendix of real-world lessons to apply to your life. At the core of *Smarter Faster Better* are eight key productivity concepts—from motivation and goal setting to focus and decision making—that explain why some people and companies get so much done. Drawing on the latest findings in neuroscience, psychology, and behavioral economics—as well as the experiences of CEOs, educational reformers, four-star generals, FBI agents, airplane pilots, and Broadway songwriters—this painstakingly researched book explains that the most productive people, companies, and organizations don't merely act differently. They view the world, and their choices, in profoundly different ways. A young woman drops out of a PhD program and starts playing poker. By training herself to envision contradictory futures, she learns to anticipate her opponents' missteps—and becomes one of the most successful players in the world. A group of data scientists at Google embark on a four-year study of how the best teams function, and find that how a group interacts is more important than who is in the group—a principle, it turns out, that also helps explain why *Saturday Night Live* became a hit. A Marine Corps general, faced with low morale among recruits, reimagines boot camp—and discovers that instilling a “bias toward action” can turn even the most directionless teenagers into self-motivating achievers. The filmmakers behind Disney's *Frozen* are nearly out of time and on the brink of catastrophe—until they shake up their team in just the right way, spurring a creative breakthrough that leads to one of the highest-grossing movies of all time. What do these people have in common? They know that productivity relies on making certain choices. The way we frame our daily decisions; the big ambitions we embrace and the easy goals we ignore; the cultures we establish as leaders to drive innovation; the way we interact with data: These are the things that separate the merely busy from the genuinely productive. In *The Power of Habit*, Pulitzer Prize-winning journalist Charles Duhigg explained why we do what we do. In *Smarter Faster Better*, he applies the same relentless curiosity, deep reporting, and rich storytelling to explain how we can improve at the things we do. It's a groundbreaking exploration of the science of productivity, one that can help anyone learn to succeed with less stress and struggle, and to get more done without sacrificing what we care about most—to become smarter, faster, and better at everything we do.

Striking out on your own for the first time is exhilarating. But in a culture full of bad advice, predatory banks, and splurge-now-pay-later temptations, it can also be extremely dangerous—leading you to make financial decisions that could hurt you for years to come. Combine this with a slumped economy, mounds of student loans, and dubious examples from reality TV stars to politicians to your own parents, and it's no wonder so many twenty-somethings are struggling. Twenty-three-year-old Zac Bissonnette—the author of Debt-Free U—knows exactly what you're going through. He demystifies the many traps young people fall victim to in their post-college years. He offers fresh insights on everything from job hunting to buying a car to saving for retirement that will give you a foundation for a secure, stable, and happy life. In the process, he reveals why FICO scores are overrated, online job applications are a waste of time, car loans are for suckers, and credit card rewards are a scam. With detours to discuss wine connoisseurs, Really Broke Housewives, and Lenny Dykstra, Zac shows you how to make better choices today so you can be richer, smarter (and better-looking!) for years to come.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.
