Ethnic Jewellery

With this gloriously photographed and illustrated manual at hand, beaders can create awe-inspiring jewelry. It's the only current, comprehensive guide to working with cabochons--a flat piece of rock or mineral--and it covers all the basics, along with a range of new creative techniques and hot trends. Find out which tools and materials to use, which beads work best, and how to wrap them round the stones. Craft turned, pointed, twisted, brick stitch, ruffled, or scalloped edges, or add decorative fringe. For something dramatic, combine more than one cabochon in a single piece. Or, instead of natural stone, use dichroic glass or other found objects. Make a glittering brooch, funky bracelets, a wearable art necklace, and other showstoppers.

Totally Awesome Rubber Band Jewelry

Provides instructions for creating sixty rubber band loom projects, including a flower garland, hexafish, tiara, and aloha necklace.

Loom Magic Creatures!

The only book to relate the entire dazzling story of Tiffany jewels, this resplendent volume is packed with stunning photographs of exquisite jewelry & newly discovered designs.

Beading with Cabochons

A complete and practical guide to setting precious and semi-precious stones in any metal, *The Jewellery-Maker's Guide to Gemstone Settings* is a detailed, technical guide to stone-setting for jewellers and jewellery students. It explores traditional, modern, and experimental approaches to stone-setting, from the purely functional to design-led solutions for securing stones. It takes the reader through the entire process of setting stones from choosing a suitable stone and designing and making the setting to seating and setting the stone. The extensive setting techniques are combined with step-by-step demonstrations, precise diagrams and images of contemporary work from international jewellers. A comprehensive reference section featuring an illustrated glossary makes this book the essential stone-setting resource for both students and professional jewellers. Demonstrations produced using 3D modelling software provide the most up-to-date reflection of current practice and technology and allow explanations of skills and techniques to be presented with expert accuracy. The perfect resource for jewellers of all levels.

Loom Band It

In this beautifully designed and lavishly illustrated book, Toni Greenbaum analyzes the output of American modernist jewelers, many of whom, such as Alexander Calder and Harry Bertoia, began as sculptors or painters. In their metal-working skills many of these artists were self-taught and evolved new techniques. This jewelry rejected expensive precious stones in favor of cheaper, irregular gems, and even glass, pebbles and shards of pottery. The influence of Surrealism, Cubism, Constructivism, and Abstract Expressionism led these artists to explore representations of space and individual perception in ways which challenged the traditions of earlier jewelry production.

The Guide to Gemstone Settings

The Van der Star collection of ethnic jewellery is unique, both in size and quality, bringing together masterpieces from Africa, the Arab World, India, Central and Southeast Asia, and the Pacific Islands. Each of these areas has their own specific designs, and their own specific uses and symbolism attached to jewellery. Materials used include gold, silver and many types of gemstones, but also archaic materials such as leather, coral, beads, bone, teeth, and shells. In this lavishly illustrated book, more than 500 magnificent pieces are presented in color, together with detailed descriptions. Authoritative texts are included about jewellery making, and the history, uses, and designs from the various areas. These

chapters are further illustrated with historical and contemporary photographs of jewellery being worn.
